1. Scope of the Document

The scope of this document is to provide users with end-to-end functionality of Ijarah product in Transact along with deltas noted during onsite BPR session. This document has two main sections. Section -5 is existing functionalities that explains end to end journey of LMS with respect to subject product. The other section-7 explains the deltas. Each existing functionality has a reference number that has prefix as WS03, for instance WS03-PRODUCT CODE-PROCESS NO. (WS03-IJR-01). Whereas on delta if any gap has been highlighted for the specific existing functionality, then it will be marked as WS03-PRODUCT CODE-PROCESS NO. SEQUENCE (WS03-IJR-01-01).

The pre-requisite of this document is to review agreed end-to-end process flow from LOS to LMS. This document also refers some working sheets that were finalized during onsite BPR session. Under each existing functionality or Delta there is a separate heading named as "Worksheet details" which will cite the reference document / sheet name.

Since there is no b2b partnership, therefore all the third party payment will be executed by finance department manually.

2. Navigation Tips

This button refers to 'Validate' a record on T24. It is placed on top of the screen while input of any transaction on T24. After filling out all mandatory and necessary information, user can press this button to check for core errors or any missing component on the record.

This button refers to 'Commit' a record on T24. This button is pressed to make the record part of T24.

This button is used to 'Delete' the record. (Only unauthorized records can be deleted from the system)

This button is used to 'Authorize' the record. Only upon Authorization marking the record is made the part of LIVE file.

This Button is used to put the record on 'Hold'.

3. Glossary

Abbreviations	Description
CBS	Core Banking System
BRD	Business Requirement Document
BSDD	Business Solution Design Document
BPR	Business Process Review
IS.CONTRACT	Islamic Finance Contract
AA	Architectural Arrangement (Financing)
WS	Workstream
STP	Straight Through Process
CUC	Customer
LOS	Infinity or new digital
LMS	Transact

4. Agreed LMS process functionalities

Please refer to ProcessFlow-TA-Ijarah-v1.8

Process Cycle Overview (3 Working Days)

4.1 Step 1: Offer Acceptance:

- Customers have **24 hours** to accept the offer.
- Actions required: Down payment and admin fee payment.
- This process has expiry duration of 24 hours

4.2 Step 2: Credit Admin Function (LOS)

- Purchase Order (PO) generation by the Credit Admin (LOS).
- Green Card validation conducted by the Credit Admin (LOS).
- Insurance Selection from Broker

4.3 Step 3: Contract Stage:

- Contract is generated and signed by the customer via ND.
- **Reversals** (if applicable): Down payment, admin fee and insurance with VAT in case customer rejects at any above stages
- The process 4.2 and 4.3 have expiry duration of 48 hours.

4.4 Step 4: Promissory Note Stage:

- Creation and acceptance of the Promissory Note by the customer via NAFITH.
- **Reversals** (if applicable): Down payment and admin fee.

4.5 Step 5: IVR Authentication:

- Customers must authenticate via IVR.
- **Reversals** (if applicable): Down payment, admin fee and Promissory Note.

4.6 Step 6: Transact GL Entries:

- Asset Purchase
- IS.Contract
- **Reversals** (if applicable): Down payment, admin fee, GL Entries and Promissory Note.

4.7 Step 7: Insurance & Registration Details:

- Insurance Purchase: Policy bought through Tameeni.
- Istimara Details: Entered and followed by the generation of a Delivery Note.

4.8 Step 8: Repayment Schedule & Tawtheeq:

- Repayment Schedule on AA Arrangement (APR generation).
- Registration on Tawtheeq

4.9 Cancellation During Cooling Period

- If the process is cancelled within the **cooling-off period**, the following reversals are Required:
 - Down payment.
 - Admin fee.
 - Insurance costs.
 - Promissory Notes.
 - Tawtheeq Registration.

5. Existing Functionalities

5.1 IS.PARAMETER (WS03-IJR-01)

IS.PARAMETER is the parameter table to define the Islamic Banking product related features.

5.2 Asset Capture (WS03-IJR-02)

This table capture the details of assets to be financed. Below are mandatory fields that needs to be input by user. Upon authorization of asset capture this record will be available to record IS contract.

FIELDS	INPUT	Definition
Customer	"200027"	CIF ID
Currency	"SAR"	Country Currency
Vendor	"Vendor CIF"	Vendor who buy the asset
Unit Price	"250,000"	Price of the asset
Asset Description	"Nissan Patrol"	Description of the purchasing asset
Asset Short Title	Nissan Patrol 6 th Generation	Asset short description

For other fields will

Vehicle / VEH24028FGSLM

Customer: 200027 - TAMWEEL ALOULA

Currency: SAR - Saudi Arabia Riyal

Vendor: 200014 - Eger

Seller Customer ID:

Seller Customer Name:

Seller Settlement Ac:

Asset Description: Nissan Patrol

Asset Short Title: Vehicle Nissan Patrol

Commented [AH1]: Asset Specification detail Screen needs to be added with the field list.

Commented [FUK2R1]: This is existing screen however fields agreed with LO team would be part of Asset Capture Screen.

5.3 IS Contract Booking (WS03-IJR-03)

The application is used to record all information pertaining to financing of assets. The entire workflow of the product with different statuses is captured in this application. The contract evolves into different statuses like REQUEST, APPROVAL, PURCHASE based on the workflow defined in the product parameter file IS.PARAMETER.

Below fields will need to be input by user or integrated. In case of TA Ijarah, the below process is automated and will be generated through LOS.

Transcript	Data	Description
CUSTOMER	200027	CIF ID
Product	3	Product ID as per IS Parameter.
Status Value Date	29 Jan 2024	Date on which the Status is effective. Defaulted to the date given in the field VALUE.DATE.
Currency	SAR	CURRENCY
Value Date	29 Jan 2024	Value date of contract
GB Asset Description	Vehicle Nissan Petrol	The Description of the contract or the Asset being captured.
Request Amount	250,000	Finance Amount requested by customer.
Commodity.1	1 – Vehicle	Commodity / Assets to be purchased.
Unit Price.1.1	250,000	Unit Price pf commodity or assets being purchased.
Purchase Quantity.1.1	1	This field specifies the quantity of the asset being requested.
Customer Account	2000000453	Repayment Account
Down Pay Asset Ref	VEH24032QD2H9	The asset against which down payment is made.
Down Payment Type	Amount / Percentage	Specifies the DP is defined in Amount / Percentage
Down Pay Percentage	20%	DP percentage of an individual asset.
Contribution Type	Cash / Asset	Specifies the type of customer contribution payment.
Contribution Counterparty	Bank / Supplier	Specifies whether the customer contribution to be paid to Bank or Supplier.
Contribution Amt	50,000	This field is used to specify the Contribution Amounts for corresponding contribution types.
Customer Contribution	50,000	This field is used to specify the Contribution Amounts for Corresponding Contribution types.
Bank Contribution	200,000	The Total Bank Contribution for the Asset or Commodity. This field is updated with the difference of Customer contribution from the Purchase Price of the Asset or Commodity.
Cost Type	2	Specifies the costs incurred during purchase of the Contract.
Cost Payment Type	Contract	The payment type by which cost has to be paid.
Cost Amount	37,500	The cost amount for the chosen Cost type in the Purchase Contract Currency.

5.3.3 Cost

[illegible]

Once the contract is authorized then it will be forwarded to next stage of "Purchase" as defined in IS Parameter.

6.6 Maintenance Activities

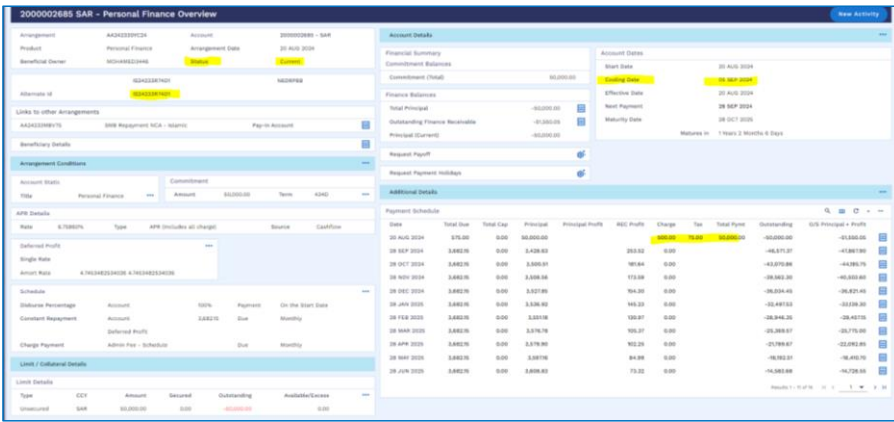

User can perform below Post Disbursement Activities and same activities can be used for servicing app. For servicing app. a separate document needs to be developed for integration purpose, however, calculations and accounting entries will be same in Transact as mentioned in this document as a manual process.

6.6.1 Cancellation within cooling period (WS01-IJR-08)

Cancellation can only be performed after disbursement and when the arrangement is on cooling period. This cooling period starts from the date of loan account creation.

Commented [AH9]: Require the functionality for Ijarah when we can do loan cancellation.

Commented [FUK10R9]: Loan cancellation can be done after delivery of asset.

Once the cancellation process is completed, user needs to open the Arrangement to see the status of the arrangement which changed to the “Pending Closure”.

6.6.1.1 Worksheet details:

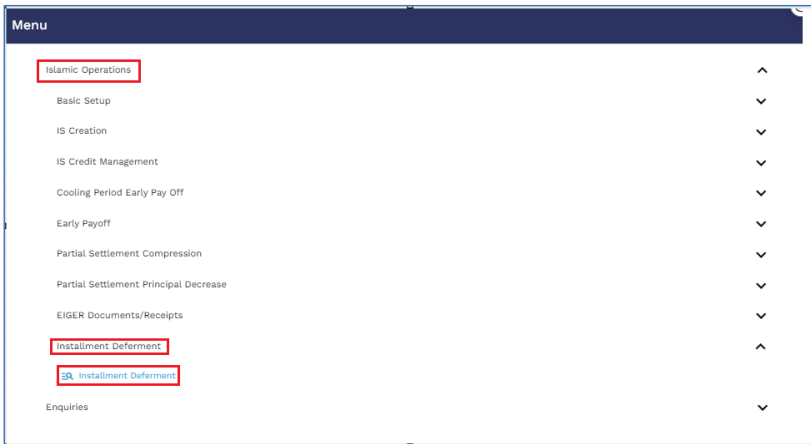

- File name : Tawarruq Working Sheet
- Sheet name : Cancellation and SADDAD Accounting Entries-TA

Cancellation & SADAD Accounting entries are same as defined in referred Tawarruq Working Sheet.

6.6.2 Deferment of Instalments (WS01-IJR-09)

For installment deferment/ skip, customer will follow the following navigation-s:

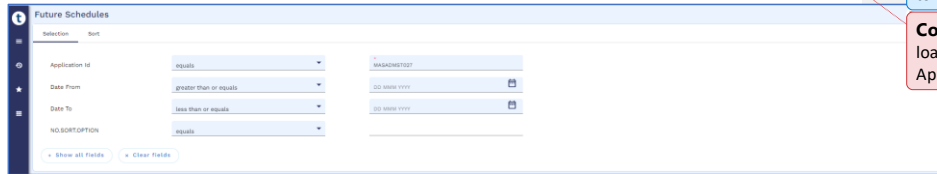

Menu Islamic Operations → Installment Deferment Installment Deferment

Commented [AH11]: Bulk Deferment option is required.

Commented [FUK12R11]: Incorporated in Section 8.39 of this document.

User will put the **application ID** and click on the find icon

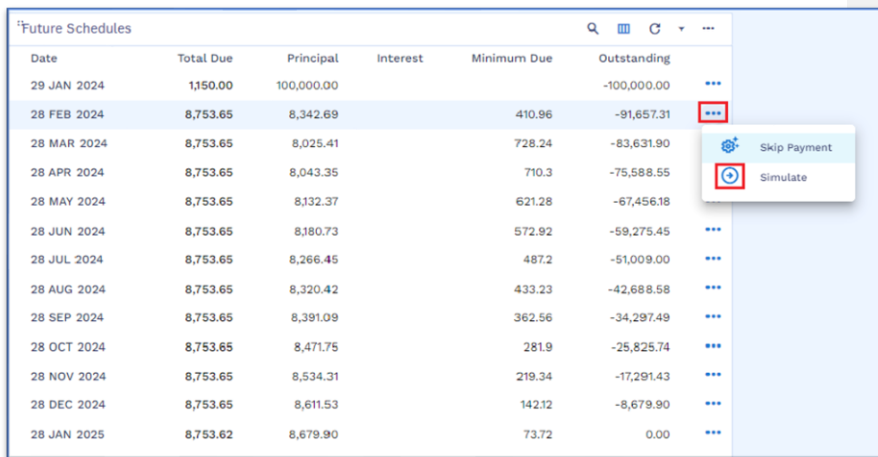

Commented [AH13]: Need CIF and NATIONAL ID option to find the account.

Commented [FUK14R13]: This enquiry will open the loan schedule therefore it can only be extracted from LOS Application ID, IS Contract and Arrangement ID.

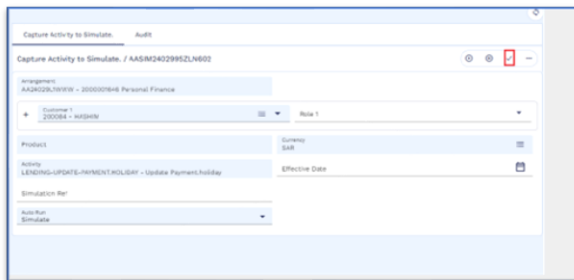

For illustration the upcoming installment on 28 Feb 2024 is going to defer which means there is an increase in tenor by 1 month of the arrangement.

The user will click on the icon located on the right side, which pertains to installments, and then proceed to click on "Simulate."

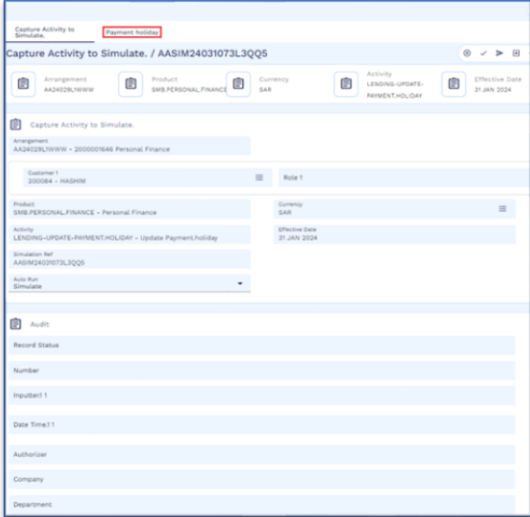

Date	Total Due	Principal	Interest	Minimum Due	Outstanding
29 JAN 2024	1,150.00	100,000.00			-100,000.00

28 JAN 2025	8,753.62	8,679.90		73.72	0.00

Next, validate the activity by using the icon specified in the screenshot below.

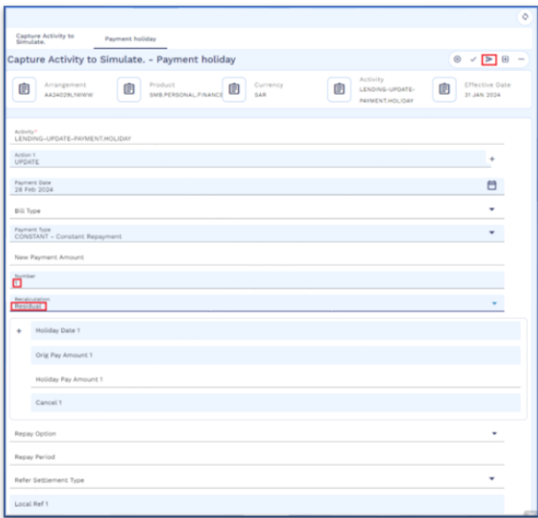

The user will select the "Payment Holiday" tab as indicated in the screenshot below.

