1. Scope of the Document

The scope of this document is to provide user with end-to-end functionality of Tawarruq product in Transact along with deltas noted during onsite BPR session. This document has two main sections. Section-5 is existing functionalities that explains end to end journey of LMS with respect to subject product. The other Section-6 explains the deltas. Each existing functionality has a reference number that has prefix as WS03, for instance WS03-PRODUCT CODE-PROCESS NO. (WS03-TAW-01). Whereas on delta if any gap has been highlighted for the specific existing functionality, then it will be marked as WS03-PRODUCT CODE-PROCESS NO. SEQUENCE (WS03-TAW-01-01).

The pre-requisite of this document is to review agreed end-to-end process flow from LOS to LMS. This document also refers some working sheets that were finalized during onsite BPR session. Under each existing functionality or Delta there is a separate heading named as "Worksheet details" which will cite the reference document / sheet name.

2. Navigation Tips

This button refers to 'Validate' a record on T24. It is placed on top of the screen while input of any transaction on T24. After filling out all mandatory and necessary information, user can press this button to check for core errors or any missing component on the record.

This button refers to 'Commit' a record on T24. This button is pressed to make the record part of T24.

This button is used to 'Delete' the record. (Only unauthorized records can be deleted from the system)

This button is used to 'Authorize' the record. Only upon Authorization marking the record is made the part of LIVE file.

This Button is used to put the record on 'Hold'.

3. Glossary

Abbreviations	Description
CBS	Core Banking System
BRD	Business Requirement Document
BPR	Business Process Review

FSD	Functional Specification Document/Solution Document

4. Agreed LMS Process Functionalities

- A. LO will send list of fields to LM to get simulated schedule from LM, which will be used for Qarrar and offer letter generation.
- B. Post offer acceptance, LO will push complete list of fields related to customer and purchase of commodity will be booked at LM on response of create order from FAJR - Commodity Vendor. For CIF related information please refer to Customer's documents.
- C. Contract will be generated, and customer will accept this contract- If not, then rejection- Section 6.6
- D. Nafith to be called and customer will accept it. If not, then rejection – Section 6.6
- E. Unifonic response to be captured. If not, then rejection- Section 6.6
- F. On successful Unifonic, straight through process will process where all post commodity purchases GL entries will be raised- Section 5.3
- G. Disbursement to customer's bank account is a manual process through IBFT and is out of the scope of this document.

5. Existing Functionalities

5.1 Islamic Parameterization

5.1.1. IS.PARAMETER (WS03-TAW-00)

IS.PARAMETER is the parameter table to define the Islamic Banking product related features.

SMB payment date is used to generate bill cycle dates on monthly basis. If it is set as 28, then every month on 28 system will generate a bill of instalment.

SMB prior days is used to generate SADDAD bill prior to SMB payment date. So, in this case on 21st SOD of each month, system will generate a SADDAD bill.

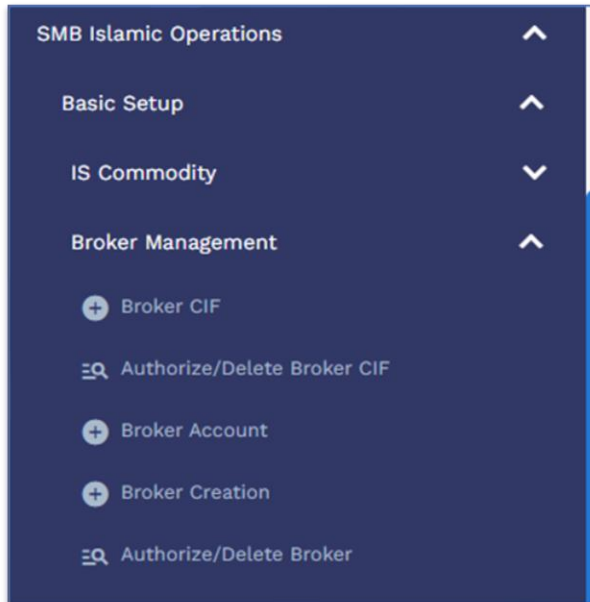

5.1.2. Creation of Buy Broker (WS03-TAW-01)

The **Broker creation process** involves setting up a broker in the system before initiating the Tawarruq process. This step is crucial for ensuring that all Broker-related information is correctly captured, validated, and available for future transactions.

Here is a breakdown of the typical steps involved in creating a broker before the process initiation.

Booking Date	Description	Value Date	Debit	Credit	Balance
20 JAN 2024	Asset Purchase	20 JAN 2024	300,000.00		25,370,000.00
20 JAN 2024	Transfer Out	20 JAN 2024	500,000.00		24,870,000.00
20 JAN 2024	Asset Purchase	20 JAN 2024	100,000.00		24,770,000.00
20 JAN 2024	Broker Settlement	20 JAN 2024	300,000.00		24,470,000.00
20 JAN 2024	Asset Purchase	20 JAN 2024	300,000.00		24,170,000.00
20 JAN 2024	Broker Settlement	20 JAN 2024	300,000.00		23,870,000.00
20 JAN 2024	Asset Purchase	20 JAN 2024	300,000.00		23,570,000.00
20 JAN 2024	Broker Settlement	20 JAN 2024	300,000.00		23,270,000.00
20 JAN 2024	Asset Purchase	20 JAN 2024	300,000.00		22,970,000.00
20 JAN 2024	Broker Settlement	20 JAN 2024	300,000.00		22,670,000.00
20 JAN 2024	Asset Purchase	20 JAN 2024	300,000.00		22,370,000.00
20 JAN 2024	Broker Settlement	20 JAN 2024	300,000.00		22,070,000.00

If the user intends to create a Buy broker, they must first generate a Broker CIF and a Broker Account before proceeding with the Broker Creation process.

5.2 Simulated Arrangement (WS03-TAW-04)

For offer letter, which is being generated through LOS, Transact provides an API of simulated schedule for which below information is required from LOS. To generate a simulated setup, a mock service through POSTMAN application is utilized. To create the simulation reference, users need to input details according to the table attached below:

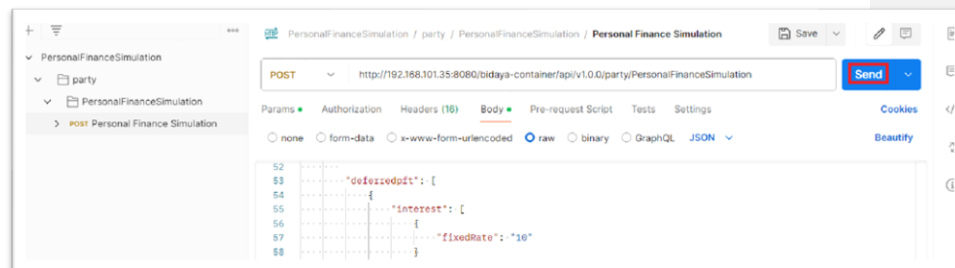

FIELDS	INPUT	Definition
customerId	"100150"	CIF ID (a dummy CIF which will be used for all cases)
customerRole	"OWNER"	Role of Customer
productid	"SMB.PERSONAL.FINANCE"	Technical Product name of Transact
currencyId	"SAR"	Currency in which Financing will be provided. Product Currency
effectiveDate	"20240129"	Financing Effective date
activityId	"LENDING-NEW-ARRANGEMENT"	Technical name of AA Activity
Customer	"100150"	CIF
customerRole	"OWNER"	Role of customer
*****_	"NO"	Repayment Settlement instructions
payoutSettlement	"NO"	Funds out settlement instructions
Amount	"100000"	Financing Amount
Term	"12M"	Term of Financing based on which maturity date will be calculated.
fixedAmount	"0" (FOR UPFRONT ADMIN FEE)	Admin Fee check
	"1" (FOR EMI ADMIN FEE)	
fixedRate	"10"	interest rate

Since this process will be fully automated, however, just to give better idea, above information will be used for calculation. To ensure accuracy, please refer to the attached screenshot (SS) for guidance.

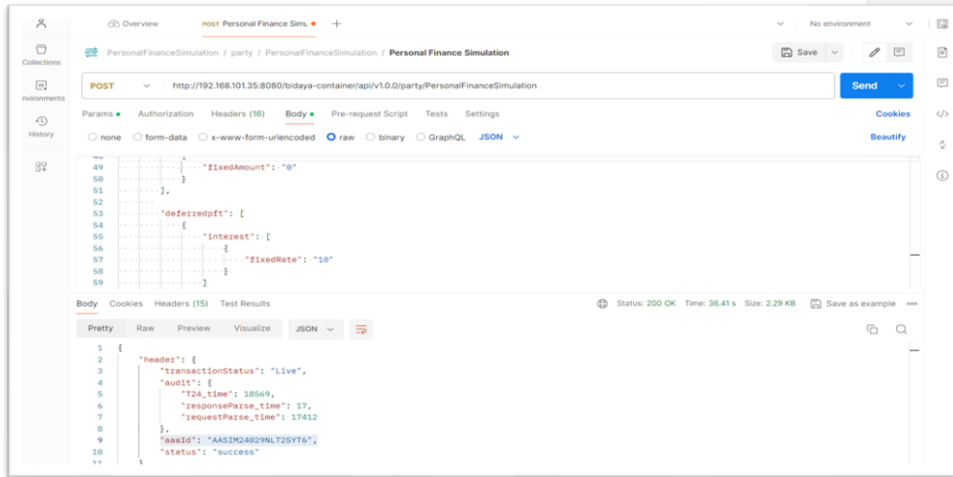

Once the necessary details have been provided, the user will proceed to click on the "Send" button.

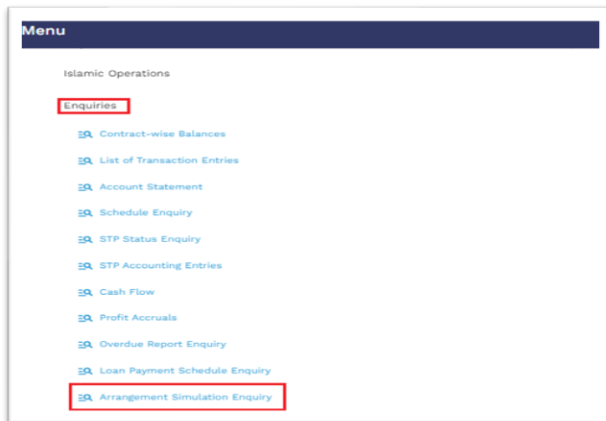

Following that action, the "aaaid" will be generated, as depicted in the screenshot below:

Simulation is used by FI when preparing offers for customers. This process is carried out through Infinity and the “Application ID” is generated”.

The user will use the “Application ID” for Simulation Overview as per below navigation:

Menu → Enquiry → Arrangement Simulation Enquiry

The user will input the simulation reference and then click on the Find icon.

