1. Scope of the Document

The scope of this document is to provide users with end-to-end functionality of Murabaha product in Transact along with deltas noted during onsite BPR session. This document has two main sections. Section -5 is existing functionalities that explains end to end journey of LMS with respect to subject product. The other section-7 explains the deltas. Each existing functionality has a reference number that has prefix as WS03, for instance WS03-PRODUCT CODE-PROCESS NO. (WS03-MUR-01). Whereas on delta if any gap has been highlighted for the specific existing functionality, then it will be marked as WS03-PRODUCT CODE-PROCESS NO. SEQUENCE (WS03-MUR-01-01).

The pre-requisite of this document is to review agreed end-to-end process flow from LOS to LMS. This document also refers some working sheets that were finalized during onsite BPR session. Under each existing functionality or Delta there is a separate heading named as “Worksheet details” which will cite the reference document / sheet name.

2. Navigation Tips

This button refers to ‘Validate’ a record on T24. It is placed on top of the screen while input of any transaction on T24. After filling out all mandatory and necessary information, user can press this button to check for core errors or any missing component on the record.

This button refers to ‘Commit’ a record on T24. This button is pressed to make the record part of T24.

This button is used to ‘Delete’ the record. (Only unauthorized records can be deleted from the system)

This button is used to ‘Authorize’ the record. Only upon Authorization marking the record is made the part of LIVE file.

This Button is used to put the record on ‘Hold’.

3. Glossary

Abbreviations	Description
CBS	Core Banking System
BRD	Business Requirement Document
BSDD	Business Solution Design Document
BPR	Business Process Review
IS.CONTRACT	Islamic Finance Contract
AA	Architectural Arrangement (Loan)
WS	Workstream
STP	Straight Through Process
CUC	Customer
LOS	Infinity or new digital
LMS	Transact

4. Agreed LMS process functionalities

Please refer to ProcessFlow-TA-Murabaha-v1.3.3

Process Cycle Overview (3 Working Days)

4.1 Step 1: Offer Acceptance:

- Customers have **24 hours** to accept the offer.
- Actions required: Admin fee payment with VAT (if applicable and was generated in E2E process flow).
- This process has expiry duration of 24 hours

4.2 Step 2: Credit Admin Function (LOS)

- Purchase Order (PO) generation by the Credit Admin (LOS) for PO base financing.
- Voucher details to be input by the Credit Admin (LOS) for Voucher base financing.

4.3 Step 3: Contract Stage:

- Contract is generated and signed by the customer via ND.
 - **Reversals** (if applicable): Admin fee with VAT in case customer rejects at any above stages
 - The process 4.2 and 4.3 have expiry duration of 48 hours.

4.4 Step 4: Promissory Note Stage:

- Creation and acceptance of the Promissory Note by the customer via NAFITH.
 - **Reversals** (if applicable): Down payment and admin fee.

4.5 Step 5: IVR Authentication:

- Customers must authenticate via IVR.
- **Reversals** (if applicable): Admin fee and Promissory Note.

4.6 Step 6: Transact GL Entries:

- Asset Purchase
- IS Contract

4.7 Step 7: Repayment Schedule:

- Repayment Schedule on AA Arrangement (APR generation).

4.8 Cancellation During Cooling Period:

- If the process is cancelled within the **cooling-off period means after disbursement**, the following reversals are Required:
 - Promissory Notes.

5. Existing Functionalities

5.1 IS.PARAMETER (WS03-MUR-01)

IS.PARAMETER is the parameter table to define the Islamic Banking product related features.

5.4 Payment to Vendor (WS03-MUR-04)

Steps of setup Vendor in Transact are as follows:

1. Open CIF of the Vendor
2. Open Account of the Vendor
3. Tag CIF and Account in the Vendor Management Setup

Vendor Management

Add CIF of Vendor as stated in point 1 above, in the Vendor Setup From

Then add Vendor Related Details, e.g. Name, Company, Currency and then add Vendor account in the account field as stated in point 2 above.

In order to make the payment to asset vendor user needs to execute FT. Below fields that need to be input by user to execute vendor payment FT. In case of TA this process is

automated. Once this transaction is executed, a payable to vendor is generated to a pool account from where TA finance team can execute IBFT.

User will make funds available is customer's repayment account through below navigation

SMB Islamic Operation → IS Credit Management → Finance Transaction → Arrangement Activities (FT) → AA-Fund Transfer

User will mention Credit account as customer repayment account and the debit account of AL Rajhi Bank (2000003363) in which customer has deposited funds as per bill due amount. Then validate and commit the record.

The screenshot displays the 'AA - Fund Transfer / FT/24336/ZW98Z' form. It contains the following fields:

Credit Account 2000005536 - FARHAN KHAN	Credit Value Date 01 Dec 2024
Credit Currency SAR - Saudi Arabia Ri	Credit Amount 300,000.00
Debit Account 2000003363 - AL RAJHI BAN	Debit Value Date 01 Dec 2024
Debit Currency SAR - Saudi Arabia Ri	Debit Amount
Treasury Rate	Processing Date 01 Dec 2024
Customer Rate	Customer Spread

At the bottom, there is a green status bar indicating 'Ten Complete'.

The authorizer will authorize the FT by following the below navigation

SMB Islamic Operation → IS Credit Management → Finance Transaction → Arrangement Activities (FT) → Authorize / Delete Arrangements (FT)

Authorizer will review the FT by using view icon

5.6.3 Early Pay off (WS03-MUR-010)

Post cooling period, if customer comes to any FI for early settlement, then Transact provides an option to exercise Payoff functionality. This can be executed from 360 overview of arrangement as mentioned below. A payoff statement is generated that contains all the financial information like, income receivable, principal receivable, any overdue item and fee etc. All such information is part of product setup sheet which is used as client/regulatory specific product requirements.

5.6.3.1 SADAD bill generation and upload rules.

This rule has been developed in order to manage both monthly instalment invoice and early settlement invoice that can be requested at any time.

If the payoff invoice is issued between 29th of the current month till 27th SOD of the following month (considering 28th is cycle date of product) then expiry of the same invoice will be 27th

EOD of the following month this is because monthly invoice can be generated on 27th EOD. The early settlement charge will be 3 months starting from next month.

If the invoice is generated on 28th there is no extra accrual and only 3 months early settlement charge starting from the next month will be collected expiry of this invoice will be 28th EOD.

Once customer will pay the Sadad bill then d funds are transferred to customer's repayment account which is maintained by Transact, then an automated process will be run to settle customer's loan account and balances. Below is the manual process of the same. There is another process of bulk file upload of FT, for which a format has been designed. Please see sheet name as "DayN-File Upload" in excel file. This is an automated process however user can also manually make FT if required.

Once the required amount is credited to the customer's account a service will be executed to settle the loan account. Below is manual process as well.

User will initiate cancellation by using following navigation

SMB Islamic Operation → Early Payoff → Early Payoff Initiate

User will put the application ID and icon on the edit icon

Then user will mention bill reference no, then validate and commit the record

The process has been initiated.

5.6.5 Partial Settlement (WS03-MUR-12)

Partial Settlement can be done in two ways

- i. AA - Compression payment
- ii. AA Principal Decrease

5.6.5.1 AA - Compression Payment

In AA – Compression payment customer can settle minimum 2 and 5 maximum instalments. It is on customer's preference either the customer opt to reduce the instalment or reduce the tenor.