The screenshot shows the 'Capture Activity to Simulate' form with the 'Payment Holiday' tab selected. The form includes fields for Arrangement (AA24226769W), Product (SMB PERSONAL FINANCE), Currency (SAR), Activity (LENDING-UPDATE-PAYMENT-HOLIDAY), and Effective Date (31 JAN 2024). Below these, there are sections for Customer 1 (200084 - HADJEM), Rule 1, Product (SMB PERSONAL FINANCE - Personal Finance), Currency (SAR), Activity (LENDING-UPDATE-PAYMENT-HOLIDAY - Update Payment holiday), Effective Date (31 JAN 2024), Simulation Ref (AASIM24031073L3QQ5), and a dropdown for Run (Simulate). At the bottom, there is an 'Audit' section with fields for Record Status, Number, Inputted 1, Date Time 1, Authorizer, Company, and Department.

The user will input "1" in the installment field and select "Residual" for recalculation, where system will skip the instalment and add the same in last instalment.

The screenshot shows the 'Capture Activity to Simulate - Payment holiday' form. It includes fields for Activity (LENDING-UPDATE-PAYMENT-HOLIDAY), Input 1 (UPDATE), Payment Date (28 FEB 2024), Bill Type, Payment Type (CONSTANT - Constant Repayment), New Payment Amount, a dropdown for Reason (with 'HOLIDAY' selected), Holiday Date 1, Orig Pay Amount 1, Holiday Pay Amount 1, Cancel 1, Repay Option, Repay Period, Refer Settlement Type, and Local Ref 1.

Term

Below are some other options that can be used for payment holidays with below functionalities.

- Payment – the payment amount will be changed.
- Term – the term of the arrangement will be altered.
- Residual – the residual amount will be changed.

Following that, the simulation process will commence.

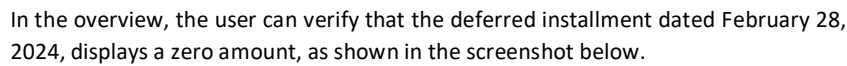

Simulation Status	Processing...
Arrangement	AA240228/10/00
Run Date	27 JAN 2024
End Date	27 JAN 2024
Activity	Update Payment Holiday

Results 1 - 1 of 1

Once the simulation is completed, the user will click on the overview icon as indicated in the screenshot below.

Simulation Status	Completed - Successfully
Arrangement	AA240228/10/00
Run Date	27 JAN 2024
End Date	27 JAN 2024
Activity	Update Payment Holiday

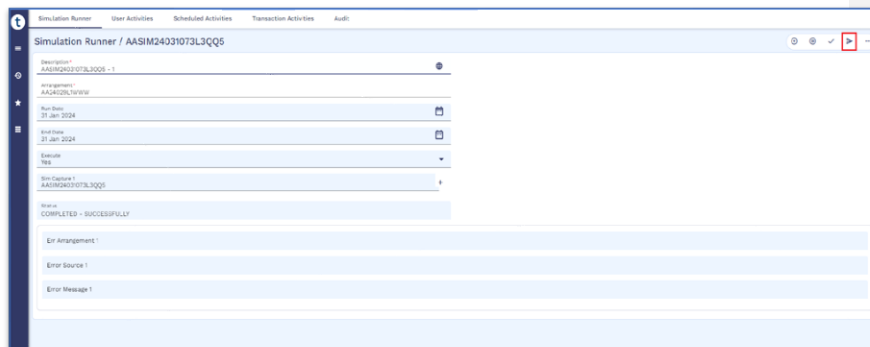

Results 1 - 1 of 1

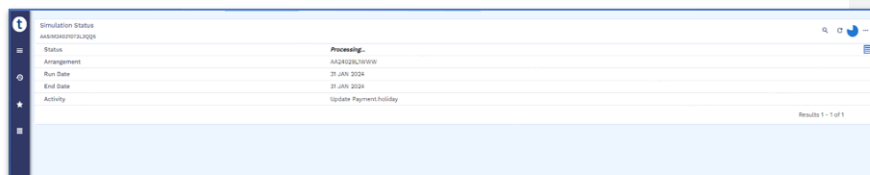

User can also check the last installment amount has increased as it includes the deferred installment amount. User can execute the simulation as mentioned in the below screen short

Public

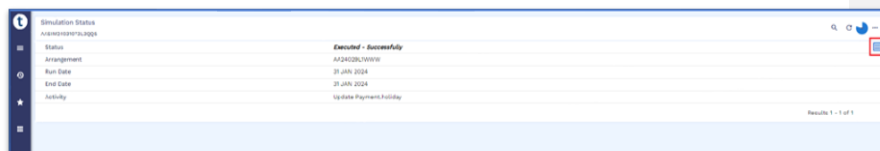

The user will finalize the simulation by committing the Simulation Runner.

The simulation will begin processing.

After a few minutes, the execution will be completed, as depicted in the screenshot below.

Worksheet details:

- File name : Tawarruq Working Sheet
- Sheet name : Deferment-TA
- Deferment schedule is same as defined in referred Tawarruq Working Sheet.

6.6.3 Early Pay off (WS01-IJR-010)

Post cooling period, if customer comes to any FI for early settlement, then Transact provides an option to exercise Payoff functionality. This can be executed from 360 overview of arrangement as mentioned below. A payoff statement is generated that contains all the financial information like, income receivable, principal receivable, any overdue item and fee etc. All such information is part of product setup sheet which is used as client/regulatory specific product requirements.

Commented [AH15]: Calculation for Early Payoff is missing. Require separate calculation due to insurance amount.

Commented [FUK16R15]: Treatment on insurance calculation on early termination is already mentioned in "Day4 – Insurance Entries of Ijarah Working Sheet" from row 129 to 139. Moreover, profit calculation and early settlement fee would be same for all products as mentioned in the document.

Commented [AH17R15]: What will be the Sadad amount for early payoff will it be including insurance raming balance ? Need clear understanding in the document.

Commented [FUK18R15]: Yes I will take the effect of insurance balance.

DOCS1010	DOCS1010	22 AUG 2024	10356.84	10000.00	680.09	0.00	274.86	27 AUG 2024	12	Assets sold

6.6.3.1 SADDAD bill generation and upload rules.

This rule has been developed in order to manage both monthly instalment invoice and early settlement invoice that can be requested at any time.

If the payoff invoice is issued between 29th of the current month till 27th SOD of the following month (considering 28th is cycle date of product) then expiry of the same invoice will be 27th EOD of the following month this is because monthly invoice can be generated on 27th EOD. The early settlement charge will be 3 months starting from next month.

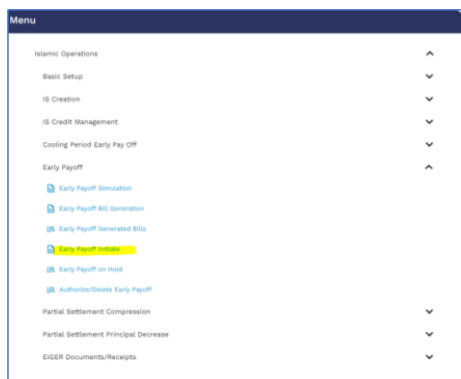

If the invoice is generated on 28th there is no extra accrual and only 3 months early settlement charge starting from the next month will be collected expiry of this invoice will be 28th EOD.

Once customer will pay the Sadad bill then funds are transferred to customer's repayment account which is maintained by Transact, then an automated process will be run to settle customer's loan account and balances. Below is the manual process of the same. There is another process of bulk file upload of FT, for which a format has been designed. Please see sheet name as "DayN-File Upload" in excel file. This is an automated process however user can also manually make FT if required.

Once the required amount is credited to the customer's account a service will be executed to settle the loan account. Below is manual process as well.

User will initiate cancellation by using following navigation

Menu → Islamic Operation → Early Pay Off → Early Payoff Bill Initiate

User will put the application ID and icon on the edit icon

6.6.4 Write off (WS01-IJR-11)

User can write of the arrangement by following the below steps:

User will open the arrangement overview and click on the “New Activity”

The screenshot displays the '200002723 SAR - Personal Finance Overview' page. It includes sections for Account Details, Financial Summary, and Account Dates. The Financial Summary shows a commitment of 120,000.00. The Account Dates section shows a start date of 20 AUG 2024 and a maturity date of 28 AUG 2026. A 'New Activity' button is located in the top right corner of the page.

Commented [AH19]: Need option for bulk write off.

Commented [FUK20R19]: Incorporated in section 8.32 of this document.

User will go to the “write of Arrangement” and click on “do activity today”

The screenshot displays the 'write off arrangement' page. It shows a list of activities under the 'write off arrangement' tab. The activities include 'Write Off Arrangement', 'Write Off Balances', and 'Write Off Bills'. A 'Do Activity Today' button is visible in the bottom right corner of the page.

User will click on the balance maintenance tab

6.6.5 Partial Settlement (WS01-IJR-12)

Partial Settlement can be done in two ways

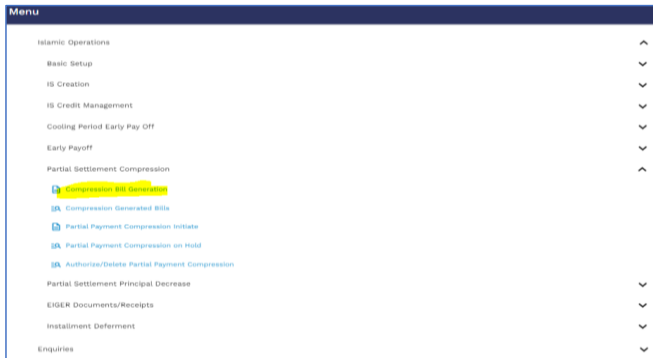

- AA - Compression payment
- AA Principal Decrease

6.6.5.1 AA - Compression payment

In AA – Compression payment customer can settle minimum 2 and 5 maximum instalments. It is on customer's preference either the customer opt to reduce the instalment or reduce the tenor.

User will follow below navigation for Partial settlement

Menu → Islamic Operation → Partial Settlement Compression → Compression Bill Generation

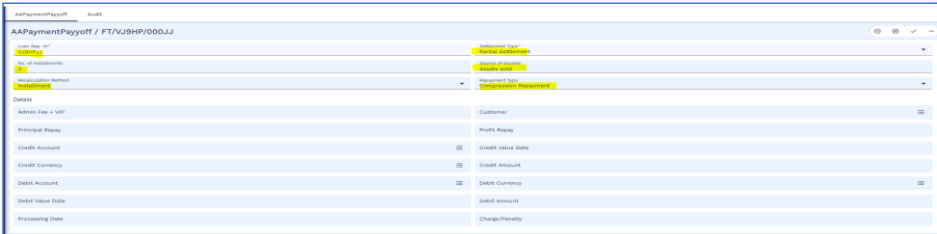

User will click on the edit icon

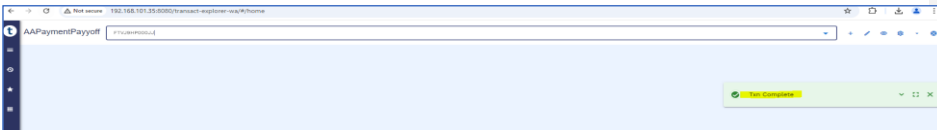

Then mention Loan App id, Settlement Type, No. of instalments, source of income, Recalculation Method and Repayment type.

Please note that if the customer wants to reduce the Tenor, then the Recalculation Method as **“Term”** should be selected, and the customer wants to reduce the instalment amount then the Recalculation Method as **“Instalment”** should be selected.

After that the user will validate the activity through validation icon.

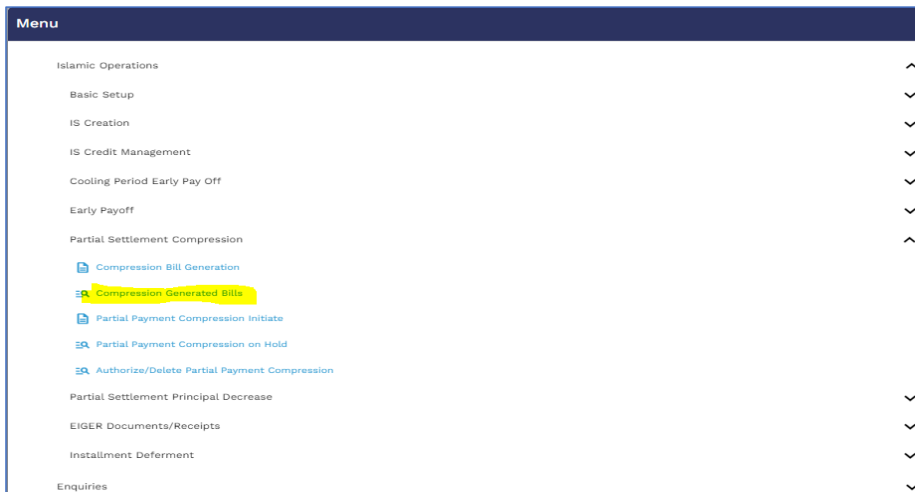

And then commit the record.

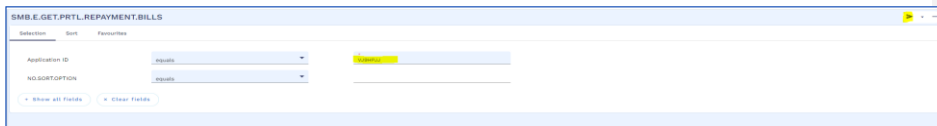

User can check the bill by using below navigation

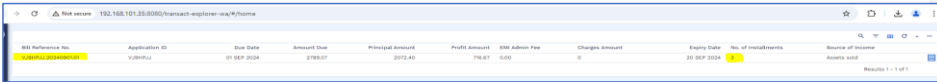

Menu → Islamic Operation → Partial Settlement Compression → Compression Generated Bill

User will put the application ID

Below window will open, User will click on the view icon

Bill Reference No.	Application ID	Due Date	Amount Due	Principal Amount	Profit Amount	EIGER Admin Fee	Charges Amount	Expiry Date	No. of installments	Source of Income
152168101358050	152168101358050	01 SEP 2024	2789.07	2072.40	716.67	0.00	0	01 SEP 2024	1	Assets sold

Generated bill as below, through a service this is integrated with SADDAD. Like other processes, this process can also be integrated with servicing app.

[illegible]

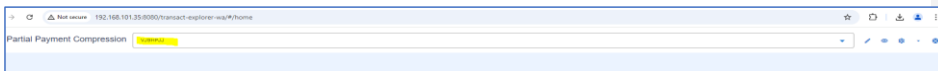

User will make the funds available in customers repayment account as mentioned in early payoff section

Once the funds are available in customer repayment account, user will initiate compression payment as per below navigation

Menu → Islamic Operation → Partial Settlement Compression → Partial Payment Compression Initiate

Menu

6.9 Bill Adjustment & Waiver (WS03-IJR-15)

In case if user wants to adjust any bill (complete or partial or any balance components), below steps need to be followed.

There are multiple bills so user can adjust any bill(s).

Account Static		Commitment		Outstanding Finance Receivable	
Title	Personal Finance	Amount	\$00,000.00	Principal (Current)	-712,500.00
TAPR Details		Term	3Y	Principal (Current)	-478,32727
Rate	19.3396%	Type	APR (includes all charge)	Payoff Statement for	30 JAN 2024
Deferred Profit		Source	Cashflow	Request Payoff	
Single Rate				Request Payment Holidays	
Amort Rate	AA34C3DKJUB-DEFEREDPFT			Additional Details	
Schedule				Bills	
Disburse Percentage	Account	100%	Payment	Outstanding Repayments	
Constant Repayment	Account	12,500.00	Due	Monthly	
Deferred Profit				Due Date	Type
				01 FEB 2024	Installment
				01 JAN 2024	Installment
				01 DEC 2023	Installment
				01 NOV 2023	Installment
					Billed
					Outstanding
					Status
					Stage 19: 0 Days
					Stage 19: 31 Days
					Stage 19: 62 Days
					82 Days

On new activity, system will open all the relevant activity pertaining to this Arrangement. Then go to “Adjust Bills” option.

Arrangement Overview (Lending) - Islamic Lead		2000001891 SAR - Personal Finance Overview		New Activity	
Arrangement	2000001891 SAR - Personal Finance Overview	Account	2000001891 - SAR	Account Details	
Split new Arrangement		Split new offer Arrangement		Suspend Arrangement	
Update Payment Holiday		Release emergency block Account		Update Activity for Account	
Activity Charges		Update Activity Charges Condition		Update Messaging	
Activity Restriction		Update Arrangement Rules		Subscribe to Alerts	
Alerts Definition		Adjust Balances and Bills		Adjust amort Balance Maintenance	
Balance Maintenance		Adjust Balances		Adjust Bill	
		Adjust Information Only Bills		Adjust risk part balance Maintenance	

This activity holds all the unpaid bills with each bill reference separately. Under each bill user will get different balance components like in case of EMI principal and profit. For principal property name is “ACCOUNT” and for profit “DEFEREDPFT”.