Results 1 - 11 of 13

5.2.1. Worksheet details:

File name: Tawarruq Working Sheet

Sheet name: Day4 - IRR & Flat Rate

The sheet contains calculation of schedule and APR rate. Please note the current setup is based on receiving the Interest rate as IRR and then creates schedule however, based on the need system can also calculate instalment amount based on Flat rate where the Instalment amount is different from previous one.

Moreover, this sheet contains two different schedule, one that is generated at the time of offer letter and other at the time of contract creation (at disbursement). Since there is a time leg between offer letter and contract creation (at disbursement) therefore, the simulated schedule (offer letter) is being generated with the assumption that customer will accept this offer at last day of expiry, as a result of this a maximum APR is communicated to customer on finance agreement whereas system stores both the APR on same contract. A comparison of all factors is given in this excel for better understanding.

5.3 Straight Through Process (STP) (WS03-TAW-05)

Once the customer accepts the offer letter actual CIF is created in Transact. This is the process where all GLs are generated like buying and selling of commodities (through API), loan account creation, loan schedule creation, any fee and VAT etc. these entries are generated based on FI needs and product setup sheet and agreed accounting entries. Once this process is completed then Transact is ready to send money to customer's bank account through any integration or manual IBFT.

To begin setting up STP, the POSTMAN application is used for Eiger reference and IS.CONTRACT creation. IS.CONTRACT is a table where all asset information along with other details are stored. This document uses mock screen to give a better idea how the system works. In an actual scenario, it will be fully integrated.

After the Postman is executed, the status of STP progresses through several steps which is fully automated

Step 1: Contract is created successfully

A formal agreement (contract) is established, marking the start of the transaction process.

Step 2: The repayment/disbursement account is generated

A repayment/disbursement account is set up to track payments and disbursement from single customer account- contract wise FI can see this account's statement to reconcile all Cash in and out for this specific contract.

Step 3: The purchase is confirmed

The details of the purchase are confirmed, ensuring the transaction is ready to proceed.

Step 4: Parent limit is created

Since it is in best practice to attach limit record with loan account to avoid any unauthorized overdraft override in system, therefore a limit records parent and child are created which will later attached with loan account.

A parent limit is set, which defines the total amount available to be spent or borrowed under the terms of the contract.

Step 5: Child limit is created

A child limit is set as a sub-limit under the parent limit, typically allocated for a specific purpose or entity.

Step 6: AA finance arrangement is created

The AA finance arrangement is created as part of the financial structure of the agreement, such as a loan or repayment plan.

Step 7: commodity transfer is completed

The transfer of funds or assets is completed between accounts or entities as part of the STP process.

Step 8: Sale request is initiated

A sale request is generated to trigger the execution of the sale or financial transaction.

Step 9: Sale request is confirmed

The sale request is confirmed, informing that it has been processed and is ready for finalization.

Step 10: Finally, the STP process is completed

Once the STP process is successfully executed, system updates the status as completed.

The flowing below (SS) shows the process through the STP enquiry,

Commodity Reference

To generate commodity Registration ID, for a mock screen, user must input details as per the attached table below:

Eiger Registration ID	Data	Mandatory (Y/O)
Commodity	PA (Platinum)	O
Customer	Mohamed	M
customer2	Abdullhaleem	O
MaturityDate	13-Feb-24	M
ProductCode	FN1 (commodity vendor product code)	O
PurchasePrice	100000	O
SettlementDate	13-Feb-24	M

To ensure accuracy, please refer to the attached screenshot (SS) for guidance.

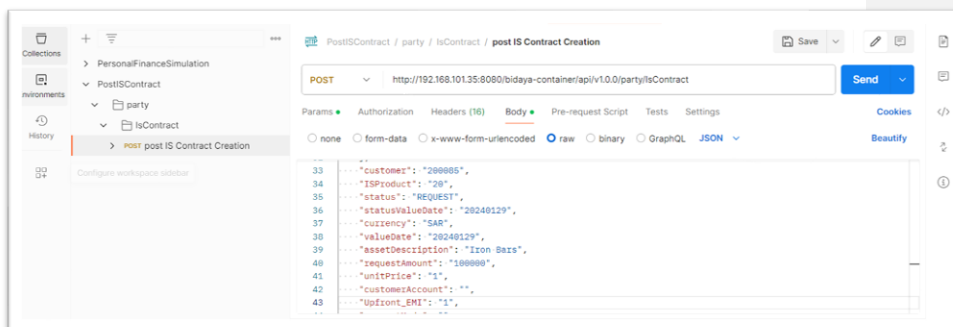

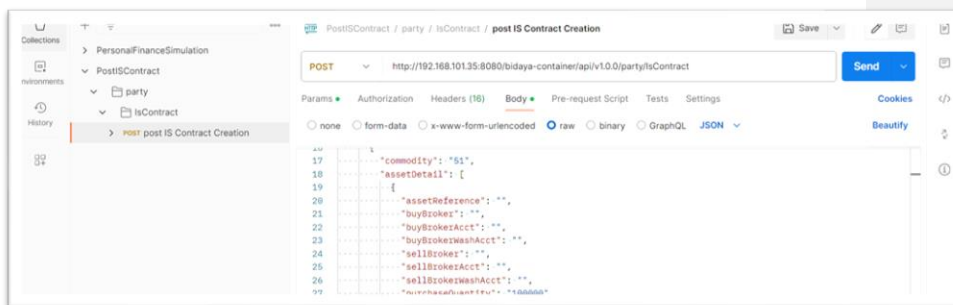

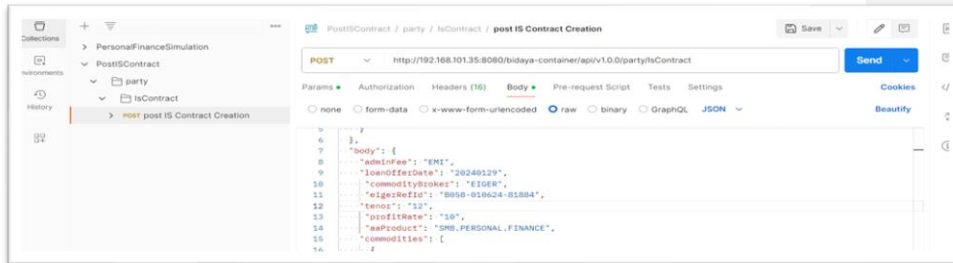

Once the reference ID is generated as mentioned above, it needs to be mentioned while creating the IS.CONTRACT.

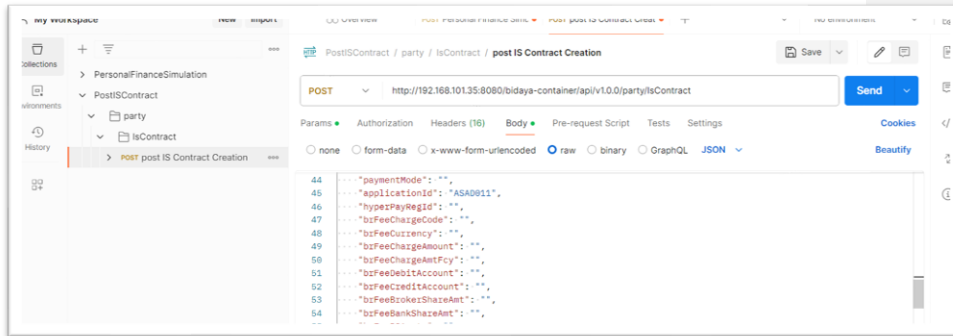

5.4 IS Contract reference. (WS03-TAW-06)

To generate the IS.CONTRACT reference, users must input details as outlined in the attached table below:

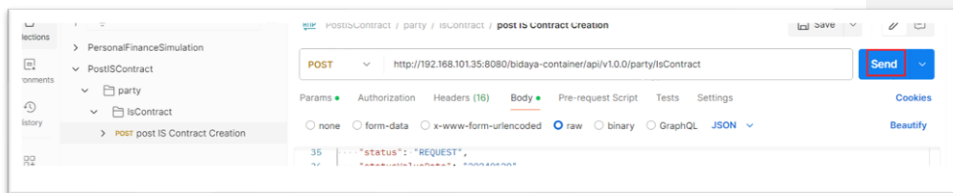

IS.CONTRACT Sample Data - Only highlighted fields need to be input.			
Transcript	Data	Description	Mandatory (Y/O)
CUSTOMER	200043	CIF ID	Y
Status Value	20240129	TODAY'S DATE	O
Currency	SAR	CURRENCY	O
Value Date	20240129	TODAY'S DATE	O
GB assetDescription	Platinum	Description	O
Request Amount	100000	Loan Amount	Y
Commodity.1	51	Commodity Type - Iron, Platinum	O
unitPrice.1.1	1	Per Unit Price	Y
purchaseQuantity.1.1	100000	Purchase Quantity -	Y
adminFee	Upfront/EMI	Admin Fee calculation Flag	Y
Upfront_EMI	"0" (FOR UPFRONT ADMIN FEE)	Admin Fee	Y
	"1" (FOR EMI ADMIN FEE)		
PaymentMode	Hyperpay	Payment Mode	Optional/Dependent
applicationId	LOS0099000	Application Id	Unique
hyperPayRegId	8ac7a4a28ea71296018ea88320b76687	HyperPay reg. id when Payment mode selected as Hyperpay	Optional/Dependent
loanOfferDate	20240129	Offer Acceptance Date	Y
commodityRefId	B058-230524-00451	commodity Ref. Id	Y
tenor	12	Tenor of loan	Y
profitRate	10	Profit Rate	Y
AA Product	SMB.PERSONAL.FINANCE	AA Product Name	O
Commodity Broker	EIGER	Commodity Broker Name	O

To ensure accuracy, please refer to the attached screenshot (SS) for guidance.

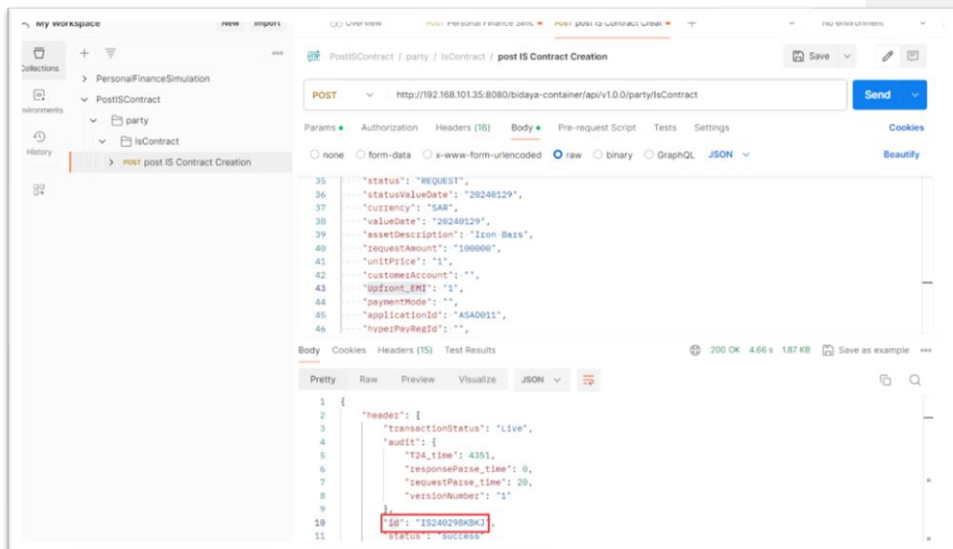

Once the necessary details have been provided, the user will proceed to click on the "Send" button.

