DOCUMENT TYPE & POSTING KEY

Classification	Payroll JVs
Prepared By	Mohammad Dalqamoni
Reviewed By	Audit team
Approved By	Mahmoud Elkhawanky

Version No.	Description	Reason for change
V1	Original ver.	
V2	1st update	Update payroll entry type to use JV document type for manual entries

Document type:

The document type is a key that used to classify accounting documents and distinguish between business transactions to be posted. The document type is entered in the document header and applies to the whole document.

The document type has the following purposes:

1. Differentiating between business transactions. Since the document type is shown for every line item, you can always tell what type of business transaction is involved. You can also use the document type for evaluation purposes.
2. Controlling the posting to account types (vendor, customer, or G/L accounts). The document type determines which account types that particular document can be posted to.
3. Assigning document numbers. A number range is assigned to every document type. The original documents from one number range should be stored together.
4. Document Type plays major role. This controls the account types that are allowed in a document and number ranges for the document.

Document Types in the Standard System:

The most important document types in the standard system are shown below by category:

Category	Document Type	Description	T-Code	Doc Range #
GL Documents - Manual JVs	JV	G/L Account Document-JV	F-02 - FB50	13
	SA	G/L Account Document	F-02 - FB50	13

Posting Key:

Posting Key is a two-digit numeric key.

It is defined to control the entry of document line items in a FI Transaction.

Posting Key specifies the line item is either debit or credit entry, account type and the screen layout of line items.

Special posting keys are used for posting special General ledger transactions.

The system uses the posting key, special G/L indicator to determine the alternative settlement account.

The posting key determines -

- Account type
- Debit/credit posting
- Layout of entry screens

Different Account Types in SAP FI –

- A --> Assets
- D --> Customers
- K --> Vendors
- M --> Materials
- S --> General Ledger Account

Below are the list of standard posting keys: -

The **Green color** most Posting Key used in the manual entry.

Account Type with Usage	Posting Key	Description of Posting Key
Customer Debit	1	Invoice
	2	Reverse credit memo
	3	Expenses
	4	Other receivables
	5	Outgoing payment
	6	Payment difference
	7	Other clearing
	8	Payment clearing
	0A	CH Bill.doc. Deb
	0B	CH Cancel.Cred.memoD
	0C	CH Clearing Deb
	0X	CH Clearing Cred
	0Y	CH Credit memo Cred
	0Z	CH Cancel.BillDocDeb
Customer Special GL Debit	9	Special G/L debit
Customer Credit	11	Credit memo
	12	Reverse invoice
	13	Reverse charges
	14	Other payables
	15	Incoming payment
	16	Payment difference
	17	Other clearing
	18	Payment clearing
	1A	CH Cancel.Bill.docDe
	1B	CH Credit memo Deb
	1C	CH Credit memo Deb
	1X	CH Clearing Cred
	1Y	CH Cancel.Cr.memo C
	1Z	CH Bill.doc. Cred
Customer Special GL Credit	19	Special G/L credit
Vendor Debit	21	Credit memo
	22	Reverse invoice
	24	Other receivables
	25	Outgoing payment

	93	Price difference
	94	Consumption
	95	Change in stock
	96	GR/IR credit
Material Credit	99	Stock outwd movement
Material Debit	89	Stock inwrd movement

Caution

- Make sure that the document type and the posting key match each other.
- Whilst the document type defines which account types can be posted to, the posting key defines an account type that you must post to.