User can input the new property amount as “zero” if the total amount is supposed to be waived.

Repayments			
Due Date	Type	Amount	Settled On
01 NOV 2023	Installment	7,197.39	01 FEB 2024
01 OCT 2023	Admin Fee - Upfront	5,750.00	01 FEB 2024

Once the transaction is input and authorized, the bill will be appeared under the tab of repayment with the status as settled and date.

7. Deltas

Following gaps are captured in this document:

33	WS03-IJR-03-05	Offer letter, contract generation and other letters-

8. Detailed Description of Deltas

8.1 Amend IS Contract Stage - WS03-IJR-03-01

Once the IS Contract is created and system has generated the IS Contract number, after that there should be a new stage to amend the Asset Capture stage to add the details like Registration Number, Istemara Number. Bulk upload is also required on this stage which is "Amend Asset Capture".

8.1.1 Solution

Istemara number, ~~and~~ Registration number and Number Plate (English & Arabic) to be capture by user manually in local fields ~~as a~~ required on asset capture. An amendment version of asset capture is also required.

Below is the attach format:

ApplicationID	ISContract	IstemaraNumber	RegistrationNumber	NumberPlateEN	NumberPlateAR
IJR1002001	IS24280T935F	2110001276	1007215682	ABC-1234	-
IJR1002002	IS24280T947G	2110001298	1007215691	XYZ-4567	-
IJR1002003	IS2480T933Z	2110001321	1007215629	DEF-6789	-

ApplicationID	ISContract	IstemaraNumber	RegistrationNumber
IJR1002001	IS24280T935F	2110001276	1007215682
IJR1002002	IS24280T947G	2110001298	1007215691
IJR1002003	IS24280T933Z	2110001321	1007215629

Commented [AH21]: sPlate No in Arabic and English. The field should be different for each letters in Arabic and English.
No should be in separate field.

Commented [FUK22R21]: Like ABC-1234, "ABC" will be capture in separate filed and "1234" in separate team. Please confirm.
Details updated in document.

Commented [AH23R21]: Confirm please add chasis no as well.

Commented [FUK24R21]: Chasis # is already part of core field and it will be captured at time of asset capture.

8.2 List of Vendors - WS03-IJR-02-01

Tamweel Team will provide the Vendor list which needs to be added in Transact the vendor can be active or de-active. Each Vendor will have its own CIF and CIF's account.

- Category wise segregation is required Vendor e.g. Ijarah Vendor, Tawarruq Vendor etc.
- ID number for Vendor (TA please write length and data type)
- VAT Registration Number (TA please write length and data type)
- The TA (SAP) team will provide a unique SAP Vendor Number for each vendor. This number must be stored and associated with the corresponding vendor record in Temenos Transact.
- For Vendor CIF, Customer BSDD must be signed with above information. This BSDD is only for reference.

8.2.1 Solution

TA will list of vendors. OFS will be created as part of Build. This OFS will create CIF, Accounts and vendor record. Further below local ref will be defined in IS VENDOR table to capture product wise and segment wise vendor records. SAP Vendor Number will recorded as an ALT.ID of Vendor Account.

New Fields – Application Name (IS.VENDOR)

S.No.	Field Name	Data Type	Technical Name	Comments
1	Product	Number	SMB.IS.PRODUCT	
2	Segment	Text	SMB.VENDOR.SEG	

An API needs to be exposed to LO.

8.3 Validation for sufficient funds - WS03-IJR-02-02

Before generation of GL (Entry related to contract) a validation is required for sufficient funds in customers repayment accounts. To check that the available balance is equal to the repayment amount. This gap has been parked to LOS where offer letter must not be accepted if customer has not paid down payment, processing fee and insurance. LOS will fetch this information from LMS to confirm the payment. Moreover, following SADAD bills needs to be generated to enable customer to credit funds

- Down payment
- Admin fee with VAT

The admin fees is not based on product setup rather it is based on service provider, Admin Fee values are based on schemes whereas in product we will set the GL in product to manage the APR & this admin fee will be parked in customer repayment acc as an advance amount till the contract is generated.

8.3.1 Solution

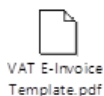

Once the customer accepts the offer a ROSOM bill will be generated for Admin Fee & Down Payment. Rosom bill reference will also be captured on this template. Upon settlement of this bill status will be updated in SMB.DEAL.DETAILS template then Transact will send message to ND through an API that bill is settled.

No partial payment should be allowed on ROSOM bill for Admin Fee & Down Payment.

8.4 E-Invoice for VAT - WS03-IJR-03-02

E-invoice is required to be issued for VAT amount which will be sent to the customer. This VAT will be applicable on insurance and admin fee.

File name : VAT E-Invoice Template

8.4.1 Solution

Solution of this gap has been covered in Section 7.5.1 of Tawarruq BSDD document.

- For VAT invoice creation below fields need to be mapped.
- VAT invoice to be issued for Admin Fee, Down Payment and Insurance amount.
- In case of upfront recovery of Admin Fee (i.e. net of finance), a post routine will be attached on activity API against the activity named as “LENDING-MAKEDUE-ADMINFEEUP” on action Make.Due. Below template will be auto updated upon the authorization of this activity.
- In all other cases, VAT invoice will be generated upon Rosom bill settlement.
- Table name = SMB.ISFIN.VAT

ID Name	Type	Length	Description	Mapping	Sample Value
@ID			ARRANGEMENT ID.PROPERTY NAME.DATE (AA2403237NW9.ADMINFEE.20250304)		
SMB.VAT.REG	N	15	VAT Registration - A local field that will accept VAT registration number. COPMANY>SMB.VAT.REG	Local Ref Required on company table	300434164810003
SMB.INV.NO	N	15	Invoice Number – A local field with a unique invoice number. Auto generated (Arrangement ID. Serial number)	Local Ref Required	AA2403237NW9.001
SMB.INV.DATE	N	Date	Invoice Issue Date – A local field that contains invoice issue date. Auto – current system date	Local Ref Required	2025-01-12
SMB.SUP.DATE	N	date	Date of Supply – A local field that contain date of supply. Auto – current system date	Local Ref Required	2025-01-12
CUSTOMER.ID	N	06	Customer ID – Contains valid customer ID.	CUSTOMER >ID (obtain from	200006

				customer application)	
SMB.SELLER.NAME	T	35	Seller Name – Contains Financial Institution Name. COMPANY>COMPANY.NAME	Local Ref Required	Tameel Aloula Financing Co.
SMB.CUS.VAT	N	15	VAT Registration - A local field that will accept VAT registration number of customer. CUSTOMER>SMB..CUS.VAT	Local Ref Required	311325608800003
BUILDING.NUMBER	N	15	Building Number – Represents the number that identifies the position of a building on a street.	CUSTOMER > BUILDING.NAME	8280
STREET	AN	35	Street Name – Identifies the first line of the Customer's base address.	CUSTOMER > STREET	Prince Bander Bin Abdulaziz
DISTRICT.NAME	AN	35	District - Identifies a subdivision within a country sub-division.	CUSTOMER > DISTRICT.NAME	Prince Bander Bin Abdulaziz
CITY	A	35	City - The City of Customer's physical address.	CUSTOMER > TOWN.LOCATION.NAME	Al Khobar
COUNTRY	A	35	Country – The county of Customer's physical address. This field is used to capture the County of the respective State.	CUSTOMER > COUNTRY	Saudi Arabia

POST.CODE	N	35	Postal Code - Identifies the postal code for customer.	CUSTOMER > POST.CODE	03154
FURTHER.DETAILS	N	35	Additional No – Any relevant further details about customer.	CUSTOMER > FURTHER.D ETAILS	25348
SHORT.NAME	T	35	Client Name – Identifies the name of the Customer in a more descriptive form, and will be used for on-line enrichments in any field where a Customer ID or Mnemonic has been input	CUSTOMER > SHORT.NA ME	MOHAMMAD AHMED
SMB.SERIAL.NO.1	N	15	S. No. – Auto generated serial number. Multi-value field.	Local Ref Required	1
SMB.DESCRPTION.1	AN	35	Description – Local Ref Required. Multi-value field.	Local Ref Required	Management Fee
SMB.GROSS.AMT	N	20	Gross Invoice Amount – Sum of all total fields.	Local Ref Required	115.00
SMB.VAT.RATE.1	N	04	VAT Rate – Applicable VAT rate.	Local Ref Required	17.25
SMB.VAT.AMT.1	N	20	VAT Amount – Calculated field by applying applicable VAT rate.	Local Ref Required	17.25
SMB.DISCOUNT	N	20	Discount – Applicable Discount.	Local Ref Required	17.25

8.5 Routing Entry for VAT - WS03-IJR-06-01

Routing entry for VAT needs to be create as stated in (Day9- Proposed E2E Acct. Ent.)

Worksheet details:

File Name: Ijarah Working Sheet

Sheet Name: Day9- Proposed E2E Acct. Ent.

8.5.1 Solution:-

There are two types of VAT in Ijarah that need to be used for routing. One is VAT on cost and other is VAT on Down payment.

Stage	Date	Debit/Credit	Accounting Entries	Description	Core/ Customized	Account Reflection
	22/08/2024	CR	ACCDEFPT	Unearned Accrued Profit	(270,443.84)	On Balance Sheet
VAT Routing Entry	22/08/2024	DR	VAT INPUT	VAT Input - Internal Account	(75,000.00)	
	22/08/2024	CR	VAT RECONCILIATION A/C		75,000.00	
	22/08/2024	DR	VAT RECONCILIATION A/C		(87,500.00)	
	22/08/2024	CR	VAT OUTPUT	VAT Output - Internal Account	87,500.00	
	22/08/2024	DR	VAT INPUT	VAT Input - Internal Account	(7,500.00)	
VAT Routing Entry of DP VAT	22/08/2024	DR	VAT RECONCILIATION A/C		7,500.00	
	22/08/2024	DR	VAT RECONCILIATION A/C		(7,500.00)	
	22/08/2024	CR	VAT OUTPUT	VAT Output - Internal Account	7,500.00	

From IS. CONTRACT>COST.AMOUNT the amount of VAT on cost will be picked, whereas IS. CONTRACT>DP.VALUE will be used for down payment. For VAT on down payment a local field is required named as IS. CONTRACT>SMB.VAT.DP and IS.SMB.DP where DP.VALUES will be segregated based on VAT % defined in IS.PARAMETER in two different fields. For example, if VAT is defined as 15% then below calculation needs to be executed in order to fill the IS.CONTRACT fields. Once this is auto populated then FT needs to be executed as per given accounting entries. A separate TXN Type will be created for execution of this FT. VAT reconciliation account category will be defined in a separate field as SMB.VAT.RECON through which OFS will be initiated.

		%	Amount
A	Finance Amount		500,000.00
B	Vat on Finance Amount	15%	75,000.00
c=a+b	Total Asset Value		575,000.00
D	DP %	10%	
e=c*d	Total Down Payment from Customer		57,500.00
F	VAT % on DP	0.15	
G	VAT On Down Payment		7,500.00
h=h/(1+f)	Down Payment		50,000.00
i=c-e	Net Finance Amount		517,500.00
	Term		5Y

8.6 Calculate Insurance Balance - WS03-IJR-10-01

A routine needs to be developed for calculating insurance balance (payable/receivable) for normal maturity, early settlement cases and total loss.

8.6.1 Worksheet details:

File Name: Ijarah Working Sheet

Sheet Name: Day4-Insurance entries

8.6.2 Solution

Asset Value WITH vat	120,000.00						
Downpayment	20,000.00						
Monthly Value for Downpayment	333.33						
Downpayment Percentage	17%						
Net Financing Amount	100,000.00						
Depreciation Rate	20%						
First Year Flat Amount from Invoice	5000						
First Year Flat Amount from Invoice %	4%						
		1st Year		Following Years			
Year	Depreciated Value	Premium	VAT on Insurance	Status	Premium	Status	DIFFERENCE
1	120,000.00	5,000.00	750.00	Actual	5000.0	Past	
2	96,000.00	4,000.00	600.00	Projected	3800.0	Actual	- 200.00
3	76,800.00	3,200.00	480.00	Projected	3500.0	Actual	300.00
4	61,440.00	2,560.00	384.00	Projected	2900.0	Actual	340.00
5	49,152.00	2,048.00	307.20	Projected	2500.0	Actual	452.00
	Total	16,808.00	2,521.20	Projected	17700	892.00	
	EMI	280.13	42.02				
	Payable / Receivable	-	892.00	if amount is -ve then Customer is supposed to pay, else TA will payback to customer			

Business /Technical Team:

A template needs to be developed for insurance with ID of application reference named as SMB.INSURANCE.PROJECTED. This will be created once "Approve Quote" / insurance is bought through integration. The template will be used to have EMI of insurance on arrangement. Above excel will be used to see calculations.

Template details= SMB.INSURANCE.PROJECTED

Template Name= SMB.INSURANCE.PROJECTED. ID is Application reference. This template will be created at the time when insurance is bought

S.No.	Field Name	Data Type	Technical Name	Comments
	Arrangement ID	Alpha Numeric	SMB.ARR.ID	It will be updated in this template once arrangement is created.
1	Asset Value with VAT	Amount	SMB.INS.ASSET.AMT	
2	Term in years	Number	SMB.INS.TERM	
3	Value date	Date time	SMB.INS.VALUE.DATE	
3	Down Payment	Amount	SMB.INS.DP.AMT	
4	Monthly DP	Amount	SMB.INS.MON.DP	
5	DP %	Number	SMB.INS.DP.PER	

6	Net Financing Amount	Amount	SMB.INS.NFA	
7	Depreciation Rate	Number	SMB.INS.DEP.PER	
8	First Year Insurance Amt	Amount	SMB.INS.INI.AMT	
9	First Year Insurance%	Number	SMB.INS.INI.PER	
10	Year.1	Number	SMB.INS.YEAR	Auto*
11	Depreciated Value.1	Amount	SMB.INS.DEP.AMT	Auto*
12	Premium.1	Amount	SMB.INS.PREM.AMT	Auto*

*in case of migration

Product Team:

Insurance Cost.

AA payment schedule arrangement condition needs to be set accordingly at the time of LENDING-NEW-ARRANGEMENT activity. Insurance Cost needs to be added in product as credit charge to generate insurance payable and the other is VAT on insurance credit charge to generate VAT insurance payable. **Both of these charges will be amort in nature and will be generated on new activity.** On daily basis PL will be debited with both charges amortized amount. Both amounts will be zeroized on renewal date and new amount will be appeared / update through API of insurance. These charges should be set yearly on arrangement schedule frequency.

This activity will be update SMB.INSURANCE.PROJECTED.ID with future renewal dates by reading from core schedule.

Template details= A template needs to be created for with the name as SMB.INSURANCE.BALANCE

Template Name= SMB.INSURANCE.COST ID is Application reference. This template will be created at the time when insurance is bought.

S.No.	Field Name	Data Type	Technical Name	Comments
1	Payment Date.1	Date time	SMB.INS.PD	Integrated*
2	Amount .1	Amount	SMB.INS.AMOUNT	Integrated*
3	Total	Amount	SMB.INS.TOTAL	Sum of all Amount.n

* This field under cost multivalued will be integrated with Insurance vendor and will be updated at the time of buying Insurance policy and then subsequently on renewal date, once the insurance vendor will be finalized, transaction ID needs to be added in this template. A service will be created to integrate this template on their respective dates in order to get insurance amount on renewal date.