Following that action, the "id" will be generated, as depicted in the screenshot below:

Below is the IS.CONTRACT, that will be generated once this STP process is completed.

6.1.1.1 Worksheet details:

- File name: Tawarruq Working Sheet
- Sheet name: Day4-Cooling Period Cancellation and DayN - Proposed Acc Entries (row 130 – row 147)

6.1.2 Deferment of Instalments (WS03-TAW-09)

For installment deferment/ skip, customer will follow the following navigation:

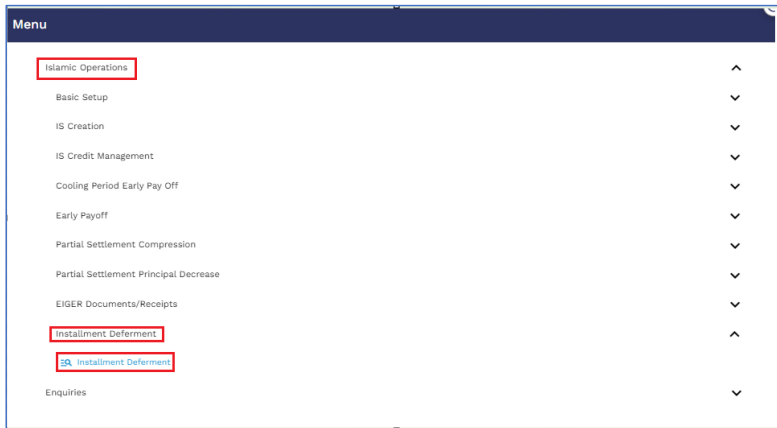

Menu Islamic Operations → Installment Deferment → Installment Deferment

Commented [AH1]: Option For bulk deferment Missing

Commented [KU2R1]: Gap has been added. 7.17

Commented [AH3]: Need the process for maker and approver how it will be for deferment.

Commented [KU4R3]: Section 7.16 update

User will put the application IDs and click on the find icon

Commented [AH5]: Need the search option with CIF or contract no (Loan no)

Commented [KU6R5]: Loan account and arrangement reference can also be used. But not CIF

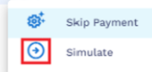

Commented [AH7R5]: Require CIF and ID NO

Commented [FUK8R5]: This enquiry will open the loan schedule therefore it can only be extracted from LOS Application ID, IS Contract and Arrangement ID.

For illustration the upcoming installment on 28 Feb 2024 is going to defer which means there is an increase in tenor by 1 month of the arrangement.

The user will click on the icon located on the right side, which pertains to installments, and then proceed to click on "Simulate."

Next, validate the activity by using the icon specified in the screenshot below.

The user will select the "Payment Holiday" tab as indicated in the screenshot below.

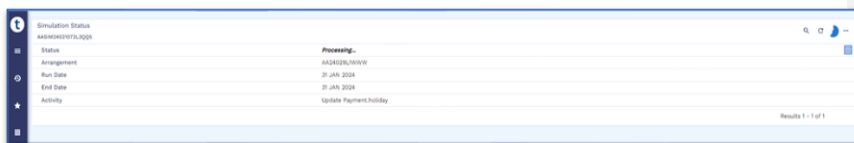

The user will input "1" in the installment field and select "Residual" for recalculation, where system will skip the instalment and add the same in last instalment.

Below are some other options that can be used for payment holidays with below functionalities.

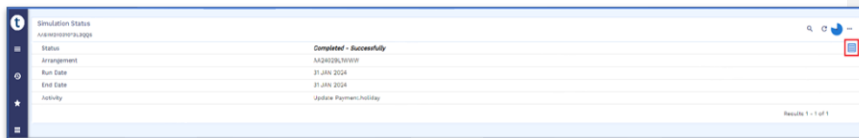

- Payment – the payment amount will be changed.
- Term – the term of the arrangement will be altered.
- Residual – the residual amount will be changed.

Following that, the simulation process will commence.

Simulation Status	
Arrangement	A424026/NEW
Status	Processing
Run Date	31 JAN 2024
End Date	31 JAN 2024
Activity	Update Payment Holiday

Once the simulation is completed, the user will click on the overview icon as indicated in the screenshot below.

Simulation Status	
Arrangement	A424026/NEW
Status	Completed - Successfully
Run Date	31 JAN 2024
End Date	31 JAN 2024
Activity	Update Payment Holiday

In the overview, the user can verify that the deferred installment dated February 28, 2024, displays a zero amount, as shown in the screenshot below.

The simulation will begin processing.

After a few minutes, the execution will be completed, as depicted in the screenshot below.

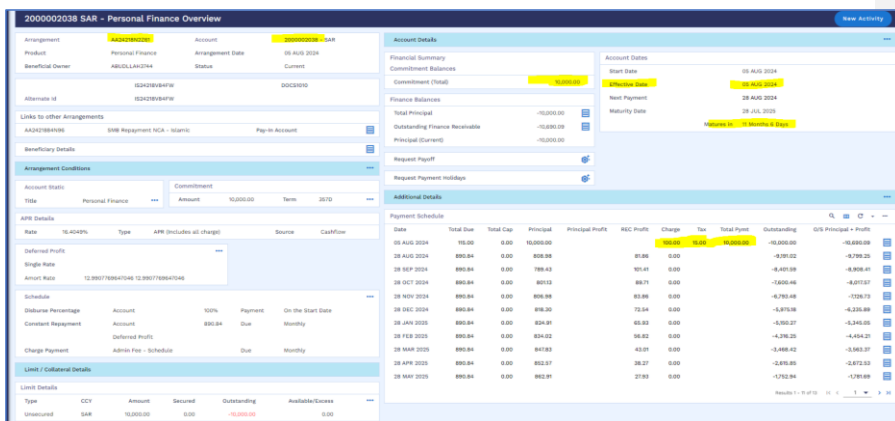

Worksheet details:

- File name: Tawarruq Working Sheet
- Sheet name: Day4 – Deferment

6.1.3 Early Pay off (WS03-TAW-010)

Post cooling period, if customer comes to any FI for early settlement, then Transact provides an option to exercise Payoff functionality. This can be executed from 360 overview of arrangement as mentioned below. A payoff statement is generated that contains all the financial information like, income receivable, principal receivable, any overdue item and fee etc. All such information is part of product setup sheet which is used as client/regulatory specific product requirements.

6.1.3.1 ROSOM ~~SADDAD~~ bill generation and upload rules.

This rule has been developed in order to manage both monthly instalment invoice and early settlement invoice that can be requested at any time.

If the payoff invoice is issued between 29th of the current month till 27th SOD of the following month (considering 28th is cycle date of product) then expiry of the same invoice will be 27th EOD of the following month this is because monthly invoice can be generated on 27th EOD. The early settlement charge will be 3 months starting from the next month.

If the invoice is generated on 28th there is no extra accrual and only 3 months early settlement charge starting from the next month will be collected expiry of this invoice will be 28th EOD.

6.1.4 Transfer of Funds

Once customer will credit his/her amount and funds are transferred to customer's repayment account which is maintained by Transact, then an automated process will be run to settle customer's loan account and balances. Below is the manual process of the same. There is another process of bulk file upload of FT, for which a format has been designed. Please see sheet name as "DayN-File Upload" in excel file.

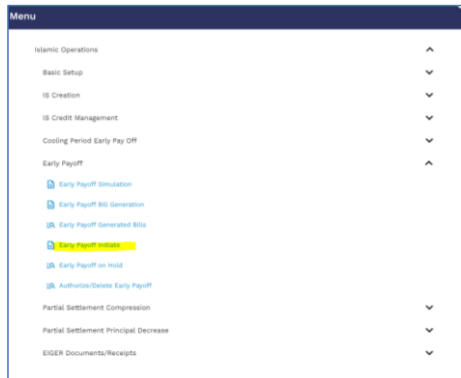

Once the required amount is credited to customer's account a service will executed to settle loan account. Below is manual process as well.

User will initiate cancellation by using following navigation

Menu → Islamic Operation → Early Pay Off → Early Payoff Bill Initiate

Commented [AH9]: Instead of Sadad it is ROSOM

Commented [KU10R9]: Okay

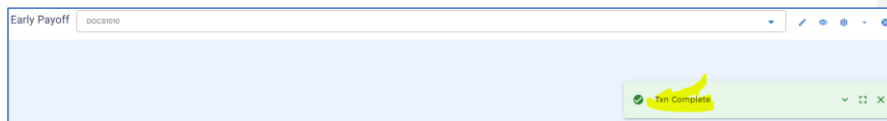

User will put the application ID and icon on the edit icon

Then user will mention bill reference no, then validate and commit the record

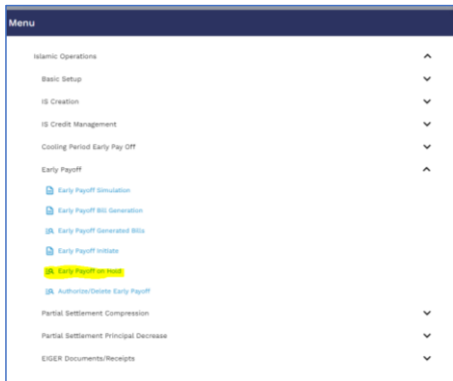

Process has been initiated.

User will check the transaction on Hold stage by using below navigation

Menu → Islamic Operation → Early Pay Off → Early Payoff on Hold

User enter the application ID and click on the find icon

The screenshot shows a search form for 'SMB.E.HLD.EARLY.PAYOFF.ACPO'. It has fields for 'Application ID', 'CREDIT ACCOUNT NO', and 'NO.SORT.OPTION'. The 'Application ID' field is highlighted in yellow. There is a 'Find' button with a magnifying glass icon.

Then user will click on the view icon

6.1.5 Write off (WS03-TAW-11)

User can write of the arrangement by following the below steps:

User will open the arrangement overview and click on the “New Activity”

The screenshot displays the '2000002723 SAR - Personal Finance Overview' interface. It includes sections for Account Details, Financial Summary, and Account Dates. A 'New Activity' button is highlighted in the top right corner.

Commented [AH11]: Option of bulk write off required. Already discussed with SA team earlier

Commented [KU12R11]: No bulk write-off discussion was conducted with me. Not recommended as well

Commented [AH13R11]: Not Valid

Commented [FUK14R11]: Note bulk write off option will be provided and incorporate in Ijarah FSD section 8.32.