User will follow below navigation for Partial Settlement Compression Simulation

SMB Islamic Operation → Partial Settlement Compression → Compression Simulation

User will input Application ID, Number of Installment and Recalculation Method (Installment/Term) then validate and hold.

Partial Settlement Simulation - Compression / FT/24337/95PCH

Through a service this is integrated with SADAD. Like other processes, this process can also be integrated with servicing app.

User will make the funds available in customers repayment account as mentioned in early payoff section

Once the funds are available in customer repayment account, user will initiate Principal Decrease payment as per below navigation

SMB Islamic Operation → Partial Settlement Principal Decrease → Partial Payment Principal Decrease Initiate

Partial Settlement Principal Decrease

- + Principal Decrease Simulation
- + Principal Decrease Bill Generation
- Principal Decrease Generated Bills
- Partial Payment Principal Decrease Initiate**
- Principal Decrease on Hold
- Authorize/Delete Principal Decrease

User will enter the application id and then click on the edit icon

Principal Decrease

/

After that user will put the bill reference and then validate the activity

5.9 Bill Adjustment & Waiver (WS03-MUR-15)

In case if user wants to adjust any bill (complete or partial or any balance components), below steps need to be followed.

There are multiple bills so user can adjust any bill(s).

The screenshot displays the 'Account Static' tab for a 'Personal Finance' account. The 'Commitment' section shows an amount of 500,000.00. The 'APR Details' section shows a rate of 19.3396%. The 'Schedule' section shows a constant repayment of 12,500.00. The 'Outstanding Finance Receivable' section shows a principal of -478,327.17. The 'Payoff Statement for' section shows a date of 30 JAN 2024. The 'Request Payoff' and 'Request Payment Holidays' sections are also visible. The 'Additional Details' section is expanded, showing a 'Bill' section with a table of 'Outstanding Repayments'.

Due Date	Type	Billed	Outstanding	Status
01 FEB 2024	Installment	12,500.00	12,500.00	Stage iib 0 Days
01 JAN 2024	Installment	12,500.00	12,500.00	Stage iib 31 Days
01 DEC 2023	Installment	12,500.00	7,97.39	Stage iib 62 Days
01 NOV 2023	Installment	12,500.00	5,302.61	92 Days

On new activity, system will open all the relevant activity pertaining to this Arrangement. Then go to “Adjust Bills” option.

The screenshot displays the 'Arrangement Overview (Lending) - Islamic Lead' page. The 'New Activity' button is highlighted. The 'Account Details' section is expanded, showing a list of activities. The 'Balance Maintenance' section is highlighted, and the 'Adjust Bills' option is selected.

This activity holds all the unpaid bills with each bill reference separately. Under each bill user will get different balance components like in case of EMI principal and profit. For principal property name is “ACCOUNT” and for profit “DEFEREDPFT”.

Once the transaction is input and authorized, the bill will be appeared under the tab of repayment with the status as settled and date.

6. Deltas

Following gaps are captured in this document:

S. #	Gap Number	Gap Details
01	WS03MUR-04-01	List of Vendors
02	WS03-MUR-02-01	Validation for sufficient funds
03	WS03-MUR-09-01	Maintenance Activities
04	WS03-MUR-03-02	Assets Details
05	WS03-MUR-05-01	E – Invoice for VAT
06	WS03-MUR-05-02	STMT Transaction
07	WS03-MUR-12-01	Advance/ Partial Payment
08	WS03-MUR-05-03	Limit Attachment before Arrangement
09	WS03-MUR-05-04	Discount
10	WS03-MUR-08-01	Post Delivery Cancellation
11	WS03-MUR-05-06	Reversal of Admin Fee
12	WS03-MUR-02-03	Straight Through Process - STP
13	WS03-MUR-13-01	Restructuring
14	WS03-MUR-02-04	Offer Letter, Contract Generation & Other Letters
15	WS03-MUR-11-01	Post Write-Off Recovery
16	WS03-MUR-10-06	Bullet Payment & EPC
17	WS03-MUR-05-06	File Upload of Repayment through IBFT

7. Detailed Description of Deltas

7.1 List of Vendors - WS03-MUR-04-01

Tamweel Team will provide the Vendor list which needs to be added in Transact the vendor can be active or de-active. Each Vendor will have its own CIF and Repayment's account.

- Category wise segregation is required Vendor e.g. Ijarah Vendor, Tawarruq Vendor or Murabaha Vendor etc.
- ID number for Vendor (TA please write length and data type)
- VAT Registration Number (TA please write length and data type)
- The TA (SAP) team will provide a unique SAP Vendor Number for each vendor. This number must be stored and associated with the corresponding vendor record in Temenos Transact.
- For Vendor CIF, Customer BSDD must be signed with above information. This BSDD is only for reference.
- Under the Product Group of Murabaha there will be an option to add multiple vendors.
- There are 2 types of financing (1) Voucher (2) Non-Voucher (PO Base Financing). For PO base financing there is separate vendor for each service.

7.1.1. Proposed Solution

TA will list of vendors. OFS will be created as part of Build. This OFS will create CIF, Accounts and vendor record. Further below local ref will be defined in IS VENDOR table to capture product wise and segment wise vendor records. SAP Vendor Number will be recorded as an ALT.ID of Vendor Account.

New Fields – Application Name (IS.VENDOR)

S.No.	Field Name	Data Type	Technical Name	Comments
1	Product	Number	SMB.IS.PRODUCT	
2	Vendor Type	Text	SMB.VENDOR.TYPE	* Voucher / Non-Voucher

7.2 An API needs to be exposed to LO.Validation for sufficient funds - WS03-MUR-02-01

1. For asset financing there is Admin fee as an optional. (This admin fee is based on service provider and therefore should be parameterize and will auto fetch from LOS)
2. For voucher base financing there is no Admin Fee.

Upon acceptance of offer, Sadad bill will be sent to customer for admin fee plus VAT once the customer will be deposited than Finance contract will be initiated. This only for Assets base finance.

Before generation of Financing Agreement, a validation is required for sufficient funds in customers repayment accounts equivalent to Admin Fee plus VAT (if applicable).

Admin fee values are based on scheme whereas in product we will manage in GL till the time Finance contract not generated. This admin fee will park in customer repayment account till the time Finance Arrangement created in order to maintain APR.

7.2.1. Proposed Solution

Once the customer accepts the offer a ROSOM bill will be generated for Admin Fee & VAT. Upon settlement of this bill status will be updated in SMB.DEAL.DETAILS template then Transact will send message to ND through an API that bill is settled.

No partial payment should be allowed on ROSOM bill for Admin Fee & Down Payment.

Further local ref will be added in AC application to capture Total Principal, Profit, Insurance, Charges and VAT.

7.3 Maintenance Activities - WS03-MUR-09-01

All maintenance activities will same as Tawarruq such as

- Partial Settlement
- Deferment
- Early termination of interest-bearing loan and non-interest bearing contract where there is no EPC of next three months
- Repayment process
- Waiver
- Generation of Rosom bill and Write-off.

7.3.1. Proposed Solution

Same as mentioned in section 5.6 Maintenance Activities of this document.

7.4 Assets Details - WS03-MUR-02-02

Assets details is required in Murabaha Finance for which Assets Details will include following information.