Insurance Revenue:

For insurance revenue, to be on customer repayment schedule two separate debit charges will be configured in product with accrue type. One is insurance receivable and other is VAT on insurance receivable. The amount of these charges will be updated at the time of new arrangement activity, through an API the template SMB.INSURANCE.PROJECTED

Pre-Maturity / Normal Maturity:

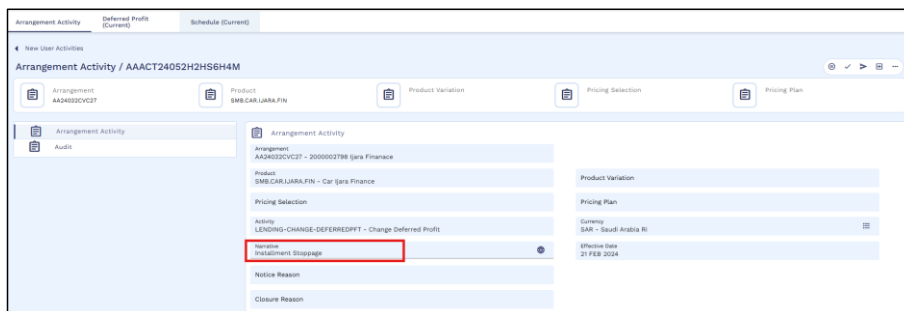

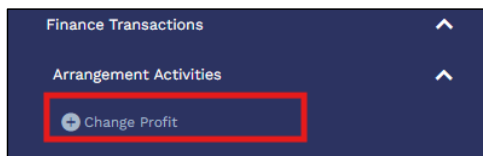

During the pre-maturity or normal maturity, actual vs projected cost will be compared, and two other charges will be set on product, one is Cr and other is Dr. if the calculated amount has -ve balance then Dr charge (insurance receivable from customer) will be triggered and if amount is +ve then payable / Cr charge (insurance payable to customer) will be triggered. All insurance paid amount by customer – all insurance paid by Financial Institutions to vendor.

8.7 Accident Stop Installment - WS03-IJR-06-02

No more instalments should be generated after date of accident, means update profit rate as 0% on contract. A version needs to be given to enable user to change interest rate as zero, along with change of schedule.

8.7.1 Solution:

An input version needs to be created of AA.ARRANGEMENT.ACTIVITY with given activity of LENDING-CHANGE-DEFERREDPFT to make arrangement profit zero and set R_MATURITY against Constant & Charges payment type. This is a manual activity therefore, an authorization version is required. For reinstatement of installments, user needs to execute same activity again with profit rate end next installment date.

If FI wants that accrual of profit should run the instalment deferment can also be executed as mentioned in section 6.6.2

8.8 Insurance configuration WS03-IJR-06-03 to WS03-IJR-06-07

a) **WS03-IJR-06-03** - Insurance Cost will be booked upfront and amortized on a yearly basis. (Note for technical SA Team, it is a credit charge on AA)

8.8.1 Solution

Arrangement Activity - Insurance Cost

Arrangement: AA40022LBOR Currency: SAR Product: SMB.CAR.LIARA.FIN Activity: LENDING-VIEW-ARRANGEMENT Effective Date: 01 FEB 2024

Default Values (Calculation):

Pricing Adjustment:

Default Values (Calculation):

Type: Fixed

Currency: SAR - Saudi Arabia Riyals

Fixed Amount: 5,000.00

Rate: Charge Amount: Min Charge: Max Charge: Amount: Count:

A charge routine will be written for insurance cost and revenue. First year, insurance cost is based on actual insurance amount paid to the vendor and technically will obtain upfront from integration. Based on this amount a projected amount will be calculated for insurance revenue as mentioned in above gap. This Insurance revenue will become as part of EMI.

Arrangement Activity - Schedule (Current)

Arrangement Activity - Insurance Revenue									
	Arrangement AA34032LBNR		Currency SAR		Product SMB.CAR.LIARA.FIN		Activity LENDING-VIEW-ARRANGEMENT		Effective Date 01 FEB 2024
									
									
									
		Type Fixed							
									
		Currency SAR - Saudi Arabia Riyals							
									
		Fixed Amount 345.00							
		Rate				Charge Amount			
		Min Charge				Max Charge			
		Amount				Count			

A charge routine will be written for insurance cost and revenue. First year, insurance cost is based on actual insurance amount paid to the vendor and technically will obtain upfront from integration. Based on this amount a projected amount will be calculated for insurance revenue as mentioned in above gap. This Insurance revenue will become as part of EMI.

Arrangement Activity - VAT - Personal Finance

Charge Payment	396.75	Due	Insurance Revenue	345.00
			VAT - Personal Finance	51.75

c) **WS03-IJR-06-05** - For early settlement there will be routine to calculate the amount of insurance balance by comparing the amount of Insurance Cost paid from template and subtract the monthly charge (insurance revenue). For calculation of insurance please refer to section 8.6

8.8.3 Solution

A routine will be written to calculate insurance payable / receivable at the time of normal / prematurity. This routine will be placed on activity LENDING-SETTLE-PAYOFF and LENDING-CALCULATE-PAYOFF. As explain in gap WS03-IJR-10-01.

d) **WS03-IJR-06-06** - VAT E invoice will be generated on monthly basis i.e. on instalment date. For invoice format please refer to section 8.4.

8.8.4 Solution

Solution of this gap has been covered in Section 8.4.1 of this document.

e) **WS03-IJR-06-07** - An enquiry needs to be developed to determine the total-loss of any arrangement for which a local template is required. Please refer to section 8.26.

8.8.5 Worksheet details:

For all above points, below is reference excel.

File Name: Ijarah Working Sheet

Sheet Name: Day9- Proposed E2E Acct. Ent. (for a & b), Day-1 Insurance (for c),

8.8.6 Solution:-

A template needs to be created for Total Loss with ID as arrangement reference with below fields.

Template Name= SMB.PAYOFF.CLAIM

S.No	Field Name	Data Type	Technical Name
1	Date of Total Loss	Date time	SMB.INS.TL.DATE
2	Responsibility %	Number (3)	SMB.INS.RESP
3	Additional charges	Amount	SMB.INS.CHARGES
4	Insurance Claim	Amount	SMB.INS.CLAIM
5	Net Death Claim	Amount	SMB.INS.NDC
6	Flag Type	LOVs 1. Total Loss	SMB.AACT.TYPE

Total Loss				
Variables	Fields	Values	Nature	Remarks
A	Date of Total Loss	4/28/2024	User Input

Total		63,692.44	
Net Claim Collected from Insurance Company		-41,768.97	
Remaining Amortization DP Collected		-1,429.35	
Death Claim		-100,000.00	
Total Insurance Collected		-101,641.14	
Reversal Accruals		-1,247.50	
Total		-155,088.96	
Operational Loss		4,193.21	
Total Payable or Receivable		-95,587.74	
Itemised by Type - 29 JAN 2024			
Type		Amount	
Current		-95,587.74	
Settle by Payment Order			

Step 1

User needs to reverse all the bills that have been generated after the date of Total loss as explained in section "Bill Adjustment and Waiver".

Step 2

In the second step, user needs to input authorize above template to input below fields.

- Date of Total Loss
- Responsibility %
- Additional Charges
- Net claim collected from Insurance Company (if available)
- Death Claim (if available)

An OFS will be posted for Net Claim Collected and Death claim amounts as stated in proposed transact entry.

Step 3

User needs to run "Early Pay Off" as mentioned in process WS01-IJR-010.

Step 4

A total loss enquiry needs to be developed which will reflect all values once above 3 steps are successfully completed. This enquiry is actually the merger of core pay off statement and the one input by user at step 2, so that book values and other financials can be shown in single enquiry.

Step 5

Based on the amount payable / receivable, below entries needs to be executed

Once this SBM.INSURANCE.CLAIM is authorized, the field SMB.ACCT.TYPE will be auto populated to AA.PR.DES.ACCOUNT>SMB.EP.FLAG

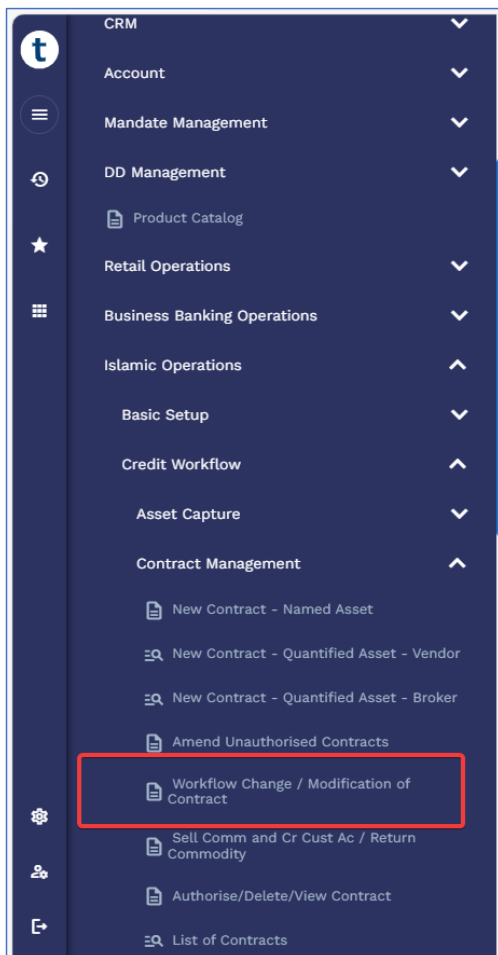

Financial Events	PROPOSED TRANSACT ENTRY	DR	CR
Step-1: Reversal of Installments recovered post Loss event	Profit reversal	728.42	
	CUSTOMER A/C		728.42
	Insurance reversal	519.08	
	CUSTOMER A/C		519.08
Insurance death claim (Auto FT-1)	Insurance Claim - Death	100,000.00	
	CUSTOMER A/C		100,000.00
Insurance assets claim (Auto FT-2)	Insurance Claim - Assets	41,768.97	
	CUSTOMER A/C		41,768.97
(100%-Responsibility%)*(Total Remaining*Net Claim received from Insurance) (Auto FT-3)	Operation losses	4,193.21	
	CUSTOMER A/C		4,193.21
Insurance balance receivable* / payable from customer (Part of AA Payoff Activity)	CUSTOMER A/C*	2,895.91	
	Insurance Revenue		2,895.91
AA Payoff Activity (Auto FT-4)	CUSTOMER A/C	48,726.04	
	CURACCOUNT		48,726.04
	CUSTOMER A/C	5,353.83	
	RECDEFPFT		5,353.83
	ACCDEFPFT	5,353.83	
	PL		5,353.83
	PL	5,353.83	
	PAYBONUS		5,353.83
	PAYBONUS	5,353.83	
Net of Insurance claim payable to customer (Auto FT-5)	CUSTOMER A/C	95,587.74	
	Tamweel Bank		95,587.74

An enquiry will be required for Tamweel Internal Account from where user can identify how many IBFT to executed to customer account.

8.10 Reversal for Asset Capture and IS Contract - WS03-IJR-03-03

After Asset Capture and IS Contract creation, reversal is also required. This is part of core.

8.10.1 Solution

Amend Contract - Islamic Lead

Customer	Customer Name	Product	Purchase Reference	Commodity	Asset Reference	Purchase Date	Purchase Price	Total Purchase Price	Previous Status	Current Status	Next Status
200101	Muqaddas Jafari	SMB Personal Finance	IS240305LQWF	SI - Iron		30 JAN 2024	0.00	0.00	REQUEST	APPROVAL	APPROVAL
200012	KASHIF UMAIR	Ijarah	IS240322PHVR	S - Miscellaneous Asset	MISC240322PF2PL	01 FEB 2024	10,000.00	10,000.00	APPROVAL	PURCHASE	PURCHASE

Next Action: Amend Contract, Reverse Contract

8.11 Expiry of Repayment Schedule (Delivery Stage) - WS03-IJR-02-03

AA financing will be opened through manual user intervention with minimum input. At this stage system will create repayment schedule along with all financials including APR.

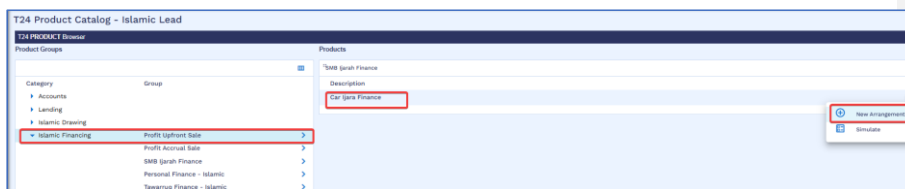

8.11.1 Worksheet details:

File Name: Ijarah Working Sheet

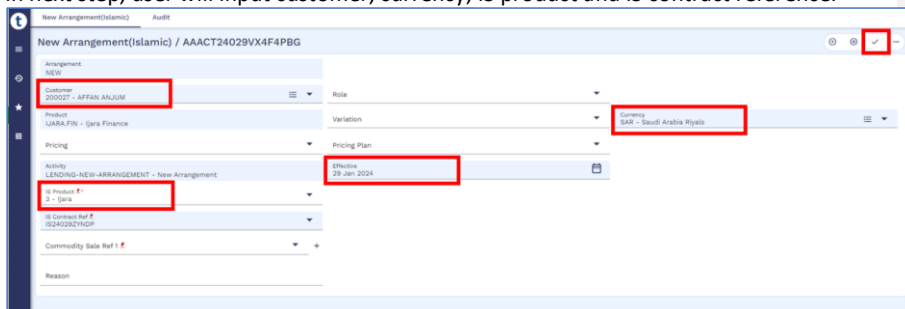

Sheet Name: Flat Rate APR – Ijarah

8.11.2 Solution

As per below navigation, user needs to select right AA lending product in order to create loan account. This will create a schedule based on the product setup sheet.

In next step, user will input customer, currency, IS product and IS contract reference.

Most of the fields will be auto populated from IS.CONTRACT including Interest Rate and any Discounts as already mentioned in this document. In order to facilitate future flexibility in product, this arrangement conditions are auto populated based on Product setup sheets and other gaps. However, if user wants to change this, he/she will be enabled to do so by setting up conditions as negotiable.

8.12 Document upload at Delivery Stage - WS03-IJR-06-09

At the time of delivery, documents need to be uploaded, a technical assessment is required. TA will provide list of documents and sample format.

8.12.1 Solutions:

For document upload, a new EB.FILE.UPLOAD.TYPE will be created to upload file on the desired location on the server from where the background service will pick up the file and push into the storage.

There will no search engine in Transact

8.13 Validation on pre-paid charge - WS03-IJR-06-10

For all pre-paid charges mentioned in excel sheet, there is no role of infinity. TA LOS will send request and LMS will generate SADDAD bill, once it is received then system will automatically settle the amount. There must not be any overdue item before sending

services request. Validation is required. These charged are not part of amortization table/ repayment schedule.

Worksheet details:

File Name: Ijarah Working Sheet
Sheet Name: Day2-Ijarah Charge List

8.13.1 Solution

For every charge, there is a separate parameter table will be used as mentioned below

Template Name= SMB.ADHOC.CHARGES

ID of this template will be technical name of the product, should be vetted with AA.PRODUCT.

S.No	Field Name	Data Type	Technical Name	Comments
1	Charge name.1	Character	SMB.CHG.TYPE	LOVs* 1. Sales Doc 2. Add actual driver 3. Ownership Transfer 4. 3M Authorization 5. Insurance Extension (GCC) 6. Insurance Extension (Bahrain) 7. 3M Authorization (Jordan) 8. 3M Authorization (GCC) 9. Borrow of Spear key
2	Charge amount.1	Amount	SMB.CHG.AMT	
3	Charge Debit Categ.1	Account number	SMB.CHG.DRCAT	

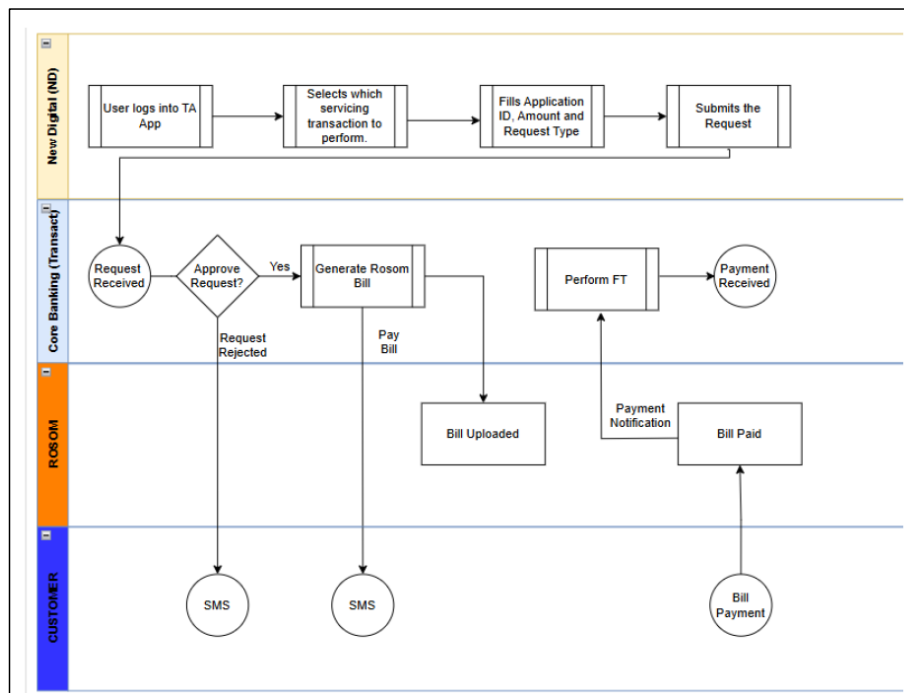

4	Charge Credit Categ.1	Account number	SMB.INS.CRCAT	
5	Transaction type.1	FT.TXN.TYPE.CONDITIONS	SMB.CHG.TXN	

*This should come from ND.