User will go to the “Write off Arrangement” and click on “do activity today”

The screenshot displays the 'Write off Arrangement' interface. It shows a list of activities on the left and a 'do activity today' button in the bottom right corner.

User will click on the balance maintenance tab

And then click to validate and commit the record.

record has been committed.

Authorizer can authorize the write off activity from the arrangement overview and click on the menu icon to authorize the activity.

Commit the record to authorize the activity

Authorization is completed

Commented [AH15]: What will be the status of the loan as we want the loan to be open so that if the payment receive it will be update in repayment schedule.

Commented [KU16R15]: This is existing process and not a gap. GAP of write off is noted in Ijarah FSD and same will be answered there

Commented [AH17R15]: It should be part of Tawaruq FSD as well and status should be open and write off

Commented [FUK18R15]: Please refer section 8.32 of Ijarah FSD. Status of arrangement would be closed once write-off is executed as core functionality and post write-off recovery will managed through mechanism as stated in referred section.

User may check the accounting entries from enquiry section.

Accounting entries

6.1.6 Partial Settlement (WS03-TAW-12)

Partial Settlement can be done in two ways

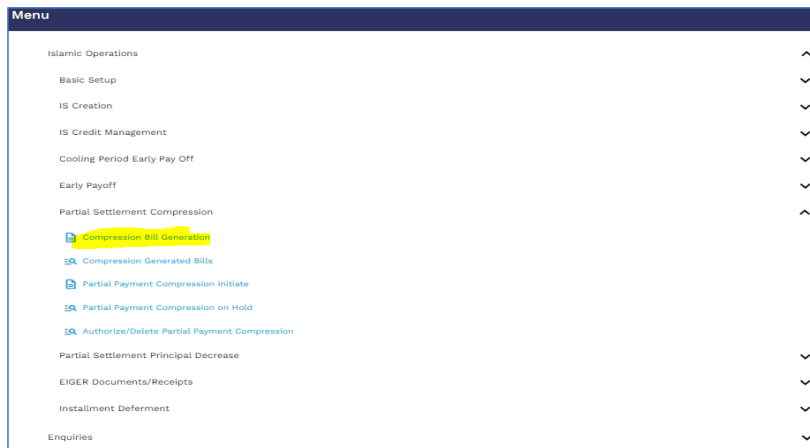

- AA - Compression payment
- AA Principal Decrease

6.1.6.1 AA - Compression payment

In AA – Compression payment customer can settle minimum 2 and 5 maximum instalments. It is on customer's preference either the customer opt to reduce the instalment or reduce the tenor.

User will follow below navigation for Partial settlement

Menu → Islamic Operation → Partial Settlement Compression → Compression Bill Generation

User will click on the edit icon

AAPaymentPayoff

Then mention Loan App id, Settlement Type, No. of instalments, source of income, Recalculation Method and Repayment type.

Please note that if the customer wants to reduce the Tenor then the Recalculation Method as **“Term”** should be selected, and the customer wants to reduce the instalment amount then the Recalculation Method as **“Instalment”** should be selected.

After that the user will validate the activity through validation icon.

6.1.6.1.1 Worksheet details:

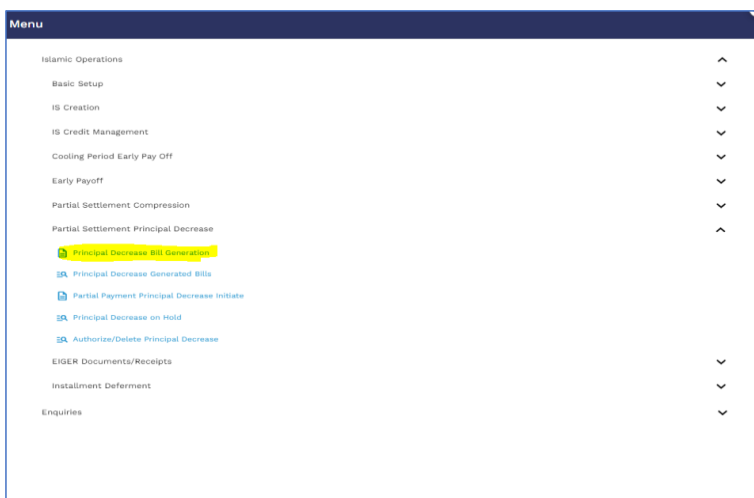

- File name : Tawarruq Working Sheet
- Sheet name : "Day4 - Partial Settlement" and "Day4 - Partial Settlement (RT)"

6.1.6.2 AA – Principal Decrease

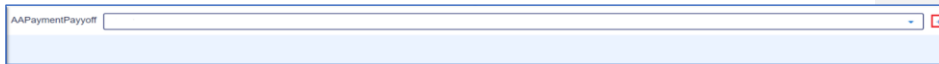

The user can conduct a "Principal Decrease" as a partial settlement activity when the customer intends to settle six installments. It's important to note that principal decrease can only be executed when settling six installments

User will follow below navigation for Partial settlement

Menu → Islamic Operation → Partial Settlement Principal Decrease → Principal Decrease Bill Generation

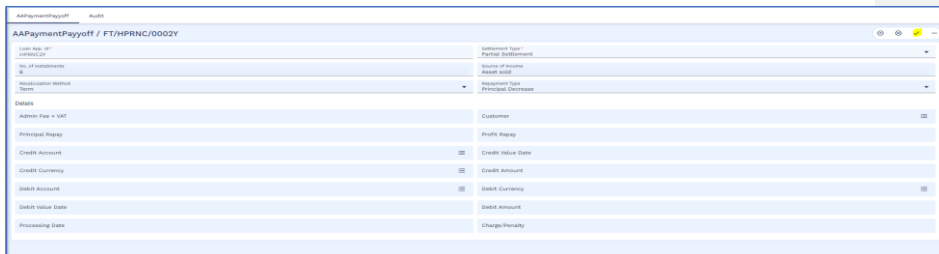

User will click on the edit icon

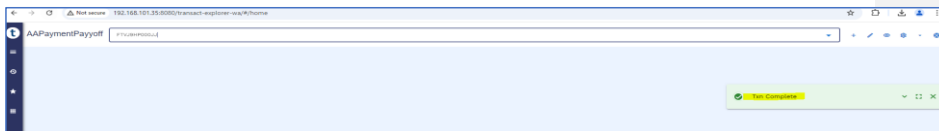

Then mention Loan App id, Settlement Type, No of installments, source of income, Recalculation Method and Repayment type.

Please note that is the customer wants to reduce the Tenor then the Recalculation Method as “Term” should be selected and the customer wants to reduce the installment amount then the Recalculation Method as “Installment” should be selected.

After that the user will validate the activity through a validation icon.

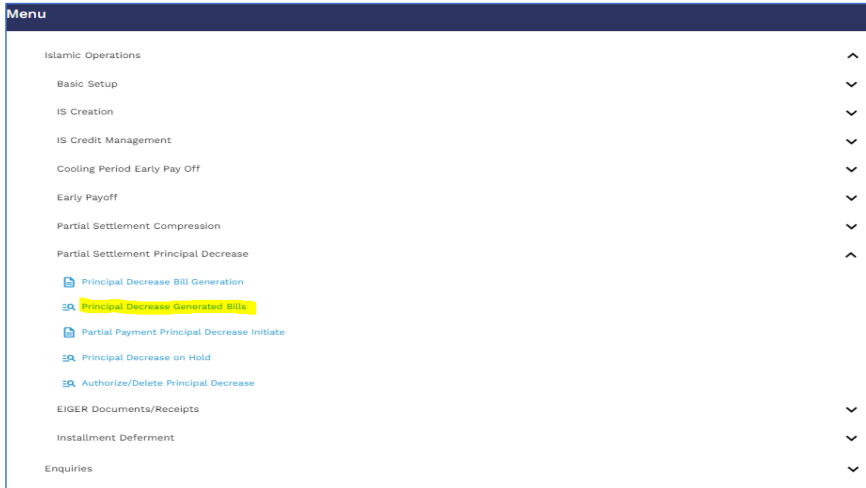

And then commit to the record.

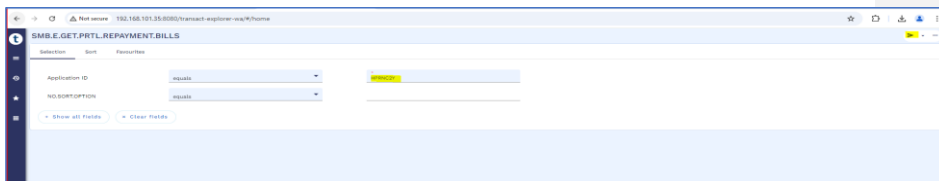

User can check the bill by using below navigation

Menu → Islamic Operation → Partial Settlement Principal Decrease → Principal Decrease Generated Bills

User will put the application ID

Below window will open, User will click on the view icon

Generated bill as below

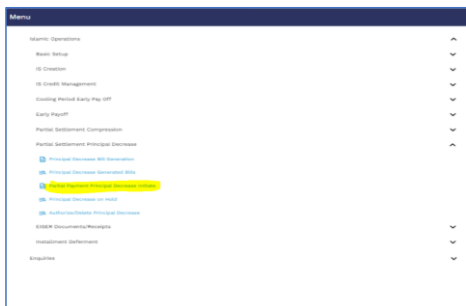

[illegible]

Through a service this is integrated with SADDAD. Like other processes, this process can also be integrated with servicing app.

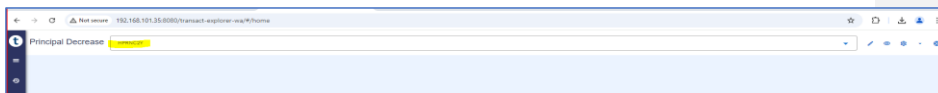

User will make the funds available in customers repayment account as mentioned in early payoff section

Once the funds are available in customer repayment account, user will initiate Principal Decrease payment as per below navigation

Menu → Islamic Operation → Partial Settlement Principal Decrease → Partial Payment Principal Decrease Initiate

User will enter the application id and then click on the edit icon

After that user will put the bill reference and then validate the activity

And then commit the record.

User will follow below navigation to commit the record from hold

Menu → Islamic Operation → Partial Settlement Principal Decrease → Partial Payment Principal Decrease on Hold

User will put the application id and click to find icon

Below window will open, then user will click on the view icon to commit

Details

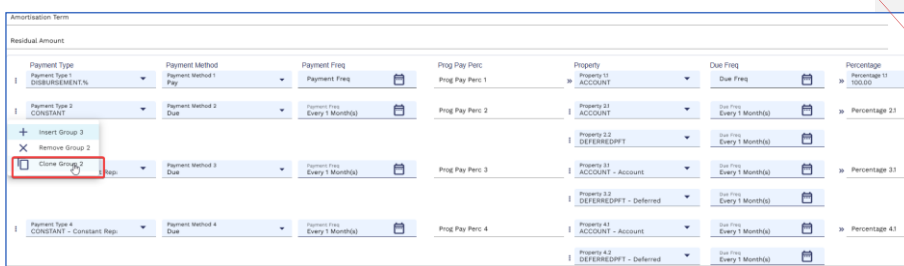

Then user needs to go one day before the installment (overdue) date that is supposed to be deferred, in this case 31/Dec/2023.