1. **PO Base (Non-Voucher) Financing has below list of Assets.**

- i. Furniture
- ii. Home Appliances
- iii. Cars
- iv. Gift Cards
- v. Fashions

For above stated assets, only Asset Description is required even in case of Cars.

2. **Voucher base Financing has below Services**

- i. Insurance Services
- ii. Education Services
- iii. Hospital Services

iv. Travel & Hotels Services

For above stated services only Description is required.

After the selection of above listed items there will be multiple vendors w.r.t selected option. Vendor List will be provided by TA. This asset description is input by customer in New Digital (ND). For assets / service description will be provided by ND based on the selected vendor along with the coupon reference. PO reference & Voucher reference will be treated as Coupon Reference.

A local ref will need to be added for Asset or Service offered under Murabaha. This filed will be mandatory and will have LOVs of all listed items. This local ref will eventually become as part of CAL Key to have separations of GL.

There will be separate profit & cost center for each service provider. This will take by Finance team of TA and SA.

7.4.1. Proposed Solution

Two local ref will be added named as “**Financing Type**” & “**Financing Sub-Type**” in SMB.DEAL.DETAILS, IS.MISCASSET and IS.CONTRACT to capture financing purpose of financing.

New Fields – Table / Application Name - SMB.DEAL.DETAILS / IS.MISCASSET / IS.CONTRACT

S.No.	Field Name	Data Type	Technical Name	Comments
1	Financing type	Text	SMB.FIN.TYPE	Voucher / Non-Voucher
2	Financing Sub-Type	Text	SMB.FIN.SUBTYPE	For Voucher Base: Furniture, Home Appliances, Cars, Gift Cards and Fashions For Non-Voucher Base: Insurance Services, Education Services, Hospital Services and Travel & Hotels Services
3	Arrangement Reference	Vatted through AA.ARRANGEMENT	SMB.ARR.REF	Once AA Arrangement is created it reference will be updated in SMB.DEAL.DETAILS. (This is for all products)

7.5 E-Invoice for VAT - WS03-MUR-05-01

E-invoice is required to be issued for VAT amount which will be sent to the customer. This VAT will be applicable on insurance and admin fee.

File Name: VAT E-Invoice Template

7.5.1. Proposed Solution

In case of upfront recovery of Admin Fee (i.e. net of finance), a post routine will be attached on activity API against the activity named as “LENDING-MAKEDUE-ADMINFEEUP” on action Make.Due. Below template will be auto updated upon the authorization of this activity.

In all other cases, VAT invoice will be generated upon Rosom bill settlement.

Table name = SMB.ISFIN.VAT

ID Name	Type	Length	Description	Mapping	Sample Value
@ID			ARRANGEMENT ID.PROPERTY NAME.DATE (AA2403237NW9.AD MINFEE.20250304)		
SMB.VAT.REG	N	15	VAT Registration - A local field that will accept VAT registration number. COPMANY>SMB.VAT .REG	Local Ref Required on company table	30043416481000 3
SMB.INV.NO	N	15	Invoice Number – A local field with a unique invoice number. Auto generated (Arrangement ID. Serial number)	Local Ref Required	AA2403237NW 9.001
SMB.INV.DATE	N	Date	Invoice Issue Date – A local field that contains invoice	Local Ref Required	2025-01-12

			issue date. Auto – current system date		
SMB.SUP.DATE	N	date	Date of Supply – A local field that contain date of supply. Auto – current system date	Local Ref Required	2025-01-12
CUSTOMER.ID	N	06	Customer ID – Contains valid customer ID.	CUSTOMER >ID (obtain from customer application)	200006
SMB.SELLER.NAME	T	35	Seller Name – Contains Financial Institution Name. COMPANY>COMPANY.NAME	Local Ref Required	Tameel Aloula Financing Co.
SMB.CUS.VAT	N	15	VAT Registration - A local field that will accept VAT registration number of customer. CUSTOMER>SMB..CUS.VAT	Local Ref Required	311325608800003
BUILDING.NUMBER	N	15	Building Number – Represents the number that identifies the position of a building on a street.	CUSTOMER > BUILDING.NAME	8280
STREET	AN	35	Street Name – Identifies the first line of the Customer's base address.	CUSTOMER >STREET	Prince Bander Bin Abdulaziz
DISTRICT.NAME	AN	35	District - Identifies a subdivision within a country sub-division.	CUSTOMER > DISTRICT.NAME	Prince Bander Bin Abdulaziz

CITY	A	35	City - The City of Customer's physical address.	CUSTOMER > TOWN.LOC ATION.NAM E	Al Khobar
COUNTRY	A	35	Country – The county of Customer's physical address. This field is used to capture the County of the respective State.	CUSTOMER >COUNTRY	Saudi Arabia
POST.CODE	N	35	Postal Code - Identifies the postal code for customer.	CUSTOMER > POST.CODE	03154
FURTHER.DETAILS	N	35	Additional No – Any relevant further details about customer.	CUSTOMER > FURTHER.D ETAILS	25348
SHORT.NAME	T	35	Client Name – Identifies the name of the Customer in a more descriptive form, and will be used for on-line enrichments in any field where a Customer ID or Mnemonic has been input	CUSTOMER > SHORT.NA ME	MOHAMMAD AHMED
SMB.SERIAL.NO.1	N	15	S. No. – Auto generated serial number. Multi-value field.	Local Ref Required	1
SMB.DESCRPTION. 1	AN	35	Description – Local Ref Required. Multi-value field.	Local Ref Required	Management Fee
SMB.GROSS.AMT	N	20	Gross Invoice Amount – Sum of all total fields.	Local Ref Required	115.00

SMB.VAT.RATE.1	N	04	VAT Rate – Applicable VAT rate.	Local Ref Required	17.25
SMB.VAT.AMT.1	N	20	VAT Amount – Calculated field by applying applicable VAT rate.	Local Ref Required	17.25
SMB.DISCOUNT	N	20	Discount – Applicable Discount.	Local Ref Required	17.25

7.6 STMT Transaction - WS03-MUR-05-02

For every Transaction in STMT, TA needs IS CONTRACT, APPLICATION ID, SADDAD Reference. this is important for reporting purpose.

7.6.1. Proposed Solution

For different types of reporting, there has to be segregation of channels, application id and IS contract references on our reference and their reference fields in FT.

Further all these FT will required to be reflected in Enquiry – TXN.ENTRY.MB to search through IS contract reference such as Asset purchase, reversal of purchase in case of rejection.

A copy of TXN.MB.ENTRY enquiry needs to be developed, below is the details of requirement,

1. An FT (purchase) will be executed before IS.CONTRACT creation with transaction reference of LOS APP ID.
2. Now IS.CONTRACT will be opened, having the reference id of LOS application.
3. As core above enquiry will show all IS CONTRACT entries except point 1, FT.
4. In order to show all entries (point 1 and 2) in single enquiry, a copied enquiry of ENQ TXN.ENTRY.MB, needs to be developed accordingly.

7.7 Advance/Partial Payment - WS03-MUR-12-01

There is a possibility that customer transfers funds from IBFT where there is no invoice number (It is treated as Advance Payment), in this case if any request of partial payment/ payoff is received the invoice/bill amount will be net off with this advance amount and in case, the resulted amount becomes zero then only simulated schedule will be sent to customer and upon the acceptance of this schedule entry will be passed.