From ND, customer will send a request of all above payments, and then a SADAD bill will be generated. Once the customer will pay a service by reading above parameter will execute transaction.

An API will also be given to ND to check the eligibility of this charge before the customer sends request. If there is any overdue item left, then customer will not be eligible to send request. He / she is supposed to pay any overdue bills before sending ad-hoc charge request.

As the recurring bill is generated seven days prior to monthly installment bill therefore integration with ROSOM needs to check by technical team how to manage these Ad-hoc charges request initiated from 21st to 27th.

8.14 Traffic Violation / Renewal Fee - WS03-IJR-06-11

The traffic violation and Renewal fee will be added in schedule manually by user, if it is from 1st to 20th of any month then this bill will be set for current month instalment due date +1 day, else it will be set on next month instalment due date +1Day. This setup will be done by users on arrangement level, whenever these charges are incurred by TA.

TA also needs bulk service upload file for traffic violations/other manual services if any.

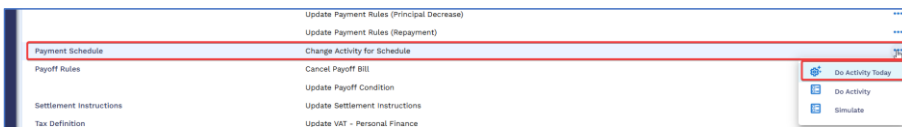

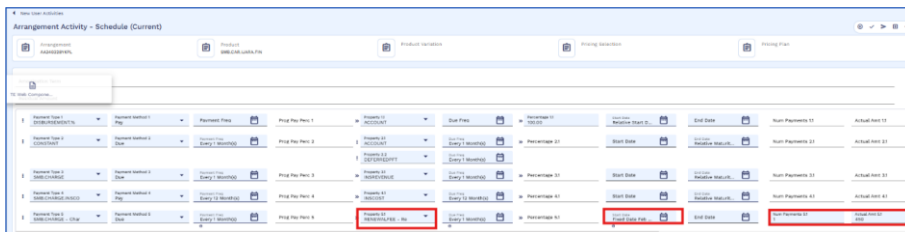

Bulk upload for other charges.

8.14.1 Solution

As a first step user needs to go “New Activity” tab on Arrangement architecture 360 overview. Then go to define change shcedule as mentioned in below screenshot. This activity is based on maker and checker.

Renewal Fee needs to be setup on schedule, where fixed date provided as for example as 29 February whereas instalment date is 28th February. Please note that user also need to mention Num payment =1 and actual amount = renewal fee amount against renewal fee property in payment schedule.

FILE_NAME	ARRANGEMENT_REF	CIF_ID	START_DT	NUM_PAYMENT	ACTUAL_AMT
-----------	-----------------	--------	----------	-------------	------------

Traffic_Violation_Fileupload_15022024	AA240303GMNH	200006	29/03/2024	1	450
Traffic_Violation_Fileupload_15022024	AA24030MN0GH	200006	29/03/2024	1	420
Traffic_Violation_Fileupload_15022024	AA24029CF925	200012	29/03/2024	1	400

8.15 Advance/Partial Payment - WS03-IJR-12-01

There is a possibility that customer transfers funds from IBFT where there is no invoice number (It is treated as Advance Payment), in this case if any request of partial payment/ payoff is received the invoice/bill amount will be net off with this advance amount and in case, the resulted amount becomes zero then only simulated schedule will be sent to customer and upon the acceptance of this schedule entry will be passed.

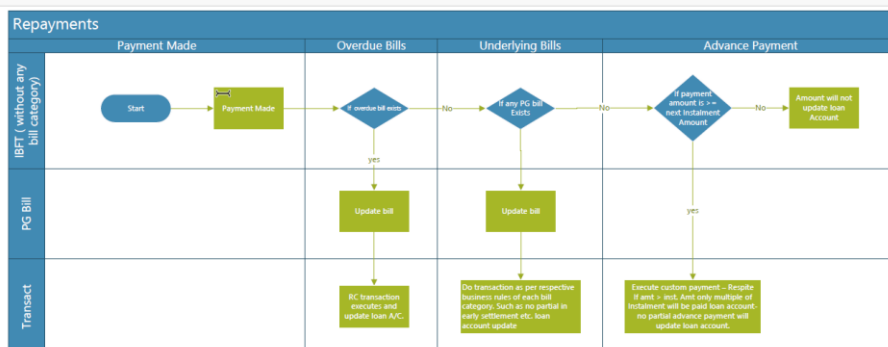

Worksheet details:

File Name: Ijarah Working Sheet

Sheet Name: DayN-File Upload

8.15.1 Solution

Whenever there is payment received in customer repayment account from IBFT, that payment will be settled in below set of events. Further this advance payment will also impact early settlement calculation as mentioned in this section. **Moreover, it is pertinent to mentioned that Advance Payment option is not available on servicing app.**

1. Settle overdue bill if any and update Payment Gateway (PG) bill template.
2. If PG bill exist and payment amount is sufficient to settle the existing bill fully, then update PG bill and execute the respective bill activity accordingly in transact to execute the transaction. For example,

Bill Category	Activity
Payoff	Payoff Activity
Partial	Partial Settlement Activity
Recurring	Respite Activity

- If no PG bill exist and funds will be sufficient to recover future installments fully then it will be utilized to settle future installments fully through Respite Activity and leave the remaining amount in customer repayment account.
- If funds will not be sufficient to recover full installment amount, then these funds will remain available in customer repayment account. Any subsequent request for partial payment/ payoff is received then invoice/bill amount will be net off with this advance amount. This is already available that whenever there is an excess payment, system will generate zero bill invoice.

Smb Ad Fee Emi 1	359.35
Smb Chrg Ep 1	0
Smb Recalc Mthd	Installment
Smb Repay Type	

Impact on Early Settlement Calculation:

When a customer makes an advance payment (shifting their next repayment date forward) and later requests early settlement, the profit from the already-paid installment should **not** be included in the 3-month profit charge calculation. In this case, the early settlement calculation should only include the profit from the three unpaid months following the most recent paid installment.

If the customer has already paid the current month's installment through an advance payment, then the current month's profit should **not** be included in the early settlement calculation.

8.16 Limit Attachment before Arrangement -WS03-IJR-06-12

Limit and collateral need to attach before creating Arrangement. Both of these should be auto populated on arrangement level.

8.16.1 Solution

Upon the authorization of IS Contract as explained in gap WS03-IJR-02-05, limit record needs to be created along with collateral code attached. This limit record then will be written on SMB.DEAL.DETAILS, IS.CONTRACT and at the time of arrangement creation, this limit will be auto populated on Limit arrangement condition. For this purpose, a routine will be written and attached on activity LENDING-NEW-ARRANGEMENT.

8.17 Tawtheeq Integration - WS03-IJR-06-13

Integration with Tawtheeq is required. This should be covered in integration session.

8.17.1 Solution:

This is part of IDD and is out of scope of this document.

8.18 Discount - WS03-IJR-06-14

Discount from Vendor

- A Discount Percentage will be provided by LOS, as mentioned in E2E Accounting Entries. TA needs to decide whether this % will come from LOS or it should be set on parameters. Accordingly, solution will be provided.

LO will share Total Amount, Discount Percentage, Discount Amount and Net Amount. Discount is part of scheme.

The discount of Vendor will be amortized in Ijarah

Discount from Tamweel:

There is possibility that customer will get discount for example first two instalment are free, means TA will settle these accounts internally from Marketing Expense

TA is giving any free instalment to customer (settling the first N bills through their internal account), in this case there wouldn't be any changes in customer's APR. Moreover, since this is instalment free period for customer no SADAD bill should be generated. Free Instalments number should be communicated by LOS to LMS.

8.18.1 Worksheet details:

File Name: Ijarah Working Sheet

Sheet Name: Day9- proposed E2E Acct.Ent.

8.18.2 Solution

Discount from Tamweel:

Refer to accounting entries mentioned on "Day9- Proposed E2E Acct. Ent." Cell B131, where TA will settle first few instalments of the customer and then on month end marketing expense will be booked for cases. Below is the solution.

A parameter needs to be set on IS.CONTRACT on product level. Where below list of local fields will be added. All these fields will come from LOS and mapping is required.

APPLICATION NAME = IS.CONTRACT

S.No	Field Name	Data Type	Technical Name	Comments	Description
1	Discount Type1	Character	SMB.DISCOUNT.TYPE	LOVs* 1. Discount from VTCO 2. Discount from COTCU	1. discount from vendor to Company (discount %) 2. Discount from Company to customer (X number of Instalment will be paid by Company)
2	Discount Percentage	Number	SMB.DIS.PER	Length =3	% of discount for above LOV1. Conditional mandatory
3	Number of Installments	Number	SMB.NO.INST	Length =3	X number of Installment for above LOV2. Conditional mandatory.

*Mapping has been added to "Ijarah Working Sheet" sheet name "List of Fields"

APPLICATION NAME = IS.PARAMETER

S.No	Field Name	Data Type	Technical Name	Comments
1	Discount type.1	Character	SMB.DISC.TYPE	LOVs* 1.Discount from VTCO 2.Discount from COTCU 3. vat on discount
2	Transaction Type.1	Vetting from FT.TXN.TYPE.CONDITIONS	SMB.TXN.TYPE	For Lov 1 and 2
3	Dr Category.1	Vetting with CATEGORY table	SMB.DIS.DRCATE	
4	Cr Category.1	Vetting with CATEGORY table	SMB.DIS.CRCATE	

5.	Transact Frequency.1	Transaction frequency	SMB.FRQ.TXN	LOVs 1. Online 2. COB
6	Settlement category for Discount	Vetting with CATEGORY table	SMB.SUS.ACCT	Settlement internal account for COTCU. Conditional mandatory

VTCO

Discount	22/08/2024	DR	Multisupplier Account	Internal Account	(50,000.00)	On Balance Sheet	Through FT OFS,
	22/08/2024	DR	Multisupplier Account	Internal Account	(7,500.00)	On Balance Sheet	Upon the
	22/08/2024	CR	Revenue Discount Received from Dealers	Impact P/L	50,000.00	On Balance Sheet	authorization of IS
	22/08/2024	CR	VAT input Inventory	VAT on discount received	7,500.00	On Balance Sheet	Contract

A debit charge will configure for discount from vendor that will be set as Amort over term of arrangement.

COTCU

Below standard arrangement conditions will be set on product level for Ijarah product. If there is no discount, then customer repayment account will be defined as payin account for both payment types else internal account will be used for recovery of discount period installment as mentioned in below screenshot.

Advanced - Pay In

Payment Type	Active	Rule	Account	Account Debit Activity
Payment Type 1: ACTUAL	Payin Settlement 1 Yes	Payin Ac Db Rule 1 PARTIAL	Payin Account 11 2000008705	Payin Activity 11 ACCOUNTS- DEBIT-ARRAN
Payment Type 1.2: LINEAR

Payment Type 2: CONSTANT VENDOR	Payin Settlement 2 Yes	Payin Ac Db Rule 2 FULL	Payin Account 21 USD1660300071005	Payin Activity 21 ACCOUNTS- DEBIT-ARRAN

End date field against Payment Type = Constant.Vendor will be updated based on number of installments allowed as discount else it will be set as R_START. For regular installments Start Date field will be set as R_START plus one month in addition to number of discount installments else it will be set as R_START+1M.

Installment Term

Payment Type	Payment Method	Payment Plan	Prin Pay Plan	Property	Due Date	Percentage	Start Date	End Date
Payment Type 1: CONSTANT VENDOR	Payment Method 1: Pay	Payment Plan 1: Constant	Prin Pay Plan 1: Constant	Property 1: ACCOUNT	Due Date 1: 10/05/2025	Percentage 1: 100.00	Start Date 1: 10/05/2025	End Date 1: 10/05/2025
Payment Type 2: CONSTANT	Payment Method 2: Date	Payment Plan 2: Constant	Prin Pay Plan 2: Constant	Property 2: ACCOUNT	Due Date 2: 10/05/2025	Percentage 2: 100.00	Start Date 2: 10/05/2025	End Date 2: 10/05/2025

Discount to Customer					
there is possibility that customer will get discount for example first two instalment are free, means TA will settle these accounts internally from Marketing Expense					
below is Accounting example					
the discount will always be First Few Instalment and not in end or in b/w					
	Due Date		Dr		Cr
Case 1	28-Jan-24	TA internal Account	1000		
		Loan Receivable			1000
Case 2	28-Jan-24	TA internal Account	1500		
		Loan Receivable			1500
Case 3	28-Jan-24	TA internal Account	2500		
		Loan Receivable			2500
Month End					
		PL * Marketing Expense	5000		
		TA internal Account			5000

The above month end transaction will be executed through a batch of on month end.

Since arrangement will be opened manually therefore, a routine will be written. This routine will be attached on activity API on activity LENDING-NEW-ARRANGEMENT with action UPDATE. If SMB.DISC.TYPE has LOV COTCU then arrangement settlement and schedule conditions will be auto populated on validation with below values.

AA.PAYMENT.TYPE for X number of installments in schedules and same AA.PAYMENT.TYPE will be used for settlement account by reading field IS.PARAMETER>SMB.SUS.ACCT.

Technical Note: - In case of COTCU SADAD bill not be generated till the time of discounted installment is set. As discussed in the meeting there is no impact of instalment free period on APR. (email of 06/02/2025)

8.19 Post Delivery Cancelation

8.20.1. With Court Decision - WS03-IJR-10-02

Customer is supposed to pay all the bills and accrued Profit before the date of Judgement and rest should be manually waved by user.

Receivable from customer

Customer	Dr	
Receivable		Cr

Waiver/Write-off after Court Judgment will be executed as per section 6.9.

PL Operation Loss	Dr	
Receivable		Cr

Requirement is to add date of judgement

8.19.1 Solution

Below local field will be added in given application in order to store date of judgement.

This date will enable users to waive the bills that have been generated post-court decision.

Application name = AA.PR.DES.ACCOUNT and ACCOUNT table

S.No	Field Name	Data Type	Technical Name	Comments
1	Date of judgement	Date and time	SMB.DOJ	Date of judgment
2	Auction amount	Amount	SMB.AUCTION.AMT	Auction amount field to be used in pay-off
3	Activity Type	LOV	SMB.ACTIVITY.TYPE	LOV 1. Auction (EPC will be taken) 2. Restructuring (no EPC) 3. Total Loss (no EPC) 4. Cancellation with Court (no EPC) 5. Reposes 6. Waiver 7. WOFF 8. RESCHEDULED 9. DEFERMENT 10. TOTAL LOSS 11. CANCELLATION AND DECEASED ** LOV's from 7 to 11 are already covered in Tawaruq BSDD.

In this case, user will select LOV as “cancellation with court” and input the value in “date of judgment”.