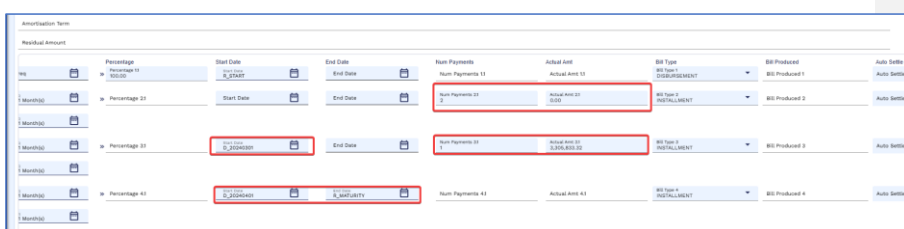

Scenario 1 If user needs to deferrer overdue instalments in next Installment.

Commented [AH19]: What will be the impact on DPD before deferment and after deferment. Will DPD become zero or 60 after deferment.

Commented [KU20R19]: zero

In this case user needs to clone the group of “constant” two times, the first one should have num payment =2 and actual amount = 0. The second clone must have start date as next instalment date after the deferred overdue instalments in this case 01/Mar/2024 and num =1 and actual amount = 3,305,833.32- sum of three months instalments. The last clone of constant will have start date after the above one that is 01/Apr/2024 and end date as relative date that is R_MATURITY + . By default, recalculation on activity “LENDING-CHNAGE-SCHEDULE” is set as Residual means add in last instalment.

Arrangement	A42044002026	Account	2000010404 - USD

01 JUN 2024	105,284.44	0.00	99,176.44

Scenario 2, where overdue instalments deferred with term increase.

In this case first user needs to copy the clone one time for constant as mentioned in scenario 1. In first constant group num will be set as 2 and actual amount will be set as 2. Whereas in second group of constant, the start date will be set as next instalment date after the deferment period in this case is 01/Mar/2024 and end date end date as relative date that is R_MATURITY +

Type	Method	PayFreq	Prog%	Property
Payment Type 1 DISBURSEMENT.%	Payment Method 1 Pay	Payment Freq 1	Prog% 1	Proper ACCO

If the user needs to enhance the term, then "Term" needs to be select in recalculation field against the activity named as "LENDING-CHANGE-SCHEDULE". In this case system will give override that Term of the contract will change based on overdue bills deferment. In this case two months as mentioned below.

Control	
Base Date	01 DEC 2023
On Activity 1 LENDING-DISBURSE-COMMITMENT	Recalculate 1 Payment
On Activity 2 LENDING-CHANGE-SCHEDULE	Recalculate 2 Term
On Activity 3 LENDING-CHANGE.CONDITION-SCHEDULE	Clear
On Activity 4 LENDING-CHANGE.TERM-COMMITMENT	Maturity.then.payment
On Activity 5 LENDING-AUTO.DISBURSE-COMMITMENT	Nothing
	Payment
	Progressive.payment
	Residual
	Term

Upon the validation, user will get override of maturity enhancement as mentioned below.

Arrangement	AA240430Q206	Audit
Activity	LENDING-CHANGE-SCHEDULE	Override 1 Unauthorized overdraft of USD 12930909.36 on account 2000012494.
Effective Date	31 DEC 2023	Override 2 Unauthorized overdraft of USD 13861818.72 on account 2000012494.
Product	MUR.FIN	Override 3 Unauthorized overdraft of USD 14772708.33 on account 2000012494.
Currency	USD	Override 4 Unauthorized overdraft of USD 15683597.94 on account 2000012494.
		Override 5 Payment End Date is not a Working Day
		Override 6 Settlement A/C USD186040001001 does not belong to Arrangement Customer 200172
		Override 7 Maturity Date is not a Working Day
		Override 8 Maturity date 20241201 would be changed to 20250201
		Override 9 Settlement will not be processed for backdated activities

For both scenarios, results and all calculations can be verified in given excel reference sheet.

6.1.8.1 Worksheet details:

- File name : Tawarruq Working Sheet

Sheet name : DayN-Deferment With Overdue (for both scenarios 1 and 2)

6.1.9 Restructuring (WS03-TAW-13)

There will be four scenarios in restructuring:

- Principal Only
- Principal + Profit
- Top-up + Principal
- Top-up + Principal + Profit

Commented [AH21]: Need clear understanding with example

Commented [KU22R21]: Please discuss with Finance , clarity has already been given in BPR session. Else we can discuss this separately

The restructuring process requires several steps as shown below:

7.1 Post offer acceptance commodity purchase - WS03-TAW-05-01

Post-offer acceptance, Tamweel will proceed with the commodity purchase and subsequently send the finance agreement to the customer. Upon the customer's acceptance of the agreement, the remaining accounting entries will be executed. In the current Transact setup, all General Ledger (GL) entries are executed once the customer accepts the Finance Agreement (FA).

Commodity purchase transaction will be made after acceptance of offer by customer with a holding period of one month. If customer did not accept the offer, then this commodity purchase transaction will be reversed.

Offer Acceptance (24 Hours Expiry)

- Purchase of Commodity: If the offer expires, the customer has 3 days to resume the same application, otherwise, a new application will need to be generated.

From contract generation to Unifonic authentication, the customer has 48 hours to complete:

- Contract generation and signing by the customer via ND
- Promissory note creation and acceptance by the customer through NAFITH
- Unifonic authentication
- Loan creation and IS sale

Below are the letters that will be generated from Transact. This is as per updated process flow.

S.no	File Name	Document
1	Clearance Letter For clearance letter the case should not be written-off and rescheduled and if the loan is closed then NOC should be issued	 Clearance letter (1)_eng.docx
2	Tawarroq contract - SAMA (This SAMA letter will be used for Tawarruq Contract	 Tawarroq contract - SAMA_eng.docx

7.1.1 Proposed Solution

Once the offer is accepted by customer, a new template "SMB.DEAL.DETAILS" will be created with ID as "Application Id", which will hold the details like CIF, IS Product, Currency, Assets Description, Vendor Name, Quantity, Unit Price, Tenor, Finance Amount,

Profit Rate, Admin Fee Mode etc. This template will be created by replicating the same fields as stated in IS.CONTRACT,SMBB.INPUT version, further an additional field of Application Status and will be defined with LOV's "Not Disbursed, Disbursed, Reject, Expired". This field will be updated based on application fate accordingly. The Straight-Through Processing (STP) workflow will be initiated upon successful IVR response as stated below in End to End Process Flow section.

The workflow needs to be carefully segmented to ensure the purchase request is initiated first, followed by the successful endorsement of the contract and acceptance of the promissory note before continuing with downstream processes.

An enquiry will be created in order to monitor the status to each application.

For clearance letter, a routine will be developed to check **ACCOUNT>SMB.ACTIVITY.TYPE** filed if <> WRITE-OFF or RESCHDULE and if account status is closed or pending closure the NOC will be issued.

NOC will be sent to Customer through Email

New Template:-

SMB.DEAL.DETAILS

SMB.ISFIN.PARAM	
Technical Name	Vetting Table
	LOVs
SMB.TXN.TYPE.1	POT(post offer acceptance transaction)
SMB.TXN.CODE.1	FT.TX.TYPE.CONDITIONS
SMB.DR.ACCOUNT.1	IA CATEGORY
SMB.CR.ACCOUNT.1	ACCOUNTS

Configuration for Post offer Commodity Purchase Transaction: The following parameters must be defined and configured in above parameter table named as SMB.ISFIN.PARAM to ensure the correct accounts and transaction types are applied during the commodity purchase process:

- **SMB.TXN.TYPE:-** An **FT.TXN.TYPE.CONDITION** along with transaction code of with relevant narration.

- **SMB.DR.ACCOUNT:** For the commodity purchase transaction, an internal account should be used for inventory transactions for which category will be defined. This will allow proper tracking and allocation of inventory-related costs.
- **SMB.CR.ACCOUNT:** Buyer's Account should be created as a non-checking account (NCA) against the buyers CIF.

Accounting

Entry

Purchase Stage	Stage	Debit/Credit	Accounting Entries	Description	Core/ Customized	Account Reflection
Offer Acceptance		DR	Inventory - IA	Internal Account	(10,000.00)	
		CR	Buy Broker's account	Internal Account	10,000.00	
		DR	Buy Broker's account	Internal Account	(10,000.00)	
		CR	TA - Bank Account	Nostro Account	10,000.00	

Technical Note:

Current STP process related to accounting entries needs to be changed from Core to customizations, for which Inventory Internal Account Category will be capture in IS.PARAMETER. Below Accounting Entries will be executed at the time of purchase stage

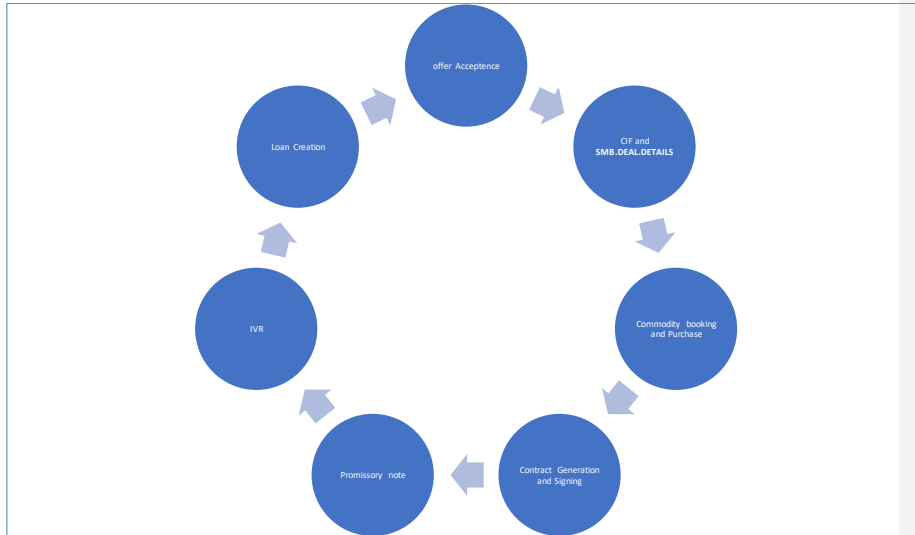

Status - Purchase	DR	Purchase Order	Purchase Order	(10,000.00)	On Balance Sheet
	CR	GIF	Goods in Transit	(10,000.00)	On Balance Sheet
	DR	Purchases	Purchase	(10,000.00)	On Balance Sheet
	CR	Inventory - IA	Internal Account	10,000.00	On Balance Sheet

Once the customer will accept the offer, as per Customer gap, CIF will be opened in Transact. Simultaneously, below LMS process will be automated.