7.7.1 Worksheet details:

File Name: Murabaha Working Sheet

Sheet Name: DayN-File Upload

7.7.2. Proposed Solution

Whenever there is payment received in customer repayment account from IBFT, that payment will be settled in below set of events. Further this advance payment will also

impact early settlement calculation as mentioned in this section. Moreover, it is pertinent to mentioned that Advance Payment option is not available on servicing app.

1. Settle overdue bill if any and update Payment Gateway (PG) bill template.
2. If PG bill exist and payment amount is sufficient to settle the existing bill fully, then update PG bill and execute the respective bill activity accordingly in transact to execute the transaction. For example,

Bill Category	Activity
Payoff	Payoff Activity
Partial	Partial Settlement Activity
Recurring	Respite Activity

3. If partial payment is received through IBFT then update PG bill amount by taking into consideration of IBFT amount.
4. If no PG bill exist and funds will be sufficient to recover future installments fully then it will be utilized to settle future installments fully through Respite Activity and leave the remaining amount in customer repayment account.
5. If funds will not be sufficient to recover full installment amount, then these funds will remain available in customer repayment account. Any subsequent request for partial payment/ payoff is received then invoice/bill amount will be net off with this advance amount. This is already available that whenever there is an excess payment, system will generate zero bill invoice.
6. Currently where there is no amount in repayment account then system generates simulated schedule to be shared with client through ND and upon acceptance of client bill is generated. However, in case when there is sufficient amount is available in repayment account then simulated schedule will be shared through ND and upon acceptance of same by customer transaction will be executed.

Impact on Early Settlement Calculation:

When a customer makes an advance payment (shifting their next repayment date forward) and later requests early settlement, the profit from the already-paid installment should **not** be included in the 3-month profit charge calculation. In this case, the early settlement calculation should only include the profit from the three unpaid months following the most recent paid installment.

If the customer has already paid the current month's installment through an advance payment, then the current month's profit should **not** be included in the early settlement calculation.

7.8 Limit Attachment before Arrangement -WS03-MUR-05-03

Limits need to attach before creating Arrangement. This should be auto populated on arrangement level as part of STP.

7.8.1. Proposed Solution

Upon the authorization of IS Contract as explained in gap WS03-MUR-02-03, limit record needs to be created along with collateral code attached. This limit record then will be written on SMB.DEAL.DETAILS, IS.CONTRACT and at the time of arrangement creation, this limit will be auto populated on Limit arrangement condition. For this purpose, a routine will be written and attached on activity LENDING-NEW-ARRANGEMENT.

7.9 Discount - WS03-MUR-05-04

Discount from Vendor

- A Discount Percentage will be provided by LOS, as mentioned in E2E Accounting Entries. TA needs to decide whether this % will come from LOS or it should be set on parameters. Accordingly, solution will be provided.
- LO will share Total Amount, Discount Percentage, Discount Amount and Net Amount. Discount is part of scheme.
- Discount from vendor will be amortized over financing term. SA team will revert on it.

Discount from Tamweel:

There is possibility that customer will get discount for example first two instalment are free, means TA will settle these accounts internally from Marketing Expense

TA is giving any free instalment to customer (settling the first N bills through their internal account), in this case there wouldn't be any changes in customer's APR. Moreover, since this is instalment free period for customer no SADAD bill should be generated. Free Instalments number should be communicated by LOS to LMS. This free instalment has no impact on APR.

7.9.1 Worksheet details:

File Name: Murabaha Working Sheet

Sheet Name: Proposed E2E Ent. Discount.

7.9.2. Proposed Solution

Discount from Tamweel:

Refer to accounting entries mentioned on “Day9- Proposed E2E Acct. Ent.” Cell B131, where TA will settle first few instalments of the customer and then on month end marketing expense will be booked for cases. Below is the solution.

A parameter needs to be set on IS.PARAMETER on product level. Where below list of local fields will be added. All these fields will come from LOS and mapping is required.

Discount from vendor will managed through scheme which is covered in pricing FSD.

APPLICATION NAME = IS.CONTRACT

ou

S.No	Field Name	Data Type	Technical Name	Comments	Description
1	Discount Type1	Character	SMB.DISCOUNT.TYPE	LOVs* 1. Discount from VTCO 2. Discount from COTCU	1. discount from vendor to Company (discount %) 2. Discount from Company to customer (X number of Instalment will be paid by Company)
2	Discount Percentage	Number	SMB.DIS.PER	Length =3	% of discount for above LOV1. Conditional mandatory
3	Number of Installments	Number	SMB.NO.INST	Length =3	X number of Installment for above LOV2. Conditional mandatory.

*Mapping has been added to “Ijarah Working Sheet” sheet name “List of Fields”

APPLICATION NAME = IS.PARAMETER

S.No	Field Name	Data Type	Technical Name	Comments
1	Discount type.1	Character	SMB.DISC.TYPE	LOVs* 1.Discount from VTCO 2.Discount from COTCU 3. vat on discount
2	Transaction Type.1	Vetting from FT.TXN.TYPE.CONDITIONS	SMB.TXN.TYPE	For Lov 1 and 2

3	Dr Category.1	Vetting with CATEGORY table	SMB.DIS.DRCATE	
4	Cr Category.1	Vetting with CATEGORY table	SMB.DIS.CRCATE	
5.	Transact Frequency.1	Transaction frequency	SMB.FRQ.TXN	LOVs 1. Online 2. COB
6	Settlement category for Discount	Vetting with CATEGORY table	SMB.SUS.ACCT	Settlement internal account for COTCU. Conditional mandatory

VTICO

Discount	DR	DUEDISCVEN	Discount from vendor	(50,000.00)	On Balance Sheet	Core
	CR	ACCDISCVEN	Unamortized Discount from Vendor	50,000.00	On Balance Sheet	
	DR	Multisupplier Account	Internal Account	(50,000.00)	On Balance Sheet	
	CR	DUEDISCVEN	Discount from vendor	50,000.00	On Balance Sheet	
Daily Amortization Discount	DR	ACCDISCVEN	Unamortise Admin Fee	(136.99)	On Balance Sheet	Core
	CR	PL/ Income	PL Category	136.99	On Balance Sheet	

A debit charge will configure for discount from vendor that will be set as Amort over term of arrangement. Accordingly Working Sheet has been updated and attached with this document.

COTCU

Below standard arrangement conditions will be set on product level for Ijarah product. If there is no discount, then customer repayment account will be defined as payin account for both payment types else internal account will be used for recovery of discount period installment as mentioned in below screenshot.

End date field against Payment Type = Constant.Vendor will be updated based on number of installments allowed as discount else it will be set as R_START. For regular installments Start Date field will be set as R_START plus one month in addition to number of discount installments else it will be set as R_START+1M.

Discount to Customer				
there is possibility that customer will get discount for example first two instalment are free, means TA will settle these accounts internally from Marketing Expense				
below is Accounting example				
the discount will always be First Few Instalment and not in end or in b/w				
	Due Date		Dr	Cr
Case 1	28-Jan-24	TA internal Account	1000	
		Loan Receivable		1000
Case 2	28-Jan-24	TA internal Account	1500	
		Loan Receivable		1500
Case 3	28-Jan-24	TA internal Account	2500	
		Loan Receivable		2500
Month End				
		PL * Marketing Expense	5000	
		TA internal Account		5000

The above month end transaction will be executed through a batch of on month end. Since arrangement will be opened manually therefore, a routine will be written. This routine will be attached on activity API on activity LENDING-NEW-ARRANGEMENT with action UPDATE. If SMB.DISC.TYPE has LOV COTCU then arrangement settlement and schedule conditions will be auto populated on validation with below values.