Tier Groups Levels						
Tier Type 1 Level	Calc Type 1 Percentage	Charge 1 2.00	Chg Amount 1	Tier 1	Tier Max Charge 1	Up to 1
Date of Judgement						

Beneficiary Details					Request Payment Holidays				
Arrangement Conditions					Additional Details				
Account Static		Commitment			Bills				
Title		Personal Fx		Amount	100,000.00	Term	TY		
PR Details					Outstanding Repayments				
Rate		19.5730%	Type	APR (includes all charge)	Source	Cashflow			
Deferred Profit					Due Date	Type	Billed	Outstanding	Status
					01 FEB 2024	Installment	9,368.95	9,368.95	Stage-Ib 18 Days
					01 JAN 2024	Installment	9,368.95	9,368.95	Stage-Ib 49 Days
					01 DEC 2023	Installment	9,368.95	9,368.95	Stage-Ib 80 Days

As mentioned in section 6.9 (Bill adjustment and Waiver), by this option user will waive installments bills that have been generated post-court decision. Once this is completed then section 6.6.3 (Early Payoff) will be run to close and settle this arrangement. For early payoff, no EP fee will be taken in this case, and all unearned profit will be discounted.

8.20.2. Without Court Decision - WS03-IJR-10-03

TA will sell out the Car in market through auction and settle the principal, earned income, any dues. Any difference will be paid by the Customer. Early Termination functionality will be used without any additional fees (no 3 months profit fee will be taken in this case) and if the vehicle was sold less than the outstanding balance amount then difference will be paid by customer. For this, a payoff statement is required.

The payment process of auction will be executed via manual payment that is new customer will send money through bank transfer. Then a file of repayment will be upload. (same is being used in Repayment with marking on field “RECEIVEDFROM” = Auction). This file will contain single car price. Dr. Tamweel Internal Account and Cr. Settlement Account. So, if the customer (Bidder) has paid 50,000 SAR then below entry will generate.

Car Remaining Principal + Dues = 65,000

Auction amount it 50,000

Tamweel Internal A/C	Dr 50,000
Settlement repayment/disbursement A/C	Cr 50,000

Settlement of Loan

Settlement A/C	Dr 50,000
Customer Account	Cr 50,000

A payoff needs to be run after getting auction amount in order to calculate net-off amount. Customer will transfer the differential amount that is **15,000**. The collection department will send notification through email or call and SADDAD bill will also be generated. Now after payoff statement below entry will be executed through user manually.

Differential amount 15,000 paid by customer

Tamweel Internal A/C	Dr 15,000
Customer repayment/disbursement A/C	Cr 15,000

Loan Settlement

Customer repayment/disbursement A/C	Dr 65,000
Loan Account	Cr 65,000

Requirement is to add auction amount field in payoff statement.

8.19.2 Solution

Below field will be added in template to record auction amount.

Template Name= SMB.PAYOFF.CLAIM

S.No	Field Name	Data Type	Technical Name
1	Auction Amount	Numeric	SMB.AUCTION.AMT

An activity will be given to customer to add auction amount with flag that will be updated by user once auction amount received by TA.

Account Status

ChargeOff Activity

Release emergency block Account

Update Activity for Account

Alternate ID 4
IS.REF

Alternate ID 5
LOS.ID

Auction Amount
50000

Account Reference
2000003886

Customer Reference

Origination Ref

Step 1:- user will go to activity , input and authorize auction amount and will select LOV as mentioned above in the field SMB.EP.FLAG as "Auction". System will automatically update template SMB.PAYOFF.CLAIM and post an OFS that will pass the below accounting entry.

Tamweel Internal A/C (Bank)	Dr 50,000
-----------------------------	-----------

Settlement repayment/disbursement A/C

Cr 50,000

Step2:- a pay- off simulation will be run as mentioned in section 6.6.3

Step 3:- a local enquiry will be build for auction purpose that will merge both of enquiries – core payoff and Auction one (SMB.PAYOFF.CLAIM Enquiry) and show the results as net payable / receivable. A Rosom bill generation option is required if total outstanding amount is less than auction amount.

Step4: once the payment is received, an enquiry will contain all such information and then user can input and authorized this transaction.

8.20 Termination (in case of reposcar) - WS03-IJR-10-04

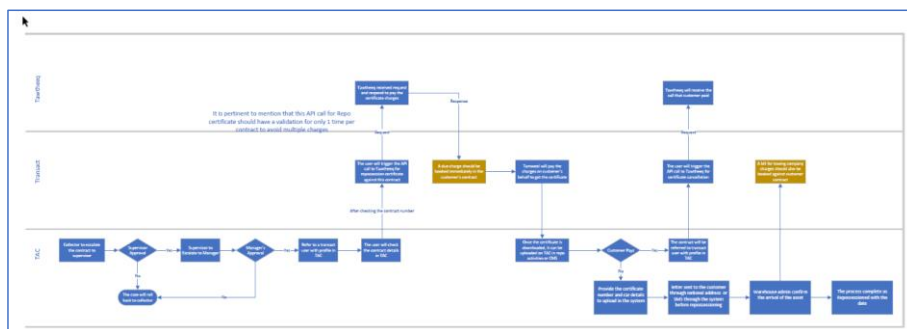

The repossession process will be executed in TAC, however, once TAC user confirms T24 user about the completion of process then T24 user will park a flag of repossession on that arrangement. In the second step the user can add couple of charges as mentioned below.

“Repo certificate charges” and “towing company charges” these charges will become part of arrangement and whenever user will go for payoff, this will appear as due.

In the repossession process, all the overdue items will be collected, insurance, profit and principal. For future insurance balance will be calculated and profit will be discounted, if the auction amount is not sufficient the rest of the principal part will be aged. A flag of repossession required.

8.20.1 Solution

As part of TAC solution, below Process flow has been finalized and based on that repossession solution is being provided in this document.

A new template named as SMB.REPOSSESS will be created that will be generated through Tawtheeq integration. Further this template will also be updated through integration with TAC for any additional charges like “Towing Fee” and integration with Tawtheeq for “repo certification charges”. Following fields will be defined in this template.

Template Name: SMB.REPOSSESS

S.No	Field Name	Data Type	Technical Name
1	ID	Arrangement reference	SMB.ARR.ID
2	Application	Application reference	SMB.APP.ID
3	Customer	Customer CIF reference	SMB.CUS
4	Fee Type.1	A multi-value field that will contain	SMB.FEE.TYPE.1

		LOV of charge property like REPOCERTIFICATE, TOWINGFEE.	
5	Fee Amount.1	A multi-value field that will contain fee amount.	SMB.FEE.AMT.1
6	Fee Date.1	A multi-value field that will contain date of transaction.	SMB.FEE.DATE.1

Upon the authorization of this template a user activity "LENDING-REPOSESS-ARRANGEMENT" will be triggered to record activity charges on arrangement as make due.

An enquiry of above template will be given with date ranges to check how many repossession cases have been booked on Transact.

8.21 Delay Transfer Fees - WS03-IJR-06-15

After the maturity date of a loan, vehicle is supposed to be transferred to the end user. In order to avoid unnecessary delays, "Delay Transfer Fees" will be set in Transact after the maturity date with grace period. In this connection, there will be no accrual on daily basis. System will generate bill on instalment date and SADDAD is required on each month there can be ""N"" months grace period, will come from LOS, so next instalment start date after maturity will be maturity + ""N"" Months. However, if customer comes (after the grace period) in middle of month, system should generate amount with respective days (local customization). Need to see with deferment and payoff scenarios in both cases recalculation is required.

SAMA regulation:- The lessor's compensation shall be by paying the value of the daily rent for the movable asset in accordance with the contract using the following equation:

Value of the last rental payment due / (Number of days of the month in which the contract was terminated) * (Number of days of delay) = Value of the rent.

8.22.1 Worksheet details:

File Name: Ijarah Working Sheet
Sheet Name: Day17-Termination Process
Solution

A routine will be attached on activity API against the activity LENDING-MATURE-ARRANGEMENT-PRE.NOTICE. This routine will trigger LENDING-CHANGE-SCHEDULE as

mentioned below. This will enable arrangement to due a charge after maturity.

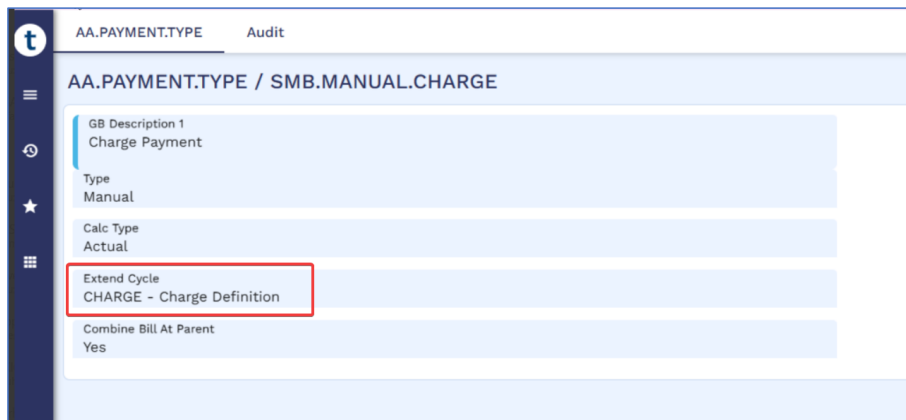

Amortization Table											
Period	Payment	Interest	Principal	Balance	Start Date	End Date	Start Date	End Date	Start Date	End Date	Start Date
1	10000.00	1000.00	9000.00	9000.00	2023-01-01	2023-01-31	2023-01-01	2023-01-31	2023-01-01	2023-01-31	2023-01-01

5	10000.00	1000.00	9000.00	5400.00	2023-05-01	2023-05-31	2023-05-01	2023-05-31	2023-05-01	2023-05-31	2023-05-01
6	10000.00	1000.00	9000.00	4500.00	2023-06-01	2023-06-30	2023-06-01	2023-06-30	2023-06-01	2023-06-30	2023-06-01
7	10000.00	1000.00	9000.00	3600.00	2023-07-01	2023-07-31	2023-07-01	2023-07-31	2023-07-01	2023-07-31	2023-07-01
8	10000.00	1000.00	9000.00	2700.00	2023-08-01	2023-08-31	2023-08-01	2023-08-31	2023-08-01	2023-08-31	2023-08-01
9	10000.00	1000.00	9000.00	1800.00	2023-09-01	2023-09-30	2023-09-01	2023-09-30	2023-09-01	2023-09-30	2023-09-01
10	10000.00	1000.00	9000.00	900.00	2023-10-01	2023-10-31	2023-10-01	2023-10-31	2023-10-01	2023-10-31	2023-10-01
11	10000.00	1000.00	9000.00	0.00	2023-11-01	2023-11-30	2023-11-01	2023-11-30	2023-11-01	2023-11-30	2023-11-01

A charge will be configured named as “Delay Transfer Fee” which will be defined in payment schedule condition and set start date as R_Maturity+nD, “n=grace days”. The grace days will come from LOS and captured in SMB.DEAL.DETAILS in a local ref SMB.GD.DELAYTRANSFEE. Further Extended Cycle field to be set as “Charge” in AA Payment Type defined for this charge. This charge will not be part for aging therefore, bill type to marked as “Payment” for this charge. This charge will be directly due on respective frequency date.

A charge routine will be developed for the calculation of this charge by considering Value of the last rental payment due / (Number of days of the month in which the contract was terminated) * (Number of days of delay) = Value of the rent.

Step 1: Factor “X” Routine will store the first factor i.e. Value of the last rental payment due / (“Number of days” of the month in which the contract was terminated). “Number of days” will be considered for the calendar month where maturity date will fall. For example, if the maturity fall on 28 of December then 3 days will be used in calculation.

Step 2: On the due date this charge routine will trigger and multiple total number of delay days with factor X.

Furthermore, defer closure period in closure condition will be set as 365 days on product level. This used to defer the closure activity.

An activity needs to be defined which will trigger broken days delay transfer fee and make it due. An activity charge is configured for this which calculates the charge amount using the same logic as stated above.

8.22 Waiver (for only fees) - WS03-IJR-06-16

Waiver can be executed for all due balance component.

8.22.1 Solution

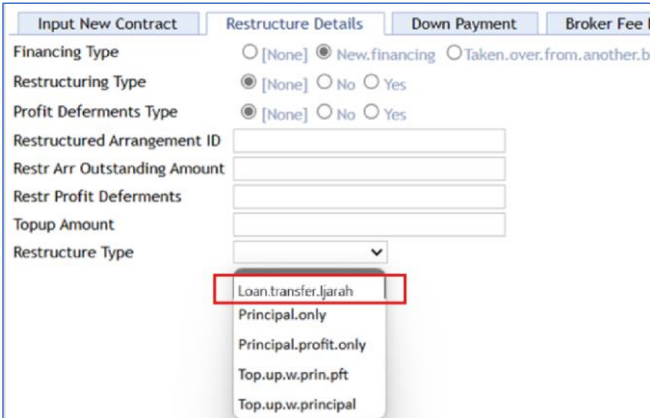

This is core functionality and covered in section 6.9 of this document.

8.23 Loan transfer/Loan transfer with repricing only for Ijarah - WS03-IJR-06-17

In this process, a new loan journey will be initiated by another customer, mainly new to the TA, with an existing loan ID/ Application ID. In this connection, old AA must not have any dues.

A new CIF will be onboarded with the contract reference of the loan which outstanding amount will be transferred to this CIF's contract. Once the CIF is created close the previous contract and transfer this amount to new arrangement of new CIF. Previous arrangement will be closed by pay-off without any charges and then create a new contract for new CIF.

8.23.1 Solution

It is part of structuring as explained in section 6.7, a new LOV will be added with the name as "Loan Transfer- Ijarah". In this case financing type would be "New Financing".

This process must be discussed in servicing app, and like restructuring and others an addendum will be published.

8.24 Reallocation Payments and Down Payment only for Ijarah - WS03-IJR-02-04

If the customer has cancelled/rejected relationship with TA, and repayment account still contains any Credit balance this balance can be used in next loan.

8.24.1 Solution

Since there is one to one relationship b/w customer's repayment account and loan account, therefore a local field will be added in AA.PR.DES.ACCOUNT and ACCOUNT tables. This gap is common for all products.

Application name = AA.PR.DES.ACCOUNT and ACCOUNT table

S.No	Field Name	Data Type	Technical Name	Comments
1	Loan Account	Vetting table of ACCOUNT table	SMB.LOAN.ACCOUNT	
2	Product Name	Vetting table of AA.PRODUCT	SMB.LOAN.PRODUCT	Product name on repayment account.

In case of repeat customer, if the repayment account already exists then new loan account will be tagged with the existing repayment account.

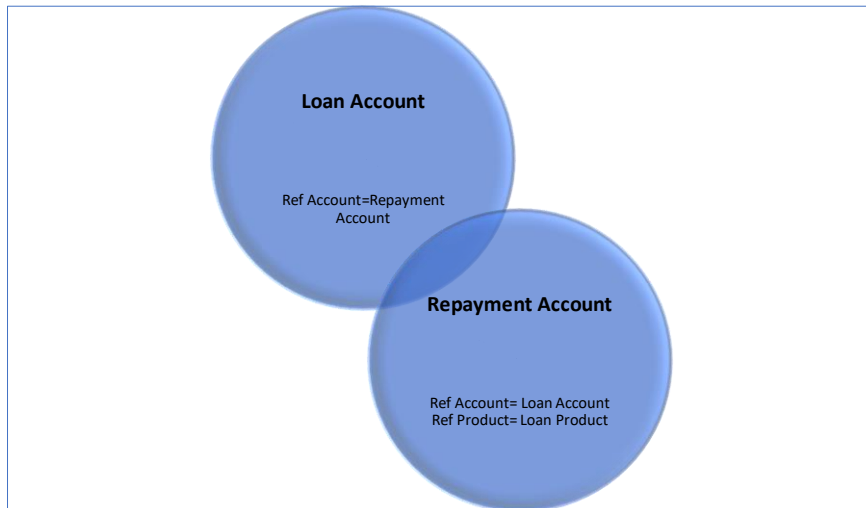

For new customer, a routine will be added on activity api against the activity "LENDING-NEW-ARRANGEMENT" and action = update. This routine will check if the repayment accounts ACCOUNT>SMB.LOAN.ACCOUNT (Ref Account) field is null, then new loan account for this existing repayment account field will be auto populated. Likewise, same routine will auto populate repayment account reference to the loan account.

On repayment account ACCOUNT>SMB.LOAN.PRODUCT, routine will auto populate loan product name for future use.

On activity api, a post routine will be attached against activity LENDING-MATURE-ARRANGEMENT. This routine will make null for repayment account reference account field if the loan account status becomes "Pending Closure". No need to make null for SMB.LOAN.PRODUCT as this field will be used for repeat customer in future. No need to make null for loan account "account ref" field for pending closure accounts. This will be used for future reference.