LOS will send all information as mentioned in above template "SMB.DEAL.DETAILS" and upon the authorization of SMB.DEAL.DETAILS which is integrated with LOS, above Transaction will be auto posted with Application ID as transaction reference and DAO of customer. The status of this template will be "Offer Accepted".

E2E (End-to-End) Process Flow:

The detailed E2E process flow for the commodity purchase and finance agreement must be defined and appended to the workflow. This will ensure the sequence of operations from the initial offer acceptance to the final sale of the commodity is followed correctly. Key stages of this flow include:

- **Offer Acceptance:** When the customer accepts the offer, the system triggers the purchase request initiation. Upon acceptance of offer LOS will push all relevant information pertaining to creation of IS Contract and AA Arrangement on a template
- **Accounting Entries of Commodity Purchase:** Upon successful response of purchase request initiation purchase accounting entries will be initiated by considering.
- **Contract Generation and Signing:** The customer must complete the contract generation, including signing it electronically via ND system. Contract will be generated on daily basis till the expiry date of offer to synch APR on contract and loan account. There is no impact on offer generation, offer will contain maximum APR. Further there is no change in first instalment date calculation which is based on offer expiry date.
- **Promissory Note Creation and Acceptance:** The customer then accepts the promissory note via the NAFITH system, which is integrated into the workflow.
- **IVR Authentication:** This step ensures customer authentication through IVR (Interactive Voice Response), which should be completed within 48 hours of contract signing.
- **Loan Creation and Commodity Sale:** After authentication, the loan is created, and the commodity sale is processed through the IS system.

Formatted: Indent: Left: 0.39", No bullets or numbering

7.1.2 Worksheet details

- File name: Tawarruq Working Sheet
- Sheet name: DayN - Proposed Acc Entries

7.2 Installment Start Date - WS03-TAW-05-02

If the offer letter expires from 1st to 10th of the month, then the instalment start date will be 28th of current month and if offer expiry dates falls from 11th to month end then instalment start date will be 28th of following month. The date needs to be parameterized.

7.2.1 Proposed Solution

A template **SMB.ISFIN.PARAM** will be created to define IS Product, customer type and monthly installment date. A rule will be triggered to pick the installment date based on offer expiry date i.e. if it is between 1st to 10th, then first installment date will be set as 28th of current month . If offer expiry date is between 11th to 31st, then first installment date will be set as 28th of next month. This template will contain the below fields

SMB.ISFIN.PARAM this parameter table will be used for below setup.

ID Name	Type	Length	Description	Mandatory / Optional	Validation (if any)
---------	------	--------	-------------	----------------------	---------------------

SMB.PRODUCT	Numeric	02	A multi value field that will record IS Product code.	Mandatory	No
SMB.AA.PRODUCT		AA.PR ODUCT		Mandatory	No
SMB.ISD.MONTH.1	NUMBER	02	Current month date "like 28"		
SMB.INST.START.DATE.1	Number	2	This is the start day of any month "like 01"	Mandatory	Should be 01 to 31
SMB.INST.END.DATE.1	NUMBER	2	This is the start day of any month "like 15"		
SMB.ISD.MONTH.2	NUMBER	02	following month date "like 28"		
SMB.INST.START.DATE.2	Number	2	This is the start day of any month "like 16"	Mandatory	SMB.INST. START. DATE.1 and 2 should not be overlapped
SMB.INST.END.DATE.2	NUMBER	2	This is the start day of any month "like 31"		SMB.INST. END.DATE. 1 and 2 should not be overlapped

There is a business requirement that is if the offer letter expires between the 1st and 10th of the month The installment start date will be set to the 28th of the current month.

if offer expiry date is between SMB.INST.START.DATE.1 and SMB.INST.END.DATE.1 then installment start date will be SMB.ISD.MONTH.1 else if offer expiry date is between SMB.INST.START.DATE.1 and SMB.INST.END.DATE.1 then chose SMB.ISD.MONTH.2

Arrangement payment conditions will be auto populated based on above criteria. There is an STP service named as "**SMB.B.STP.SERVICE**" which is part of SMB and creates Financing. Same service is responsible to set instalment start date.

7.3 Bulk Upload - WS03-TAW-07-01

For manual repayment, there are around 22 banks where TA has account and customer credit their repayment amount, TA team will download this file from their portal and will upload this file in Transact for their customers' repayment. In this connection SADDAD bills need to be updated upon the execution of file and successful transaction in Financing account.

7.3.1 Proposed Solution

For bulk payments upload a new FT version will be created and defined the same in EB.FILE.UPLOAD.TYPE. The proposed FT version will contain the below fields;

ID Name	Type	Length	Description	Mandatory / Optional	Validation (if any)
SMB.FILE.NAME	AN	35	A local field that will accept file name to be upload. File name to be maintained as "Payment_Fileupload_DDMMYY".	Mandatory	No
SMB.ACCOUNT.NO	AN	35	A local field that will accept internal account number of respective bank account.	Mandatory	No
SMB.CIF	N	06	A local field that will accept valid CIF record.	Mandatory	No
SMB.TRAN.DATE	N	10	A local field that will auto populate transaction date as system date.	Mandatory	No
SMB.VALUE.DATE	N	10	A local field that will accept value date.	Mandatory	No
SMB.AMOUNT	N	15	A local field that will accept transaction amount.	Mandatory	No
SMB.PAYMENT.MODE	T	10	A local field that will accept payment mode such as "STINS, DD, BT, BD, SADAD, CH".	Mandatory	No
SMB.DEPOSIT.AC.NO	AN	35	A local field that will accept internal account number of respective bank account.	Mandatory	No
SMB.INSTRUMENT.NO	N	20	A local field that will accept instrument reference number.	Optional	No
SMB.IBAN.NO	AN	20	A local field that will accept IBAN number.	Optional	No
SMB.FUND.SOURCE	T	35	A local field that will accept details about source of funds e.g. Salary, Bonus, Other.	Mandatory	No
SMB.REF.NO	AN	1000	A free text field that will accept bank reference details either in English or Arabic	Mandatory	No

SMB.COMPANY.ID	AN	12	A local field that will accept valid company ID, by default it is set as head office.	Mandatory	No
SMB.CONTRACT.NO	AN	12	A local field that will accept valid arrangement ID.	Mandatory	No
SMB.REPAY.AC	AN	12	A local field that will be auto populated based on SMB.CONTRACT.NO.	Mandatory	Yes
SMB.BANK.ID	N	04	A local field that will accept bank ID.	Mandatory	No
SMB.BRANCH.ID	AN	10	A local field that will accept branch ID.	Mandatory	No

Value date field is required for bulk payment upload.

For outward funds must have value date as processing date.

Separate TRANSACTION CODE will be used for each upload type.

Validation on Contract # at file level is required for duplicate record. For this file must contain file name against each row. This criteria will be define in EB.DUPLICATE.TYPE table for bulk payment upload.

Below is specimen format for bulk payment upload file. Excel format is attached as item 6 in Reference Document section of this FSD.

FILE NAME	ACCOUNT NO	CF ID	TRAN DT	VALUE DT	AMOUNT	PAYMENT MODE	DEPOSIT ACC NO	SOURCE OF FUNDS	NARR NO	COMPANY ID	CONTRACT NO	BANK ID	BRANCH ID
Payment_Fileupload_291024	2000004367	200039	29-10-2024	29-10-2024	1500.00	DDM	2000004367	SALARY	Installment payment for the month of Oct. 2024	5400231001	2000005347	RIBL	603
Payment_Fileupload_291024	2000004367	100150	29-10-2024	29-10-2024	2500.00	ST	2000004367	SALARY	Installment payment for the month of Oct. 2024	5400231001	2000004971	RIBL	603
Payment_Fileupload_291024	2000004367	200239	29-10-2024	29-10-2024	3000.00	DDM	2000004367	SALARY	Installment payment for the month of Oct. 2024	5400231001	2000005412	RIBL	603

User will prepare data as stated above in **CSV (save as CSV UTF-8)** file then upload it through EB.FILE.UPLOAD application.

Commented [AH23]: Excel

Commented [KU24R23]: Yes , excel as mentioned in above screen

- File name: Tawarruq Working Sheet
- Sheet name : DayN-File Upload

7.4 Schedule Enquiry - WS03-TAW-07-02

Add the header in an Enquiry [SMB.E.AA.API.NOF.LOAN.PAYMENT.SCHEDULE.1.0.0] e.g. CIF name, CIF Ref, Arrangement ID, Application ID, Date of Contract (Value date of Arrangement).

Headers are defined below:

Pmnt #, Monthly Payment Date, Monthly Payment, ~~Interest (Invested)~~, ~~Insurance Insert~~, ~~Capital Element~~, ~~Total Owning~~, ~~Collected~~, ~~Collection Date~~, ~~Overdue~~, ~~Collection Period Average~~, VAT Insurance, VAT Cost, VAT Due, VAT Collected and Monthly Payment (VAT). [file 513744]

7.4.1 Purposed Solution

In an existing enquiry SMB.E.AA.API.NOF.LOAN.PAYMENT.SCHEDULES.1.0.0 below fields need to incorporate;

Note:- all above strikethrough columns are not available in Transact.

Header Fields

- Customer Name
- CIF Reference
- Arrangement ID
- Application ID
- Date of Contract

below SMB enquiry is already available.

paymentDate	Installment Amount	Admin Fee+VAT	Rec Profit	principalAmount	Principle outstanding	scheduleType	Overdue Installment

7.5 VAT Invoice Creation - WS03-TAW-05-03

VAT invoice to be created as per attached format attached. [VAT E-Invoice Template]. This VAT invoice will be created on the Admin Fee and will be sent to customer at the time of disbarment of financing.

7.5.1 Proposed Solution

- For VAT invoice creation below fields need to be mapped.
- A post routine will be attached on activity API against the activity named as "LENDING-MAKEDUE-ADMINFEEUP" on action Make.Due. Below template will be auto updated upon the authorization of this activity.