AA.PAYMENT.TYPE for X number of installments in schedules and same AA.PAYMENT.TYPE will be used for settlement account by reading field IS.PARAMETER>SMB.SUS.ACCT.

Technical Note: - In case of COTCU SADAD bill is not generated till the time of discounted installment is set. As discussed in the meeting there is no impact of instalment free period on APR. (email of 06/02/2025)

Note for Tamweel:

Bills can be suppressed. But how advance payments / early settlement handled during this period?

7.10 Cooling period Cancellation - WS03-MUR-08-01

a. Cancellation of Asset

- i. Cooling period cancellation - There is 10 days cooling period, but it is not part of ND. Customer may come to TA branch or through call center. this cancellation will execute without the reversal of Admin fee.
- ii. Treatment of Vendor Discount - Vendor discount will be reversed in case of cancellation during cooling period.

b. Cancellation of Voucher

- i. There is no admin fee, therefore no reversal is required.
- ii. Cooling period cancellation is also applicable for voucher same as above
- iii. There is no unredeemed voucher concept in product.

7.10.1. Proposed Solution

a. Cancellation of Asset

Ten days cooling period will be set at product level. Discount from vendor will be reversed in case of cancellation during cooling period as system will recognize the balance of unamortized discount amount. Afterwards an FT through OFS (contra) will be executed for reversal of discount amount to multi-supplier internal account. Further a parameter needs to be configured for non-reversal of admin fee in case of cancellation during cooling period.

Technical Note: Discount from vendor will be reversed as per the current mechanism of upfront admin fee reversal in case of cancellation during cooling period.

b. Cancellation of Voucher

No separate solution is required for this point as its already covered in above point setting-up cooling period at product level.

7.11 Reversal of Admin fee - WS03-MUR-05-05

The reversal of admin fee + VAT will be occurred in the below scenarios:

- Rejection of financing contract
- Rejection of promissory note
- Rejection by customer on IVR authentication

Stage	Debit/Credit	Accounting Entries	Description
Reversal of Admin Fee	DR	Customer A/c.	Disbursement /Repayment Account
	CR	TA Bank A/c.	TA Bank Account
	DR	Customer A/c.	Disbursement/Repayment Account
	CR	TA Bank A/c.	TA Bank Account

7.11.1. Proposed Solution

A template named as SMB.DEAL.DETAILS is created carrying application status field, whenever the status of “EXPIRED/REJECT” is updated then an OFS will be triggered that will reverse down payment, admin fee + VAT and insurance. Below accounting entry will be executed through OFS.

Debit - Customer Repayment A/c. (XXXX)

Credit – TA Bank A/c. XXXX

7.12 Straight Through Process - STP - WS03-MUR-02-03

- A. LO will send list of fields to LM to get simulated schedule from LM, which will be used for Qarrar and offer letter generation.
- B. Post offer acceptance, LO will push complete list of fields related to customer in response LM will create the CIF and Repayment account of customer. For CIF related information please refer to Customer’s documents.
- C. Bill will be generated for admin fee plus VAT. Upon payment of bill Credit Admin will issue the PO and sent it to vendor manually for assets base financing. In case of voucher finance Resal Voucher will be manually created by user.
- D. No admin fee for voucher base financing.
- E. Contract will be generated through ND (if rejected/declined Reversal of admin fee)
- F. Promissory Note creation and acceptance by customer through NAFITH (Reversal of admin fee)
- G. IVR call to be responded by the customer, IVR authentication if customer reject offer then Reversal of admin fee)
- H. **IS Contract Stage:** Auto process will trigger for GLs entries as mentioned in entries of Murabaha Working sheet. (Asset Capture and IS Contract creation – Auto Creation)
- I. **Delivery Stage:** AA will be created automatically. Repayment Schedule with APR effective from delivery date will be generated on the same stage. From the same date the accrual of profit will start, during EOD process.

7.12.1. Proposed Solution

Once the offer is accepted by customer, a new template “SMB.DEAL.DETAILS” will be created with ID as “Application Id”, which will hold the details as mentioned in “List of Fields” tab of Murabaha Working Sheet.

Further an additional field of Application Status will be defined with LOV’s “Not Disbursed, Disbursed, Reject, Expired”. This field will be updated based on application fate accordingly. The Straight-Through Processing (STP) workflow will be initiated upon successful IVR response as stated below in End to End Process Flow section.

An enquiry will be created in order to monitor the status to each application.

New Template

SMB.DEAL.DETAILS			
Technical Name	Mapping	Ref Fields	Description
@ID	LOS APPLICATION ID		
SMB.REC.STATUS	LOVs:- Offer Accepted Reject Expired		
CUSTOMER	IS.CONTRACT>CUSTOMER

SMB.DISC.TYPE	IS.CONTRACT>SMB.DISC.TYPE	LOV: Company to Customer	

E2E (End-to-End) Process Flow:

The detailed E2E process flow for the assets purchase and finance agreement must be defined and appended to the workflow. This will ensure the sequence of operations from the initial offer acceptance to the delivery of assets is followed correctly. Key stages of this flow include:

- Offer Acceptance:** When the customer accepts the offer, the system triggers CIF creation and repayment account will be created and Rosom bill generated for Admin Fee plus VAT amount if applicable. Upon acceptance of offer LOS will push all relevant information pertaining to creation of IS Contract and AA Arrangement on a template i.e. SMB.DEAL.DETAILS. A validation for sufficient fund as defined in WS03-MUR-02-01 will be triggered prior to contract generation.

- **PO Generation / RESAL Voucher:** User will manually generate the Purchase Order (PO) in case of Non-voucher financing and RESAL voucher in case on voucher base financing. A version (SMB.DEAL.DETAILS,VOUCHER.INPUT) needs to be created which will be utilized to update the details of PO / RESAL voucher in SMB.DEAL.DETAILS template. Below fields will be defined in SMB.DEAL.DETAILS,VOUCHER.INPUT.

S.No.	Field Name	Data Type	Technical Name	Comments
1	PO / Voucher Reference	Text	SMB.FIN.TYPE	Voucher / Non-Voucher

Upon authorization Application Status will be updated to “Disbursed” which will trigger the contract generation stage.

- **Contract Generation and Signing:** The customer must complete the contract generation, including signing it electronically via ND system. Contract will be generated on daily basis till the expiry date of offer to synch APR on contract and loan account. There is no impact on offer generation, offer will contain maximum APR. Further there is no change in first instalment date calculation which is based on offer expiry date.
- **Promissory Note Creation and Acceptance:** The customer then accepts the promissory note via the NAFITH system, which is integrated into the workflow.
- **IVR Authentication:** This step ensures customer authentication through IVR (Interactive Voice Response), which should be completed within 48 hours of contract signing.
- **Assets Capture (Auto in Transact):** Asset capture will be initiated upon successful IVR response, it extract assets details from SMB.DEAL.DETAILS template.
- **IS Contract Generation (Auto in Transact):** Once assets capture step is completed, IS contract process will be initiated by extracting the details for SMB.DEAL.DETAILS template. Upon the completion of IS contract process, an OFS will be generated to transfer the funds in vendor payable by debiting multi supplier and crediting vendor payable account.
- **Finance Arrangement (Auto in Transact):** Once IS contract generation is completed Finance Arrangement will be initiated which will auto fetch the details from IS Contract and SMB.DEAL.DETAILS. Repayment Schedule with APR effective from delivery date will be generated on the same stage. From the same date the accrual of profit will start, during EOD process.