For existing customer, if any repayment account with ref account fields is null existed for same product, then this repayment account will be tagged with new Loan, else new repayment account will be opened.

Technical note:- IS.CONTRACT contains repayment account reference.

8.25 Deferment mandatory insurance payment - WS03-IJR-09-01

In case of deferment, the adjustment of Insurance, must be aligned as per required scenario, that means the accrual of cost must be aligned as per re payment schedule. For example, if the **deferment reduces** the term of the loan, then what will be the treatment of insurance premium. **We need one schedule before and after from TA team.**

8.25.1 Solution

Insurance Cost Setup:

In order to amortize the insurance cost as per repayment schedule, ACCRUE.AMORT and ACCRUE.PERIOD field of accounting condition will be set as "Amort" and "SCHEDULE" for insurance cost property.

Product Conditions - ACCOUNTING SMB.IJR.FINANCING-20120601 (Islamic Lead)									
INSCOST	ADJUST.LIN.F.O.BILL	DEBIT-CHARGE						Amort	SCHEDULE
	ACT.MAKE.DUE	DEBIT-CHARGE	52251	52251	52251	52252			51008
	PAY	DEBIT-CHARGE							
	MAKE.DUE	DEBIT-CHARGE							

In case of increase of term due to deferment, an additional insurance cost will be incurred to cover extended term. This cost will also be updated on template SMB.INSURANCE.COST as mentioned in section 8.6 of this document. A new multi-value renewal row will be added in SMB.INSURANCE.COST to enable system for renewal process.

Insurance Revenue Setup:

Moreover, monthly insurance revenue will also be extended till extended term. Upon maturity / early settlement of this loan, insurance balance will be calculated as per mechanism defined in section 8.6 of this document.

On another hand if deferred installment will become part of last installment then an API routine needs to define on activity LENDING-UPDATE-PAYMENT.HOLIDAY against action = "UPDATE" to calculate insurance revenue amount for deferred installment and make it part of last installment by defining the same against SMB.MANUAL.CHARGE payment type in payment schedule condition for insurance revenue property.

8.26 ~~ss~~ Total Loss Settlement through Insurance Claim - WS03-IJR-10-05

In case of total loss scenario in which arrangement will be settled against insurance claim. Below are the scenarios through which total loss settlement will be executed.

8.26.1 Total Loss with charge

A charge will be taken for total loss settlement against the insurance claim. Detailed calculation is attached in Ijarah Working Sheet - day9to13-TL with charge.

8.26.1.1 Worksheet details:

File Name: Ijarah Working Sheet

Sheet Name: day9to13-TL With charge

8.26.1.2 Solution:

Proposed solution of this gap is covered in Section 8.8.6 of this document.

8.26.2 Total Loss without charge

No charge will be taken for total loss settlement against insurance claim. Detailed calculation is attached in Ijarah Working Sheet - day9to13-TL without charge.

8.26.2.1 Worksheet details:

File Name: Ijarah Working Sheet

Sheet Name: day9to13-TL Without charge

8.26.2.2 Solution:

Proposed solution of this gap is covered in Section 8.8.6 of this document.

8.26.3 Total Loss with Insurance differential

Differential between monthly insurance received and actual insurance paid will become part of settlement of amount either its receivable or payable to customer. Detailed calculation is attached in Ijarah Working Sheet - day9to13-TL with insurance.

8.26.3.1 Worksheet details:

File name = Ijarah Working Sheet

Sheet name = day9to13-TL With insurance

8.26.3.2 Solution:

Proposed solution of this gap is covered in Section 8.8.6 of this document.

8.26.4 Total Loss with Back Date Accident

If any installment is received after the accident of vehicle, then respective insurance and profit amount of those installment will be reversed and credited to customer account. There will a discount equivalent of installment amount where user will input manually for recovered installment.

Detailed calculation is attached in Ijarah Working Sheet - day9to13-TL Back dated.

8.26.4.1 Worksheet details:

File name = Ijarah Working Sheet

Sheet name = day9to13-TL Back dated

8.26.4.2 Solution:

Proposed solution of this gap is covered in Section 8.8.6 of this document.

8.26.5 Total Loss with Death Claim

If a customer is deceased in the event of accident, then settlement of arrangement will be made against combination of life and vehicle insurance claim, any amount excess after settlement will be credited to customer repayment account. Detailed calculation is attached in Ijarah Working Sheet - day9to13-TL With death claim.

8.26.5.1 Worksheet details:

File name = Ijarah Working Sheet

Sheet name = day9to13-TL With death claim

8.26.5.2 Solution:

Proposed solution of this gap is covered in Section 8.8.6 of this document.

8.27 Reversal of Down payment, Admin fee and Insurance - WS03-IJR-03-04

The reversal of down payment, admin fee + VAT and insurance will be occurred in the below scenarios:

- Rejection/Expiry of offer
- Rejection of financing contract
- Rejection of promissory note
- Rejection by customer on IVR authentication

8.27.1 Solution

A template named as SMB.DEAL.DETAILS is created carrying application status field, whenever the status of "EXPIRED/REJECT" is updated due to above activities (b, c, d) then an OFS will be triggered that will reverse down payment and admin fee + VAT. Below accounting entry will be executed through OFS.

Debit - Customer Repayment A/c. (XXXX)

Credit – TA Bank A/c. XXXX

There will be no scenario of reversal of down payment and admin fee in case of Expiry/Rejection of offer as these will be recovered once offer is accepted by customer.

8.28 GAP - STP Process - WS03-IJR-02-05

- A. LO will send list of fields to LM to get simulated schedule from LM, which will be used for Qarrar and offer letter generation.
- B. Post offer acceptance, LO will push complete list of fields related to customer in response LM will create the CIF and Repayment account of customer. For CIF related information please refer to Customer's documents.
- C. Bill will be generated for down payment and admin fee. Upon payment of bill Credit Admin will issue the PO and sent it to vendor manually.
- D. Vendor will share the green card details with the LO
- E. Credit will do the selection of insurance
- F. Contract will be generated through ND (if rejected/declined Reversal of: down payment, admin fee, Insurance)
- G. Promissory Note creation and acceptance by customer through NAFITH (Reversal of: downpayment, admin fee, Insurance)
- H. IVR call to be responded by the customer, IVR authentication if customer reject offer then Reversal of: downpayment, admin fee, Insurance)
- I. **IS Contract Stage:** Auto process will trigger (Asset Capture and IS Contract creation – Auto Creation)
- J. Insurance policy needs to be issued
- K. **Delivery Stage:** Istamara Number will be auto fetched from IS.CONTRACT in Transact. AA will be created manually where Istamara number will be input. Repayment Schedule with APR effective from delivery date will be generated on the same stage. From the same date the accrual of profit will start, during EOD process.

Commented [AH25]: Email will be triggered from PO stage to vendor registered email.

Commented [FUK26R25]: Incorporated, please share format of email

Commented [AH27]: System should trigger insurance policy post contract signing .

Commented [FUK28R27]: Selection of insurance will be auto based on lowest quote and it needs to be initiated prior to offer generation in order to take insurance effect in simulated repayment schedule, however insurance quote approval will be done after IVR as mentioned in section 8.28.1.

8.28.1 Solution

Once the offer is accepted by customer, a new template "SMB.DEAL.DETAILS" will be created with ID as "Application Id", which will hold the details as mentioned in "List of Fields" tab of Ijarah Working Sheet.

Further an additional field of Application Status will be defined with LOV's "Not Disbursed, Disbursed, Reject, Expired". This field will be updated based on application fate accordingly. The Straight-Through Processing (STP) workflow will be initiated upon successful insurance approve quote response as stated below in End to End Process Flow section.

An enquiry will be created in order to monitor the status to each application.

E2E (End-to-End) Process Flow:

The detailed E2E process flow for the assets purchase and finance agreement must be defined and appended to the workflow. This will ensure the sequence of operations from the initial offer acceptance to the delivery of assets is followed correctly. Key stages of this flow include:

Commented [AH29]: Tawtheeq should be part of this at post delivery stage.

Commented [FUK30R29]: Incorporated

- **Offer Acceptance:** When the customer accepts the offer, the system triggers CIF creation and repayment account will be created and Rosom bill generated for Admin Fee plus VAT and Down Payment amount. Upon acceptance of offer LOS will push all relevant information pertaining to creation of IS Contract and AA Arrangement on a template i.e. SMB.DEAL.DETAILS. A validation for sufficient fund as defined in WS03-IJR-03-02 will be triggered prior to contract generation. PO will be issued and email sent to vendor upon recovery of Adim Fee & Down Payment bill.
- **Contract Generation and Signing:** The customer must complete the contract generation, including signing it electronically via ND system. Contract will be generated on daily basis till the expiry date of offer to synch APR on contract and loan account. There is no impact on offer generation, offer will contain maximum APR. Further there is no change in first instalment date calculation which is based on offer expiry date.
- **Promissory Note Creation and Acceptance:** The customer then accepts the promissory note via the NAFITH system, which is integrated into the workflow.
- **IVR Authentication:** This step ensures customer authentication through IVR (Interactive Voice Response), which should be completed within 48 hours of contract signing.
- **Insurance Quote Approve:** After IVR authentication insurance quote approval will be initiated.
- **Assets Capture (Auto in Transact):** Asset capture will be initiated upon successful response of Insurance Quote Approve, it extract assets details from SMB.DEAL.DETAILS template. Assets capture record will also carry Green Card details.
- **IS Contract Generation (Auto in Transact):** Once assets capture step is completed, IS contract process will be initiated by extracting the details for SMB.DEAL.DETAILS template. Upon the completion of IS contract process, an OFS will be generated to

transfer the funds in vendor payable by debiting multi supplier and crediting vendor payable account.

- **Insurance Template (Auto in Transact):** Upon successful completion of IS Contract insurance template as stated in Section 8.6 of this document will be created.
- **Amend IS Contract (Manual):** Once the registration and insurance process is completed, user will manually incorporate the registration / Istemara details in IS contract by amend the IS contract details as stated in Section 8.1 of this document.
- **Finance Arrangement – Delivery (Manual):** Once insurance and registration formalities are completed user will manually create the Finance Arrangement with minimal inputs as some details will be auto fetch from IS Contract and SMB.DEAL.DETAILS. Repayment Schedule with APR effective from delivery date will be generated on the same stage. From the same date the accrual of profit will start, during EOD process.

Commented [AH31]: Should be automated incase of any issue it will be manual.

Commented [FUK32R31]: Manual delivery is proposed in order to manage the time lag between registration and actual delivery of asset as repayment schedule will generate at this stage.

8.29 Restructuring - WS03-IJR-13-01

For restructuring of Ijarah finance assets **capture details** needs to be captured in order to book IS Contract and AA Arrangement thereon. Moreover, treatment of balance of takaful amount (receivable / payable) will also be incorporated for restructured arrangement.

In case of overdue insurance customer is supposed to pay all overdue insurance amount as a part of downpayment before starting the new contract.

Commented [AH33]: Asset details should be auto populated.

Commented [FUK34R33]: This is existing functionality in which manual steps to be followed. However, as mentioned in section 8.29.1 automation of restructuring will be discussed separately in servicing app.

8.29.1 Solution

Note: Below is the transact restructuring workflow and same can be integrated with LOS, however if any automation is required in restructuring journey that will be discussed separately in servicing app sessions.

Steps for Restructuring:

- Customer deposits overdue profits, insurance and insurance balance amount as stated in section 8.6 of this document as Down Payment. Overdue profit only in case of restructure arrangement for Principal or Principal+Topup.
- Upon recovery of above funds, parked them in as internal account.
- Create restructure arrangement by using old arrangement reference and disburse its funds in same internal account.
- Execute payoff of old arrangement by debiting funds from above referred internal account.

Restructure Mechanism:

Assets Capture stage will be added in the existing restructuring functionality. Once restructure arrangement details are incorporated in IS.VEHICLE table same will be auto-fetch to IS Contract and AA Finance. Since Ijarah facility will be utilized for Car Financing therefore on IS.VEHCILE table will be updated.

User will create a new contract starting from Asset Capture stage where the following local fields will be required as depicted in the table below:

S #	ID Name	Type	Field Definition	Application	Mandatory / Optional	Condition Mandatory
1	Restructuring Yes or No Field	Radio Button	To identify the contracts which are restructured a field will be available with values "Yes" or "No" or "Null". Yes, means that a finance is restructured.	Asset Capture (Input), Auto-Populated on IS Contract & AA-Arrangement	Mandatory	
2	Profit Deferments either "Yes" or "No"	Radio Button	If the user selects "No," there won't be any profit obtained from the previous arrangement. Profit of the previous arrangement will be settled from customer account by user. If the user chooses "Yes," the previously earned profit (accrued + overdue) will be incorporated into the new arrangement as part of the principal, while any unearned profit will be settled through a bonus/rebate functionality.	Asset Capture (Input), Auto-Populated on IS Contract & AA-Arrangement	Mandatory	1
3	L.REST.ARR.ID (Restructured Arrangement ID)	Alpha-numeric	User will input AA- Arrangement Id in order to fetch details of the previous contract	Asset Capture (Input), Auto-Populated on IS Contract & AA-Arrangement	Mandatory	1
4	L.REST.ARR.OS (Restructured Arrangement Outstanding Amount)	Auto-Fetch Field	Upon inputting Arrangement Id system will fetch Outstanding principal of the previous arrangement. ECB where Asset Type like ACCOUNT (Principal Property should be parameterized)	Asset Capture (Input), Auto-Populated on IS Contract & AA-Arrangement	Mandatory	1
5	L.PFT.DFRMNT (Restructure Profit Deferment)	Auto-Fetch Field	Upon inputting Arrangement Id system will fetch (accrued + overdue) profit of the previous arrangement. ECB where Asset Type like DEFERPFT (Profit Property should be parameterized)	Asset Capture (Input), Auto-Populated on IS Contract & AA-Arrangement	Only applicable where Profit Deferment is marked "Yes"	2

6	L.PFT.REST.TYP (Restructure Type)	LOV	LOV 1 = PRINCIPAL.ONLY Restructured finance will be created with equity amount. Sales Arrangement Commitment = 4	Asset Capture (Input), Auto-Populated on IS Contract & AA-Arrangement	Mandatory	1
			LOV 2 = PRINCIPAL.PROFIT Restructured finance will be created with equity and profit amount. Sales Arrangement Commitment = 4+5			
			LOV 3 = TOP.UP.W. PRINCIPAL Restructured finance will be created with equity and additional amount. Sales Arrangement Commitment = User Input Validation is required where commitment should not be less than Serial No. 4 Amount			
			LOV 4 = TOP.UP.W.PRIN.PFT Restructure finance will be created with equity, profit and added amount.Sales Arrangement Commitment = User Input Validation is required where commitment should not be less than Sum of Serial No. 4 and 5 Amount			

- The fields mentioned above need to be entered during the Asset Capture stage. The same set of fields, along with their corresponding inputs, will be populated in the IS-Contract and in Commitment property during the Financing Stage.
- A validation routine will be attached on the assets capture version which will check the field L. REST.FLAG if this field has an input, then field L.REST.ARR.ID and L.PFT.DFRMNT and L.PFT.REST.TYP will be mandatory.
- L.REST.ARR.OS and L.PFT.DFRMNT will be automatically populated once field L.REST.ARR.ID is inputted by the user. Profit deferment amount will be fetched if profit deferment decision is marked as "YES".
- A validation routine will be attached on the Asset Capture version and based on the selection in the field L.PFT.REST.TYP then amount field will be populated logic will be as depicted in the table below:

- In financing stage, a routine will be developed on the settlement activity which will generate the following entry with the sum of number of fields L.REST.ARR.OS and L.PFT.DFRMNT in the AA.ARRANGEMENT.ACTIVITY,IS.NEW.
- The above stated validation are already developed at IS Contract level that needs to replicate on IS.VEHICLE.
- Upon authorization of New Arrangement an OFS will be generated which will record the below transaction. This will be used to settled old deal.

- Amount = Rst. Prin. + Rst. Profit

Particulars	Debit	Credit	Entry Source
Multi-supplier	XXX		By Customization
Suspense / Internal Account		XXX	

- **Transfer of Funds - If Top up option selected**

- Amount = Unit Price - Rst. Prin.- Rst.Profit

Particulars	Debit	Credit	Entry Source
Multi-supplier	XXX		By Customization
Customer Account		XXX	

- Accounting entries are depicted in the attached excel sheet.