- Table name = SMB.ISFIN.VAT

ID Name	Type	Length	Description	Mapping	Sample Value
@ID			ARRANGEMENT ID.PROPERTY NAME.DATE (AA2403237NW9.AD MINFEE.20250304)		
SMB.VAT.REG	N	15	VAT Registration - A local field that will accept VAT registration number. COPMANY>SMB.VAT.REG	Local Ref Required on company table	300434164810003
SMB.INV.NO	N	15	Invoice Number – A local field with a unique invoice number. Auto generated (Arrangement ID. Serial number)	Local Ref Required	AA2403237NW9.001
SMB.INV.DATE	N	Date	Invoice Issue Date – A local field that contains invoice issue date. Auto – current system date	Local Ref Required	2025-01-12
SMB.SUP.DATE	N	date	Date of Supply – A local field that contain date of supply. Auto – current system date	Local Ref Required	2025-01-12
CUSTOMER.ID	N	06	Customer ID – Contains valid customer ID.	CUSTOMER >ID (obtain from customer application)	200006
SMB.SELLER.NAME	T	35	Seller Name – Contains Financial Institution Name. COMPANY>COMPANY.NAME	Local Ref Required	Tameel Aloula Financing Co.

SMB.CUS.VAT	N	15	VAT Registration - A local field that will accept VAT registration number of customer. CUSTOMER>SMB..C US.VAT	Local Ref Required	311325608800003
BUILDING.NUMBER	N	15	Building Number – Represents the number that identifies the position of a building on a street.	CUSTOMER > BUILDING.NAME	8280
STREET	AN	35	Street Name – Identifies the first line of the Customer's base address.	CUSTOMER > STREET	Prince Bander Bin Abdulaziz
DISTRICT.NAME	AN	35	District - Identifies a subdivision within a country sub-division.	CUSTOMER > DISTRICT.NAME	Prince Bander Bin Abdulaziz
CITY	A	35	City - The City of Customer's physical address.	CUSTOMER > TOWN.LOCATION.NAME	Al Khobar
COUNTRY	A	35	Country – The county of Customer's physical address. This field is used to capture the County of the respective State.	CUSTOMER > COUNTRY	Saudi Arabia
POST.CODE	N	35	Postal Code - Identifies the postal code for customer.	CUSTOMER > POST.CODE	03154
FURTHER.DETAILS	N	35	Additional No – Any relevant further details about customer.	CUSTOMER > FURTHER.DETAILS	25348

SHORT.NAME	T	35	Client Name – Identifies the name of the Customer in a more descriptive form, and will be used for on-line enrichments in any field where a Customer ID or Mnemonic has been input	CUSTOMER > SHORT.NAME	MOHAMMAD AHMED
SMB.SERIAL.NO.1	N	15	S. No. – Auto generated serial number. Multi-value field.	Local Ref Required	1
SMB.DESCRPTION.1	AN	35	Description – Local Ref Required. Multi-value field.	Local Ref Required	Management Fee
SMB.GROSS.AMT	N	20	Gross Invoice Amount – Sum of all total fields.	Local Ref Required	115.00
SMB.VAT.RATE.1	N	04	VAT Rate – Applicable VAT rate.	Local Ref Required	17.25
SMB.VAT.AMT.1	N	20	VAT Amount – Calculated field by applying applicable VAT rate.	Local Ref Required	17.25
SMB.DISCOUNT	N	20	Discount – Applicable Discount.	Local Ref Required	17.25

7.5.2 Worksheet details

- File name : VAT E-Invoice Template

7.6 Reversal of GL entries in case of Rejection - WS03-TAW-05-04

If the case goes for rejection (contract is rejected by customer/ expired, Unifonic is not answered or declined, Nafith is rejected or expired) Rejection of Contract/offer should be enabled on mobile app, customer has the authority to reject the contract/offer in this case, a cancelation notification will be sent to FAJR and customer as well Moreover, a contra entry of purchased is also required.

In case of post disbursement cancelation and within cooling period (b/w TA and Customer), cancelation notification will also be sent to FAJR and customer and if this happens with in the

cooling period (b/w TA and FAJR) then reversal of brokerage fee will be executed, and a notification needs to be sent to FAJR to eliminate from Bills

Customization needed as IS.CONTRACT is already closed, and this reversal would be on AA so an OFS needs to be posted.

7.6.1 Proposed Solution

Pre-Disbursement Rejection / Expiry

In all below scenarios

1. Unifonic is not answered or declined
2. Nafith is rejected or expired
3. Contract is rejected or expired

Contra entry is required to create the reversal impact on entries. In all above scenarios, LOS will inform Transact and **SMB.DEAL.DETAILS> SMB.REC.STATUS** will be updated with either "rejected" or "expired" status. And an FT will be executed as mentioned below.

SMB.ISFIN.PARAM	
Technical Name	Vetting Table
	LOVs
SMB.TXN.TYPE.2	POTC (post offer acceptance transaction Contra)
SMB.TXN.CODE.2	FT.TX.TYPE.CONDITIONS
SMB.DR.ACCOUNT.2	ACCOUNTS
SMB.CR.ACCOUNT.2	CATEGORY IA

ACCOUNTING ENTRIES

Below accounting entry will be executed at the time of reversal

Account	Debit / Credit	Description
Buy Broker Account	Debit	Buy Broker Non-Checking Account
Inventory A/c.	Credit	Internal Account

Post Disbursement Cancellation

8. **CancelTransaction (HTTPPOST):**

Description: To cancel the deal at any step even after completing the deal, this endpoint also requires only one argument as TransactionId.

API URL: [URL /CancelTransaction](#)

a. Request

- TransactionId (Long - Required):** Unique id of transaction we get from the TransactionBuy API endpoint (TransactionId)

b. Response

- StatusCode:** HTTP status code like 200 for success, 404 for not found, 500 for server error etc.
- StatusMessage:** Error or Success message or Empty
- ResponseData:** Null

```
{
  "StatusCode": 200,
  "StatusMessage": "Transaction cancelled successfully",
  "ResponseData": null
}
```

In case of post disbursement cancellation and within cooling period, cancellation notification will also be sent to FAJR and customer then reversal of brokerage fee will be executed, and a notification needs to be sent to FAJR to eliminate from Bills.

SMB.ISFIN.PARAM	
Technical Name	Vetting Table
	LOVs
SMB.TXN.TYPE.3	BFR(Broker fee reversal)
SMB.TXN.CODE.3	FT.TX.TYPE.CONDITIONS
SMB.DR.ACCOUNT.3	IA CATEGORY
SMB.CR.ACCOUNT.3	PL category
	LOVs
SMB.TXN.TYPE.4	VAT (value added tax)
SMB.TXN.CODE.4	FT.TX.TYPE.CONDITIONS
SMB.DR.ACCOUNT.4	IA CATEGORY
SMB.CR.ACCOUNT.4	IA CATEGORY

Accounting entries

Account	Debit / Credit	Description
Broker Fee Payable	Debit	Internal Account
Broker Fee Expense	Credit	PL Category
VAT Payable	Debit	Internal Account
VAT Asset	Credit	Internal Account

These entries will be triggered upon the successful response of cancelation from commodity vendor.

7.7 Admin Fee Parameterization - WS03-TAW-08-01

Currently, in case of cancelation Admin fee is reversed, however, TA team has asked to parameterize it whether to take admin fee or waive admin fee. This should be available on arrangement level.

7.7.1 Proposed Solution

SMB.DEAL.DETAILS			
Technical Name	Mapping	Ref Fields	Description
SMB.ADMINFEE.WAIVER	LOVs:- Yes / No		

A local ref needs to be added in template SMB.DEAL.DETAILS>SMB.ADMINFEE.WAIVER to capture the decision of waiver of admin fee. Same field will also be added on IS.CONTRACT,SMBB.INPUT to be utilize in while creating Finance Arrangement.

IS.CONTRACT			
Technical Name	Mapping	Ref Fields	Description
SMB.ADMINFEE.WAIVER	LOVs:- Yes / No		

There is an STP service named as “**SMBB.B.STP.SERVICE**” which is part of SMB and creates Financing. Same service is responsible to give waiver of admin fee in this case.

7.8 Flags required for Maintenance Activities - WS03-TAW-07-03

A flag/field is required in transact where cases will be marked as Write off, rescheduling, restructuring, deferment, Total Loss, cancelation and customer deceased.

7.8.1 Proposed Solution

A local ref will be added in maintenance activities version having LOV's such as Write-off, Rescheduled, Restructured, Deferment, Total Loss, Cancelation & Deceased, which the user will select accordingly.

New field

AA.PR.DES.ACCOUNT & ACCOUNT			
Technical Name	Mapping	Ref Fields	Description
SMB.ACTIVITY.TYPE	LOVs:- • WOFF • RESTRUTURING • RESCHEDULED • DEFERMENT • TOTAL LOSS • CANCELATION AND DECEASED		

Moreover, a separate enquiry needs to be developed which would be copy of core AA lending Closure enquiry along with maintenance flag such as Write-off, Rescheduled, Restructured, Deferment, Total Loss, Cancelation & Deceased.

7.9 LOS-LMS field mapping (WS03-TAW-05-06)

The required fields will be mapped from LOS to LMS, in some cases local reference field will be created.

7.9.1 Proposed Solution

List of fields as stated in “**DayN-LOS-LMS Mapping Field**” of Tawarruq Working Sheet will be mapped and some local fields will be created as mentioned in referred sheet and same is also available in gap WS03-TAW-05-01 This is mainly part of integration.

7.9.2 Worksheet details

- File name: Tawarruq Working Sheet
- Sheet name: DayN - LOS - LMS Mapping Field

DayN - LOS - LMS
Mapping Field.xlsx

7.10 Offer Expiry (WS03-TAW-05-07)

Offer Acceptance (24 Hours Expiry)

Purchase of Commodity: If the offer expires, the customer has 3 days to resume the same application, otherwise, a new application will need to be generated.

From contract generation to Unifonic authentication, the customer has 48 hours to complete:

Contract generation and signing by the customer via ND, Promissory note creation and acceptance by the customer through NAFITH, Unifonic authentication, Loan creation and IS sale

7.10.1 Proposed solution

This gap is part of LOS

7.11 Product Setup Tawarruq- TA

Product setup sheet is used to create loan account with all repayment schedule balance component such as principal, interest, any changes and VAT. This is highly dependent on customer's business requirement and are filled during BPR session which requires signoff from FI. This sheet also contains Overdue condition, repayment hierarchy, Interest Day basis, instalment frequency, settlement instructions etc.

7.11.1 Proposed Solution

Detailed Product Setup sheet was elaborate and discussed in detail during BPR session, same is attached in Tawarruq Working Sheet as **Day4 – Product Setup**.

7.11.2 Worksheet details

- File name: Tawarruq Working Sheet
- Sheet name: Day4 - Product Setup

7.12 Broker CIF and Account Opening (WS03-TAW-01-01)

Buy broker/sell broker CIF and accounts will be opened in Transact (LMS). TA team will provide the list of such brokers. Please note that in case of Tawarruq, the buy and sell broker will be same.

7.12.1 Proposed Solution

Process of creation of Broker CIF, Broker Account and Broker is mentioned in Section 5.1.2 of this document. CIF of vendor will be covered in customer's workstream which is out of the scope of this document. For Vendor account, a separate retail liability product will be given to open buy and seller accounts.