7.13 Restructuring - WS03-MUR-13-01

This internal buy-out where Murabaha will be converted into Tawarruq. There is only one possibility from Murabaha to Tawarruq for all kind of Murabaha contract.

7.13.1. Proposed Solution

This is an existing functionality and already covered in section 5.7 of this document.

7.14 Offer Letter, Contract Generation and Other Letters- WS03-MUR-02-04

S.no	File Name	Document
1	Clearance letter	 Clearance letter (1)_eng.docx
2	Murabaha contract - SAMA	Format to be shared by TA

In order to generate synch APR on contract and loan account, it was agreed that TA will be generating contract on daily basis till the expiry of offer. There is no impact on offer generation, offer will contain maximum APR. There is no change in first instalment date calculation, which is based on offer expiry date.

The sheet contains calculation of schedule and APR rate. Please note the current setup is based on receiving the Interest rate as IRR and then creates schedule however, based on the need system can also calculate instalment amount based on Flat rate where the Instalment amount is different from previous one. Moreover, this sheet contains two different schedule, one that is generated at the time of offer letter and other at the time of contract creation (at disbursement). Since there is a time leg between offer letter and contract creation (at disbursement) therefore, the simulated schedule (offer letter) is being generated with the assumption that customer will accept this offer at last day of expiry, as a result of this a maximum APR is communicated to customer on finance agreement whereas system stores both the APR on same contract. A comparison of all factors is given in this excel for better understanding.

7.14.1 Worksheet details:

File Name: Murabaha Working Sheet

Sheet Name: APR with Flat Rate

7.14.2. Proposed Solution

7.15 Post Write-Off Recovery- WS03-MUR-11-01

In current design, once the case goes for write-off the loan account status becomes pending closure as mentioned in section 6.6.4. therefore, in order to recover the amount in future, system should maintain each balance component that were waived / written-off. TA needs to elaborate how the payment of such cases will be executed. Either IBFT or SADDAD.

TA needs to explain if write-off is required on different business events with different PL, else one screen will be given with default GL.

In addition to this bulk write-off is also required as mentioned in section 6.6.4.

7.15.1. Proposed Solution

Write-off of Finance

A new version for LENDING-WRITE.OFF-BALANCE.MAINTENANCE activity will be created which will contain the below fields.

ID Name	Type	Length	Description	Mandatory / Optional	Validation (if any)
SMB.ARRANGEMENT	Alpha Numeric	12	A local field that will accept valid arrangement reference number for write off activity.	Mandatory	Yes
SMB.ACTIVITY	Text	35	A local field with a default activity of "LENDING-WRITE.OFF-BALANCE.MAINTENANCE"	Mandatory	No
SMB.CUSTOMER	N	15	A local field that will auto populate customer number of arrangement reference.	Mandatory	No
SMB.CUSTOMER.ROLE	Text	15	Associated with CUSTOMER field. Denotes the role of the customer in the Arrangement. Auto fetched from arrangement.	Mandatory	Yes
SMB.PRODUCT	Text	35	Indicates the Product of the Arrangement contract. Auto fetched from arrangement.	Mandatory	Yes
SMB.CURRENCY	Text	03	Indicates the Currency of the Arrangement contract. Auto fetched from arrangement.	Mandatory	Yes
SMB.INITIATION.TYPE	Text	15	This field denotes the type of initiation for the current	Mandatory	No

			activity that is whether the activity was triggered by the user or by external transaction or it could be scheduled or secondary activity. By default, it would be set as "User".		
SMB.ACTIVITY.CLASS	Text	35	This is a no input field and denotes the activity class id for the given activity.	Mandatory	Yes

Further an associated version i.e. SMB.AA.ARR.BALANCE.MAINTENANCE,AA.BALS will be attached with this version which will be created by replicating version AA.ARR.BALANCE.MAINTENANCE,AA.BALS. Further a local ref will be added in new version (SMB.AA.ARR.BALANCE.MAINTENANCE,AA.BALS) termed as Write-Off Reason with LOV's such as (Credit, Deceased or Fraud).

Based on write-off reason PL category will be defined in write-off parameter table. A routine will be developed which will post the OFS by debiting PL category and crediting internal account by considering write-off reason.

Write-off Template

A new template will be created named as "SMB.WOF.DEAL" having record ID as Arrangement reference / Application ID (only for migrated cases). An API routine will be attached on activity LENDING-WRITE.OFF-BALANCE.MAINTENANCE on action = Update, which will auto create this template. The status of this template will be set as "Write-Off" once its create, however it will be updated to "Closed" once Total Write-off Outstanding amount becomes zero. Below are the proposed fields that needs to be updated for all write-off arrangements.

Field Name	Type	Length	Description	Mandatory / Optional	Validation (if any)
ID	Alpha Numeric	20	Record ID for each write-off arrangement.	Mandatory	Yes
SMB.ARRANGEMENT	Alpha Numeric	12	A local field that will accept valid arrangement reference number for write-off deal.	Mandatory	Yes
SMB.CUSTOMER	N	15	A local field that will auto populate customer number of arrangement reference.	Mandatory	No
SMB.PRODUCT	Text	35	Indicates the Product of the Arrangement contract. Auto fetched from arrangement.	Mandatory	Yes

SMB.CURRENCY	Text	03	Indicates the Currency of the Arrangement contract. Auto fetched from arrangement.	Mandatory	Yes
SMB.WOF.RESAON	Text	35	This field will carry the reason of write-off like "Credit / Deceased / Fraud".	Mandatory	Yes
SMB.WOF.DATE	Numeric	12	Date of write-off of arrangement	Mandatory	Yes
SMB.TOT.WOF.AMT	Numeric	35	Total amount of write-off	Mandatory	Yes
SMB.ACCOUNT	Numeric	15	Write-off arrangement account number	Mandatory	Yes
SMB.WOF.BAL.TYPE.1	Text	35	Multi-value field to capture property each write-off balance type of write-off arrangement.	Mandatory	Yes
SMB.WOF.ORG.AMT.1	Numeric	35	Multi-value field to capture sum of property wise write-off amount.	Mandatory	Yes
SMB.WOF.PMT.1	Numeric	35	Multi-value field to capture post recovery amount against each property.	Mandatory	Yes
SMB.WOF.PMT.DATE.1	Numeric	15	Multi-value field to capture date of post recovery amount against each property.	Mandatory	Yes
SMB.WOF.OST.AMT.1	Numeric	35	Net outstanding amount as per post write-off recovery.	Mandatory	Yes
SMB.WOF.TOT.PMT	Numeric	35	Sum of all property wise post write-off recovered amount.	Mandatory	Yes
SMB.WOF.TOT.OST	Numeric	35	Sum of all property wise write-off outstanding amount.	Mandatory	Yes
SMB.WOF.STATUS	Text	35	Status of write-off template i.e. (Write-Off / Closed). This field will be updated to closed once Total Write-off Outstanding amount becomes zero.	Mandatory	Yes

Account Snapshot		Account Details	Contacts	Collection	Write-off Details
Customer 1000012	Customer Name Mohammad Ali	Write-off date 01/0/2025	Write-off Tot.original.Amount 120,000		
Product Name Ijarah Finance	Write-off Tot.original.Amount 120,000	Currency SAR	Arrangement # AA100147KLA		
Account # 20000001456	Write off BalanceType.1 Principal	Write off Original Amount.1 100.000	Write off Outstanding.1 30.000		
Write off Balance Type.2 Profit	Write off Original Amount.2 20,000	Write off Outstanding.2 20,000			
Recover.BalanceType.1 Principal	Recovery.Amount.1 70,000	Recovery.Date.1 02/Feb/2025			

Post Write-Off Recovery:

A FT.COMMISSION.TYPE will be configured as “WOFREC” which will be define as charge code in AC.CHARGE.REQUEST version.

Further an enquiry will be created that will be fetch write-off arrangements details.

Bulk write-off Mechanism

For bulk write-off upload same version will be used as referred above and defined the same in EB.FILE.UPLOAD.TYPE.

Validation on Contract # at file level is required for duplicate record. For this file must contain file name against each row. This criteria will be define in EB.DUPLICATE.TYPE table for bulk write-off upload.

Below is specimen format for bulk write-off upload file.

FILE_NAME	ARRANGEMENT_REF	EFFECTIVE.DATE	WRITE.OFF
Writeoff_Fileupload_15022024	AA240303GMNH	29-03-2024	YES
Writeoff_Fileupload_15022024	AA24030MNOGH	29-03-2024	YES
Writeoff_Fileupload_15022024	AA24029CF925	29-03-2024	YES

User will prepare data as stated above in CSV (save as CSV UTF-8) file then upload it through EB.FILE.UPLOAD application.

7.16 Bullet Payment and EPC (Early Payoff Charges) WS03-MUR-10-06

If a customer wants to pay rest of the amount in last instalment, then in this case a bullet schedule will be generated. This information will come from LOS. The EPC charge / penalty now needs to be enhanced. Presently it's taking current month profit to Ijarah Income and upcoming 3 months instalment profit in EPC. Now same routine will take current month profit in Murabaha income whereas since there is no EMI instalments therefore upcoming 3 months profit will be taken in EPC charge. Same enhancement will work for quarterly and semi-annually repayment cases.

7.16.1. Proposed Solution

The request for the bullet payment will be sent from the LOS to Transact. After that, Transact will generate the schedule based on the bullet payment method.

A flag needs to be define in SMB.DEAL.DETAILS as BULLET.PAYMENT in order to set payment condition accordingly. The EPC charge/penalty needs to be updated. Currently, the system takes the current month's profit as Ijarah income and the profit from the next three months' installments as EPC. Moving forward, the system will still take the current month's profit as Ijarah income; however, since there will be no EMI installments, the profit for the next three months will be considered as part of the EPC charge.

This enhancement will also apply to cases involving quarterly and semi-annual repayments.

A local radio button i.e. Bullet Loan (Yes), will added in SMB.DEAL.DETAILS and IS.CONTRACT,SMBB.INPUT versions which will carry the record for Bullet Payment Loan.

A routine named as "SMB.EARLY.SETTLEMENT.CHRG" will be enhanced. If the case is EMI then the routine will work in same manner and there wouldn't be any change. However, if the difference b/w last instalment date and next instalment date > one month then this routine will work like below.

System will calculate total number of days = cycle date of after three months - cycle date of current month. For example, if cycle date is 28 of each month and current system date is 15 Jan 2025 then.

1. Calculation: - when there is no Instalment Due in next 90 /91 days.
 - Today = 25 Jan 2025
 - Total number of days = 28-Apr-2025- 28-Jan-25= 90 days
 - $\text{CURACCOUNT} * \text{PROFITRATE} * \text{Total No. Of days} / 365 = \text{ECP Amount}$
2. Calculation: - when there is an Instalment Due in next 90 /91 days.
 - Today = 25 Jan 2025
 - Let's assume the case is of 3 months instalment. Last installment date was 28 Nov. 2024 and next instalment date is 28 February 2025
 - Current total number of days = (28 Feb 2025)- (28 Jan 25)
 - $\text{CURACCOUNT} * \text{PROFITRATE} * \text{Current Total No. Of days} / 365 = \text{Current ECP Amount}$
 - Future total number of days= (28 March 2025) – (28 feb 2025)
 - $\text{FCURACCOUNT} * \text{PROFITRATE} * \text{Future Total No. of days} / 365 = \text{Future ECP Amount}$

Total EPC Amount = Current EPC Amount + Future EPC Amount

7.17 File Upload of Repayments through IBFT – WS03-MUR-05-06

For all those customers' that will manually transfer payment through IBFT, a file upload process will be used to execute the payment in transact. This will enable to settlement accounts to get funds and to process loan bills. Below is the agreed file format.

ACCOUNT_NO	CIF_ID	TRAN_DT	AMOUNT	CONTRACT_NO	reference for transaction	RECEIVEDFROM	Type
Fransi bank	158170	Aug-24-31	1600.00	TWQ0081815		Primary Applicant	Direct Bank Transfer Payment
SNB bank	158170	Sep-24-1	1601.00	TWQ0081816		Insurance Payment for Total Loss	SADAD
Alinma bank	158170	Sep-24-2	1602.00	TWQ0081817		Cancelled Contract Payment	Credit Card (POS)
GIB bank	158170	Sep-24-3	1603.00	TWQ0081818		Payment from NPL Customers	Debit Card (POS)
AlBilad bank	158170	Sep-24-4	1604.00	TWQ0081819		Early Loan Settlement Payment	Credit Note Payment
Saud british bank	158170	Sep-24-5	1605.00	TWQ0081820		Court Payment	Direct Cheque Payment
ANB bank	158170	Sep-24-6	1606.00	TWQ0081821		Third Parties Payment without Template	Auction
SAB bank	158170	Sep-24-7	1607.00	TWQ0081822		Third Parties Payment with Template	
Alrajhi bank	158170	Sep-24-8	1608.00	TWQ0081823		Insurance (Compensation)

Aljazira bank	158170	Sep-24-10	1610.00	TWQ0081825			

7.17.1 Worksheet details:

File name =Murabaha Working Sheet

Sheet name = DayN-File Upload

7.17.2. Proposed Solution

For bulk payments upload a new FT version will be created and defined the same in EB.FILE.UPLOAD.TYPE. The proposed FT version will contain the below fields;

ID Name	Type	Length	Description	Mandatory / Optional	Validation (if any)
SMB.FILE.NAME	AN	35	A local field that will accept file name to be upload. File name to be maintained as "Payment_Fileupload_DDMMYY".	Mandatory	No
SMB.ACCOUNT.NO	AN	35	A local field that will accept internal account number of respective bank account.	Mandatory	No
SMB.CIF	N	06	A local field that will accept valid CIF record.	Mandatory	No
SMB.TRAN.DATE	N	10	A local field that will auto populate transaction date as system date.	Mandatory	No
SMB.VALUE.DATE	N	10	A local field that will accept value date.	Mandatory	No