SA business Team will get category of all underlying vendor list and will configure the AA products for all other financing products.

7.13 Change of schedule calculation on Flat rate (WS03-TAW-04-01)

In section 5.2, the current setup of Tawarruq product amortization schedule is set based on reducing balance, however, it was discussed and agreed that the amortization schedule should be developed with the effect of Flat rate.

7.13.1 Proposed Solution

This gap is part of product setup where RATE.TYPE field of profit condition will be configured as "Flat.Rate" for calculation of profit and amortization schedule will be developed taking into the effect of flat rate profit calculation.

7.13.2 Worksheet details

- File name: Tawarruq Working Sheet
- Sheet name : DayN- APR with Flat Rate

7.14 Grace Period with EPC Calculation (WS03-TAW-05-08)

- Early payoff charge - EPC needs to be aligned with respect to grace period.
- In retail, since there are no such cases for quarterly or half-yearly repayments therefore no impact on EPC
- LOS will provide the number of days for the grace period

7.14.1 Proposed Solution

A local filed i.e. Grace Period, will added in SMB.DEAL.DETAILS and IS.CONTRACT,SMBB.INPUT versions which will carry the number of months for which grace period is allowed. A routine named as "SMB.EARLY.SETTLEMENT.CHRG" will be enhanced. If the case is EMI then the routine will work in same manner and there wouldn't be any change. However, if the difference b/w last instalment date and next instalment date > one month then this routine will work like below.

System will calculate total number of days = cycle date of after three months - cycle date of current month. For example, if cycle date is 28 of each month and current system date us 15 Jan 2025 then.

1. Calculation: - when there is no Instalment Due in next 90 /91 days.
 - Today = 25 Jan 2025
 - Total number of days = 28-Apr-2025- 28-Jan-25= 90 days
 - $CURACCOUNT * PROFITRATE * Total\ No.\ Of\ days / 365 = ECP\ Amount$
2. Calculation: - when there is an Instalment Due in next 90 /91 days.
 - Today = 25 Jan 2025
 - Let's assume the case is of 3 months instalment. Last installment date was 28 Nov. 2024 and next instalment date is 28 February 2025
 - Current total number of days = (28 Feb 2025)- (28 Jan 25)
 - $CURACCOUNT * PROFITRATE * Current\ Total\ No.\ Of\ days / 365 = Current\ ECP\ Amount$
 - Future total number of days= (28 March 2025) – (28 feb 2025)
 - $FCURACCOUNT * PROFITRATE * Future\ Total\ No.\ of\ days / 365 = Future\ ECP\ Amount$
 - Total ECP Amount = Current ECP Amount + Future ECP Amount

7.14.2 Worksheet details

- File name: Tawarruq Working Sheet
- Sheet name: SA Transact Grace Schedule

7.15 Multiple Simulations for Daily Contract Generation (WS03-TAW-05-09)

- In order generate synch APR on contract and loan account, it was agreed that TA will be generating contract on daily basis till the expiry of offer.
- There is no impact on offer generation, offer will contain maximum APR.
- There is no change in first instalment date calculation, which is based on offer expiry date.

7.15.1 Proposed Solution

Upon the acceptance of offer by customer, a template SMB.OFFER.DETAILS referred in Section 7.1.1 of this document will be created having Simulation Arrangement ID created for offer.

By using this offer simulated arrangement two new simulations will be created (parameterized on IS.PARAMETER>GRACE.PERIOD which is used to calculate offer expiry date). these two new simulations will start from first working day after offer acceptance having expiry of one day each. These simulations will utilize the same finance amount, profit amount, first & last installment date in order to keep the financials intact as stated at the time of offer.

Formatted: Font: (Default) +Headings (Calibri Light),
14 pt, Bold, Font color: Accent 1

New template

SMB.OFFER.DETAILS		
Name	Description	Values
@ID	CIF.APPLICATIONID.EFFECTIVEDATE	"100150.AA251480.EFFECTIVE DATE"
CIF	CIF ID	"100150"
CUSTOMER ROLE	Role of Customer	"OWNER"
PRODUCT NAME	Technical Product name of Transact	"SMB.PERSONAL.FINANCE"
CURRENCY	Currency in which Financing will be provided. Product Currency	"SAR"
EFFECTIVE DATE	Financing Effective date	"20240129"
ACTIVITY	Technical name of AA Activity	"LENDING-NEW-ARRANGEMENT"
Amount	Financing Amount	"100000"
Term	Term of Financing based on which maturity date will be calculated.	"12M"
Profit Rate	Profit Rate	"10"
Profit Amount	Profit Amount	"12000"
Instalment Amount		"2400"
APR		"23%"
Simulation Reference	Simulation Reference	AAA125441ASDRE
Arrangement Reference	Arrangement Reference	AA21155FDGG
STATUS	Response	NULL/ GENERATED
CONTRACT.STATUS		NULL/ACCPETED/REJECTED/EXPIRED*

*This filed will be updated once we get contract response from customer that is "NULL/ACCPETED/REJECTED/EXPIRED *".

Once customer will accept the offer, all above values will be auto populated for this offer values with STATUS=GENERATED and CONSTRUCT.STATUS=NULL.

Next day during COB, system will make selection on EFFECTIVE DAY = today and CONTRACT.STATUS= NULL. Now a new contract will be generated based on this selection and this cycle will continue.

Once the specific contact will be accepted by customer, CONTRACT.STATUS will be auto populated as ACCEPTED and rest of the future effective dates records of same CIF.APPID.EFFETIVEDATE > CONTRACT.STATUS will be set as EXPIRED. Likewise, if contract gets REJECTED or EXPIRED, same functionality will be executed.

Based on above template, a new service will be developed which will generate revised contract on daily basis in order to have current APR. this process will continue till the contract is not accepted/ expired / rejected.

7.16 Macker and checker in deferment process is required (WS03-TAW-09-01)

Macker and checker in deferment process is required as mentioned in section 6.12

7.16.1 Proposed Solution

It is a configuration of version and will be provided.

Formatted: Heading 2, Left, Indent: Left: 0", First line: 0", Outline numbered + Level: 2 + Numbering Style: 1, 2, 3, ... + Start at: 1 + Alignment: Left + Aligned at: 0.25" + Indent at: 0.52"

Formatted: Font: 14 pt

Formatted: Heading 3, Left, Indent: Left: 0.24", Hanging: 0.25", Outline numbered + Level: 3 + Numbering Style: 1, 2, 3, ... + Start at: 1 + Alignment: Left + Aligned at: 0.25" + Indent at: 0.75"

7.17 Bulk Deferment (WS03-TAW-09-02)

Bulk deferment is required through file upload.

7.17.1 Proposed Solution

For bulk deferment upload a new version for LENDING-UPDATE-PAYMENT.HOLIDAY activity will be created and defined the same in EB.FILE.UPLOAD.TYPE. The proposed version will contain the below fields;

Formatted: Indent: Left: 0"

ID Name	Type	Description	Mandatory / Optional	Validation (if any)
SMB.FILE.NAME	Alpha Numeric	A local field that will accept file name to be upload. File name to be maintained as "Payment Holiday Fileupload_DDMMYY".	Mandatory	No
SMB.ARRANGEMENT	Alpha Numeric	A local field that will accept valid arrangement reference number for payment holiday.	Mandatory	Yes
SMB.ACTIVITY	Text	A local field with a default activity of "LENDING-UPDATE-PAYMENT.HOLIDAY"	Mandatory	No

Formatted Table

<u>SMB.CUSTOMER</u>	<u>N</u>	<u>A local field that will auto populate customer number of arrangement reference.</u>	<u>Ma nda tory</u>	<u>No</u>
<u>SMB.CUSTOMER.ROLE</u>	<u>Text</u>	<u>Associated with CUSTOMER field. Denotes the role of the customer in the Arrangement. Auto fetched from arrangement.</u>	<u>Ma nda tory</u>	<u>Yes</u>
<u>SMB.PRODUCT</u>	<u>Text</u>	<u>Indicates the Product of the Arrangement contract. Auto fetched from arrangement.</u>	<u>Ma nda tory</u>	<u>Yes</u>
<u>SMB.CURRENCY</u>	<u>Text</u>	<u>Indicates the Currency of the Arrangement contract. Auto fetched from arrangement.</u>	<u>Ma nda tory</u>	<u>Yes</u>
<u>SMB.INITIATION.TYPE</u>	<u>Text</u>	<u>This field denotes the type of initiation for the current activity that is whether the activity was triggered by the user or by external transaction or it could be scheduled or secondary activity. By default, it would be set as "User".</u>	<u>Ma nda tory</u>	<u>No</u>
<u>SMB.ACTIVITY.CLASS</u>	<u>Text</u>	<u>This is a no input field and denotes the activity class id for the given activity.</u>	<u>Ma nda tory</u>	<u>Yes</u>

Formatted: Font: Bold

Formatted: Font: Bold

Formatted: Font: Bold

Formatted: Font: Bold

Further an associated version i.e. SMB.AA.ARR.PAYMENT.HOLIDAY,AA will be attached with this version which will be created by replicating version AA.ARR.PAYMENT.HOLIDAY,AA.

Validation on Contract # at file level is required for duplicate record. For this file must contain file name against each row. This criteria will be define in EB.DUPLICATE.TYPE table for bulk payment upload.

Below is specimen format for bulk payment holiday upload file. Excel format is attached as item 7 in Reference Document section of this FSD.

FILE_NAME	ARRANGEMENT_REF	CIF_ID	PAYMENT_DT	BILL_TYPE	NUMBER	RECALCULATION	COMPANYID
Payment_Holiday_Fileupload_1502202	AA240303GMNH	200006	28-02-2024	INSTALLMENT	1	TERM	SA0021001
Payment_Holiday_Fileupload_1502202	AA240303MNOGH	200006	28-02-2024	INSTALLMENT	1	TERM	SA0021001
Payment_Holiday_Fileupload_1502202	AA24029CF925	200012	28-02-2024	INSTALLMENT	1	TERM	SA0021001

User will prepare data as stated above in CSV (save as CSV UTF-8) file then upload it through EB.FILE.UPLOAD application.

8. Reference Document

S. #	Document
Tawarruq Working Sheet	Tawarruq Working Sheetv-2.2 20250116.v

end of document.

Commented [KU25]: Missing Terminology

- 1 Excess Balance
- 2 Appropriation gaps
- 3 Refund
- 4 Payment Reversal
- 5 Similar Upload

Commented [KU26R25]: For point #5 , pls touch base with nazim.
Excess balance if customer pays any IBFT equal to the complete future installment then it will be treated as advance payment. This gap will be covered in Ijarah FSD in details.
Point 2 is not clear
Refund is manual process and will be executed by finance
Point 4 is again Refund
Please don't add any comments in the body of this document.

Missing Functionality

1- Excess-Balance

2- Appropriation Logic

3- Refund

4- Payment Reversalsssss

5- Simah Upload