SMB.AMOUNT	N	15	A local field that will accept transaction amount.	Mandatory	No
SMB.PAYMENT.MODE	T	10	A local field that will accept payment mode such as "STINS, DD, BT, BD, SADAD, CH".	Mandatory	No
SMB.DEPOSIT.AC.NO	AN	35	A local field that will accept internal account number of respective bank account.	Mandatory	No
SMB.INSTRUMENT.NO	N	20	A local field that will accept instrument reference number.	Optional	No
SMB.IBAN.NO	AN	20	A local field that will accept IBAN number.	Optional	No
SMB.FUND.SOURCE	T	35	A local field that will accept details about source of funds e.g. Salary, Bonus, Other.	Mandatory	No
SMB.REF.NO	AN	1000	A free text field that will accept bank reference details either in English or Arabic	Mandatory	No
SMB.COMPANY.ID	AN	12	A local field that will accept valid company ID, by default it is set as head office.	Mandatory	No
SMB.CONTRACT.NO	AN	12	A local field that will accept valid arrangement ID.	Mandatory	No
SMB.REPAY.AC	AN	12	A local field that will be auto populated based on SMB.CONTRACT.NO.	Mandatory	Yes
SMB.BANK.ID	N	04	A local field that will accept bank ID.	Mandatory	No
SMB.BRANCH.ID	AN	10	A local field that will accept branch ID.	Mandatory	No

Value date field is required for bulk payment upload.

For outward funds must have value date as processing date.

Separate TRANSACTION CODE will be used for each upload type.

Validation on Contract # at file level is required for duplicate record. For this file must contain file name against each row. This criteria will be define in EB.DUPLICATE.TYPE table for bulk payment upload.

Below is specimen format for bulk payment upload file. Excel format is attached as item 6 in Reference Document section of this FSD.

FILE_NAME	ACCOUNT_NO	CIF_ID	TRAN_DT	VALUE_DT	AMOUNT	PAYMENT MODE	DEPOSIT_ACC_NO	SOURCE_OF_FUNDS	NARR_NO	COMPANYID	CONTRACT_NO	BANK_ID	BRANCH_ID
Payment_Fileupload_291024	2000004367	200090	29-10-2024	29-10-2024	1500.00	DDM	2000004367	SALARY	Installment payment for the month of Oct. 2024	SA0021001	2000005347	RIBL	603
Payment_Fileupload_291024	2000004367	100150	29-10-2024	29-10-2024	2500.00	ST	2000004367	SALARY	Installment payment for the month of Oct. 2024	SA0021001	2000004971	RIBL	603
Payment_Fileupload_291024	2000004367	200239	29-10-2024	29-10-2024	3000.00	DDM	2000004367	SALARY	Installment payment for the month of Oct. 2024	SA0021001	2000005412	RIBL	603

User will prepare data as stated above in CSV file then upload it through EB.FILE.UPLOAD application.

For Outward Payment upload:

At the time of Bulk processing a validation routine will be setup which will be update the value date as system date for outward payment upload.

7.18 Multiple Simulations for Daily Contract Generation (WS03-TAW-05-09)

- In order generate synch APR on contract and loan account, it was agreed that TA will be generating contract on daily basis till the expiry of offer.
- There is no impact on offer generation, offer will contain maximum APR.
- There is no change in first instalment date calculation, which is based on offer expiry date.

7.18.1 Proposed Solution

Upon the acceptance of offer by customer, a template SMB.OFFER.DETAILS referred in Section 7.1.1 of this document will be created having Simulation Arrangement ID created for offer.

By using this offer simulated arrangement two new simulations will be created (parameterized on IS.PARAMETER>GRACE.PERIOD which is used to calculate offer expiry date). these two new simulations will start from first working day after offer acceptance having expiry of one day each. These simulations will utilize the same finance amount, profit amount, first & last installment date in order to keep the financials intact as stated at the time of offer.

7.19 Maker and checker in deferment process is required (WS03-TAW-09-01)

Macker and checker in deferment process is required as mentioned in section 5.6.2

7.19.1 Proposed Solution

It is a configuration of version and will be provided.

7.20 Bulk Deferment (WS03-TAW-09-02)

Bulk deferment is required through file upload.

7.20.1 Proposed Solution

For bulk deferment upload a new version for LENDING-UPDATE-PAYMENT.HOLIDAY activity will be created and defined the same in EB.FILE.UPLOAD.TYPE. The proposed version will contain the below fields;

ID Name	Type	Length	Description	Mandatory / Optional	Validation (if any)
SMB.FILE.NAME	Alpha Numeric	35	A local field that will accept file name to be upload. File name to be maintained as	Mandatory	No

			"Payment_Holiday_File upload_DDMMYY".		
SMB.ARRANGEMENT	Alpha Numeric	12	A local field that will accept valid arrangement reference number for payment holiday.	Mandatory	Yes
SMB.ACTIVITY	Text	35	A local field with a default activity of "LENDING-UPDATE-PAYMENT.HOLIDAY"	Mandatory	No
SMB.CUSTOMER	N	15	A local field that will auto populate customer number of arrangement reference.	Mandatory	No
SMB.CUSTOMER.ROLE	Text	15	Associated with CUSTOMER field. Denotes the role of the customer in the Arrangement. Auto fetched from arrangement.	Mandatory	Yes
SMB.PRODUCT	Text	35	Indicates the Product of the Arrangement contract. Auto fetched from arrangement.	Mandatory	Yes
SMB.CURRENCY	Text	03	Indicates the Currency of the Arrangement contract. Auto fetched from arrangement.	Mandatory	Yes
SMB.INITIATION.TYPE	Text	15	This field denotes the type of initiation for the current activity that is whether the activity was triggered by the user or by external transaction or it could be scheduled or secondary activity. By default, it would be set as "User".	Mandatory	No

SMB.ACTIVITY.CLASS	Text	35	This is a no input field and denotes the activity class id for the given activity.	Mandatory	Yes
--------------------	------	----	--	-----------	-----

Further an associated version i.e. SMB.AA.ARR.PAYMENT.HOLIDAY,AA will be attached with this version which will be created by replicating version AA.ARR.PAYMENT.HOLIDAY,AA.

Validation on Contract # at file level is required for duplicate record. For this file must contain file name against each row. This criteria will be define in EB.DUPLICATE.TYPE table for bulk payment upload.

Below is specimen format for bulk payment holiday upload file. Excel format is attached as item 7 in Reference Document section of this FSD.

FILE_NAME	ARRANGEMENT_REF	CIF_ID	PAYMENT_DT	BILL_TYPE	NUMBER	RECALCULATION	COMPANYID
Payment_Holiday_Fileupload_1502202	AA240303GMNH	200006	28-02-2024	INSTALLMENT	1	TERM	SA0021001
Payment_Holiday_Fileupload_1502202	AA24030MNOGH	200006	28-02-2024	INSTALLMENT	1	TERM	SA0021001
Payment_Holiday_Fileupload_1502202	AA24029CF925	200012	28-02-2024	INSTALLMENT	1	TERM	SA0021001

User will prepare data as stated above in CSV (save as CSV UTF-8) file then upload it through EB.FILE.UPLOAD application.