8.30 Takaful Treatment in Partial Settlement and deferment- WS03-IJR-12-01

In case of partial settlement insurance template needs to be updated with takaful amount to be recovered as advance installment (i.e. compression or principal decrease). This means if any advance payment has been executed then treatment of Takaful should be recalculated so that it should not be exceeded projected amount, TA needs to confirm.

8.30.1 Solution

For partial settlement bill generation version needs to be updated with Insurance revenue plus Vat will be added to make it part of Rosom bill. There Is no recalculation of insurance in either case i.e to reduce term or recalculate installment amount. Refer to section 6.6.5 of this document.

Saudi Arabia Ri

For deferment insurance treatment is covered in section 8.25 of this document.

8.31 Offer letter, contract generation and other letters- WS03-IJR-03-05

S.no	File Name	Document
1	Clearance letter	 Clearance letter (1)_eng.docx
2	Ijarah contract	 Ijarah_Contract_eng.docx

In points 2 and 3 above, the TA needs to confirm which contract will be generated: the one mentioned in point 2 (Ijarah Contract – SAMA) or the one in point 3 (Ijarah Contract), as both cannot be created. In order to generate synch APR on contract and loan account, it was agreed that TA will be generating contract on daily basis till the expiry of offer. There is no impact on offer generation, offer will contain maximum APR. There is no change in first instalment date calculation, which is based on offer expiry date.

Please also provide template of other notification like SMS with events if required from LMS

8.31.1 Solution

Once the offer is accepted by customer, a new template “SMB.DEAL.DETAILS” will be created with ID as “Application Id”, which will hold the details like CIF, IS Product, Currency, Assets Description, Vendor Name, Quantity, Unit Price, Tenor, Finance Amount, Profit Rate, Admin Fee Mode etc. This template will be created by replicating the same fields as stated in IS.CONTRACT,SMBB.INPUT version, further an additional field of Application Status and will be defined with LOV’s “Not Disbursed, Disbursed, Reject, Expired”. This field will be updated based on application fate accordingly. The Straight-Through Processing (STP) workflow will be initiated upon successful IVR response as stated below in End to End Process Flow section.

The workflow needs to be carefully segmented to ensure the purchase request is initiated first, followed by the successful endorsement of the contract and acceptance of the promissory note before continuing with downstream processes.

An enquiry will be created in order to monitor the status to each application.

For clearance letter, a routine will be developed to check **ACCOUNT>SMB.ACTIVITY.TYPE** filed if <> WRITE-OFF or RESCHDULE and if account status is closed or pending closure the NOC will be issued.

NOC will be sent to Customer through Email

New Template:-

-----------------	-----------------------------	--	-------------

SMB.ISFIN.PARAM	
Technical Name	Vetting Table
SMB.TXN.TYPE.1	LOVs POT(post offer acceptance transaction)
SMB.TXN.CODE.1	FT.TX.TYPE.CONDITIONS
SMB.DR.ACCOUNT.1	IA CATEGORY
SMB.CR.ACCOUNT.1	ACCOUNTS

Configuration for Post offer Commodity Purchase Transaction: The following parameters must be defined and configured in above parameter table named as SMB.ISFIN.PARAM to ensure the correct accounts and transaction types are applied during the commodity purchase process:

- **SMB.TXN.TYPE:-** An **FT.TXN.TYPE.CONDITION** along with transaction code of with relevant narration.
- **SMB.DR.ACCOUNT:** For the commodity purchase transaction, an internal account should be used for inventory transactions for which category will be defined. This will allow proper tracking and allocation of inventory-related costs.
- **SMB.CR.ACCOUNT:** Buyer's Account should be created as a non-checking account (**NCA**) against the buyers CIF.

Accounting

Entry

Purchase Stage	Stage	Debit/Credit	Accounting Entries	Description	Core/ Customized	Account Reflection
Offer Acceptance		DR	Inventory - IA	Internal Account	(10,000.00)	
		CR	Buy Broker's account	Internal Account	10,000.00	
		DR	Buy Broker's account	Internal Account	(10,000.00)	
		CR	TA - Bank Account	Nostro Account	10,000.00	

Technical Note:

Current STP process related to accounting entries needs to be changed from Core to customizations, for which Inventory Internal Account Category will be capture in IS.PARAMETER. Below Accounting Entries will be executed at the time of purchase stage

Status - Purchase	DR	Purchase Order	Purchase Order	(10,000.00)	On Balance Sheet
	CR	GIF	Goods in Transit	(10,000.00)	On Balance Sheet
	DR	Purchases	Purchase	(10,000.00)	On Balance Sheet
	CR	Inventory - IA	Internal Account	10,000.00	On Balance Sheet

Once the customer will accept the offer, as per Customer gap, CIF will be opened in Transact. Simultaneously, below LMS process will be automated.

LOS will send all information as mentioned in above template "SMB.DEAL.DETAILS" and upon the authorization of SMB.DEAL.DETAILS which is integrated with LOS, above Transaction

will be auto posted with Application ID as transaction reference and DAO of customer. The status of this template will be "Offer Accepted".

E2E (End-to-End) Process Flow:

The detailed E2E process flow for the commodity purchase and finance agreement must be defined and appended to the workflow. This will ensure the sequence of operations from the initial offer acceptance to the final sale of the commodity is followed correctly. Key stages of this flow include:

- **Offer Acceptance:** When the customer accepts the offer, the system triggers the purchase request initiation. Upon acceptance of offer LOS will push all relevant information pertaining to creation of IS Contract and AA Arrangement on a template
- **Accounting Entries of Commodity Purchase:** Upon successful response of purchase request initiation purchase accounting entries will be initiated by considering.
- **Contract Generation and Signing:** The customer must complete the contract generation, including signing it electronically via ND system. Contract will be generated on daily basis till the expiry date of offer to synch APR on contract and loan account. There is no impact on offer generation, offer will contain maximum APR. Further there is no change in first instalment date calculation which is based on offer expiry date.
- **Promissory Note Creation and Acceptance:** The customer then accepts the promissory note via the NAFITH system, which is integrated into the workflow.
- **IVR Authentication:** This step ensures customer authentication through IVR (Interactive Voice Response), which should be completed within 48 hours of contract signing.

- **Loan Creation and Commodity Sale:** After authentication, the loan is created, and the commodity sale is processed through the IS system.

- **Clearance Letter Mapping**

8.32 Post write-off recovery- WS03-IJR-11-01

In current design, once the case goes for write-off the loan account status becomes pending closure as mentioned in section 6.6.4. therefore, in order to recover the amount in future, system should maintain each balance component that were waived / written-off. TA needs to elaborate how the payment of such cases will be executed. Either IBFT or SADDAD.

TA needs to explain if write-off is required on different business events with different PL, else one screen will be given with default GL.

In addition to this bulk write-off is also required as mentioned in section 6.6.4.

8.32.1 Solution

Write-off of Finance

A new version for LENDING-WRITE.OFF-BALANCE.MAINTENANCE activity will be created which will contain the below fields.

ID Name	Type	Length	Description	Mandatory / Optional	Validation (if any)
SMB.ARRANGEMENT	Alpha Numeric	12	A local field that will accept valid arrangement reference number for payment holiday.	Mandatory	Yes
SMB.ACTIVITY	Text	35	A local field with a default activity of "LENDING-WRITE.OFF-BALANCE.MAINTENANCE"	Mandatory	No
SMB.CUSTOMER	N	15	A local field that will auto populate customer number of arrangement reference.	Mandatory	No
SMB.CUSTOMER.ROLE	Text	15	Associated with CUSTOMER field. Denotes the role of the customer in the Arrangement. Auto fetched from arrangement.	Mandatory	Yes
SMB.PRODUCT	Text	35	Indicates the Product of the Arrangement contract. Auto fetched from arrangement.	Mandatory	Yes
SMB.CURRENCY	Text	03	Indicates the Currency of the Arrangement contract. Auto fetched from arrangement.	Mandatory	Yes
SMB.INITIATION.TYPE	Text	15	This field denotes the type of initiation for the current activity that is whether the activity was triggered by the user or by external transaction or it could be scheduled or secondary activity. By default, it would be set as "User".	Mandatory	No

SMB.ACTIVITY.CLASS	Text	35	This is a no input field and denotes the activity class id for the given activity.	Mandatory	Yes
--------------------	------	----	--	-----------	-----

Further an associated version i.e. SMB.AA.ARR.BALANCE.MAINTENANCE,AA.BALS will be attached with this version which will be created by replicating version AA.ARR.BALANCE.MAINTENANCE,AA.BALS. Further a local ref will be added in new version (SMB.AA.ARR.BALANCE.MAINTENANCE,AA.BALS) termed as Write-Off Reason with LOV's such as (Credit, Deceased or Fraud).

Based on write-off reason PL category will be defined in write-off parameter table. A routine will be developed which will post the OFS by debiting PL category and crediting internal account by considering write-off reason.

Write-off Template

A new template will be created named as "SMB.WOF.DEAL" having record ID as Arrangement reference / Application ID (only for migrated cases). An API routine will be attached on activity LENDING-WRITE-OFF-BALANCE.MAINTENANCE on action = Update, which will auto create this template. The status of this template will be set as "Write-Off" once its create, however it will be updated to "Closed" once Total Write-off Outstanding amount becomes zero. Below are the proposed fields that needs to be updated for all write-off arrangements.

Field Name	Type	Length	Description	Mandatory / Optional	Validation (if any)
ID	Alpha Numeric	20	Record ID for each write-off arrangement.	Mandatory	Yes
SMB.ARRANGEMENT	Alpha Numeric	12	A local field that will accept valid arrangement reference number for write-off deal.	Mandatory	Yes
SMB.CUSTOMER	N	15	A local field that will auto populate customer number of arrangement reference.	Mandatory	No
SMB.PRODUCT	Text	35	Indicates the Product of the Arrangement contract. Auto fetched from arrangement.	Mandatory	Yes
SMB.CURRENCY	Text	03	Indicates the Currency of the Arrangement contract. Auto fetched from arrangement.	Mandatory	Yes
SMB.WOF.REASON	Text	35	This field will carry the reason of write-off like "Credit / Deceased / Fraud".	Mandatory	Yes

SMB.WOF.DATE	Numeric	12	Date of write-off of arrangement	Mandatory	Yes
SMB.TOT.WOF.AMT	Numeric	35	Total amount of write-off	Mandatory	Yes
SMB.ACCOUNT	Numeric	15	Write-off arrangement account number	Mandatory	Yes
SMB.WOF.BAL.TYPE.1	Text	35	Multi-value field to capture property each write-off balance type of write-off arrangement.	Mandatory	Yes
SMB.WOF.ORG.AMT.1	Numeric	35	Multi-value field to capture sum of property wise write-off amount.	Mandatory	Yes
SMB.WOF.PMT.1	Numeric	35	Multi-value field to capture post recovery amount against each property.	Mandatory	Yes
SMB.WOF.PMT.DATE.1	Numeric	15	Multi-value field to capture date of post recovery amount against each property.	Mandatory	Yes
SMB.WOF.OST.AMT.1	Numeric	35	Net outstanding amount as per post write-off recovery.	Mandatory	Yes
SMB.WOF.TOT.PMT	Numeric	35	Sum of all property wise post write-off recovered amount.	Mandatory	Yes
SMB.WOF.TOT.OST	Numeric	35	Sum of all property wise write-off outstanding amount.	Mandatory	Yes
SMB.WOF.STATUS	Text	35	Status of write-off template i.e. (Write-Off / Closed). This field will be updated to closed once Total Write-off Outstanding amount becomes zero.	Mandatory	Yes

Account Snapshot			
Account Details			
Contacts			
Collection			
Write-off Details			
Customer 1000012	Customer Name Mohammad Ali	Write-off date 01/0/2025	Write-off Tot.original.Amount 120,000
Product Name Ijarah Finance	Write-off Tot.original.Amount 120,000	Currency SAR	Arrangement # AA100147KLA
Account # 20000001456	Write off BalanceType.1 Principal	Write off Original Amount.1 100,000	Write off Outstanding.1 30,000
Write off Balance Type.2 Profit	Write off Original Amount.2 20,000	Write off Outstanding.2 20,000	
Recover.BalanceType.1 Principal	Recovery.Amount.1 70,000	Recovery.Date.1 02/Feb/2025	

Post Write-Off Recovery:

A FT.COMMISSION.TYPE will be configured as “WOFREC” which will be define as charge code in AC.CHARGE.REQUEST version.

Further an enquiry will be created that will be fetch write-off arrangements details.

Bulk write-off Mechanism

For bulk write-off upload same version will be used as referred above and defined the same in EB.FILE.UPLOAD.TYPE.

Validation on Contract # at file level is required for duplicate record. For this file must contain file name against each row. This criteria will be define in EB.DUPLICATE.TYPE table for bulk write-off upload.

Below is specimen format for bulk write-off upload file.

FILE_NAME	ARRANGEMENT_REF	EFFECTIVE.DATE	WRITE.OFF
Writeoff_Fileupload_15022024	AA240303GMNH	29-03-2024	YES
Writeoff_Fileupload_15022024	AA24030MNOGH	29-03-2024	YES
Writeoff_Fileupload_15022024	AA24029CF925	29-03-2024	YES

User will prepare data as stated above in CSV (save as CSV UTF-8) file then upload it through EB.FILE.UPLOAD application.

8.33 Bullet Payment and EPC (Early Payoff Charges) WS03-IJR-10-06

If a customer has paid DP, and now wants to pay rest of the amount in last instalment, then in this case a bullet schedule will be generated. This information will come from LOS. The EPC charge / penalty now needs to be enhanced. Presently it's taking current month profit to Ijarah Income and upcoming 3 months instalment profit in EPC. Now same routine will take current month profit in Ijarah income whereas since there is no EMI instalments therefore upcoming 3 months profit will be taken in ECP charge. Same enhancement will work for quarterly and semi-annually repayment cases.

8.33.1 Solution

The request for the bullet payment will be sent from the LOS to Transact. After that, Transact will generate the schedule based on the bullet payment method.

The EPC charge/penalty needs to be updated. Currently, the system takes the current month's profit as Ijarah income and the profit from the next three months' installments as EPC. Moving forward, the system will still take the current month's profit as Ijarah income; however, since there will be no EMI installments, the profit for the next three months will be considered as part of the EPC charge.

This enhancement will also apply to cases involving quarterly and semi-annual repayments.

A local radio button i.e. Bullet Loan (Yes), will added in SMB.DEAL.DETAILS and IS.CONTRACT,SMBB.INPUT versions which will carry the record for Bullet Payment Loan.

A routine named as "SMB.EARLY.SETTLEMENT.CHRG" will be enhanced. If the case is EMI then the routine will work in same manner and there wouldn't be any change. However, if the difference b/w last instalment date and next instalment date > one month then this routine will work like below.

System will calculate total number of days = cycle date of after three months - cycle date of current month. For example, if cycle date is 28 of each month and current system date is 15 Jan 2025 then.

1. Calculation: - when there is no Instalment Due in next 90 /91 days.

Public

- Today = 25 Jan 2025
 - Total number of days = 28-Apr-2025- 28-Jan-25= 90 days
 - $CURACCOUNT * PROFITRATE * Total\ No.\ Of\ days / 365 = ECP\ Amount$
2. Calculation: - when there is an Instalment Due in next 90 /91 days.
- Today = 25 Jan 2025
 - Let's assume the case is of 3 months instalment. Last installment date was 28 Nov. 2024 and next instalment date is 28 February 2025
 - Current total number of days = (28 Feb 2025)- (28 Jan 25)
 - $CURACCOUNT * PROFITRATE * Current\ Total\ No.\ Of\ days / 365 = Current\ ECP\ Amount$
 - Future total number of days= (28 March 2025) – (28 feb 2025)
 - $FCURACCOUNT * PROFITRATE * Future\ Total\ No.\ of\ days / 365 = Future\ ECP\ Amount$

Total ECP Amount = Current ECP Amount + Future ECP Amount

8.34 Abnormal Cancellation WS03-IJR-10-07

In case of recall (abnormal cancelation) of the car by TA there will no Early Termination Fee and Accrued Profit (broken days profit). Reversal of Accrued profit will be managed through Discount Property. There will no reversal of admin fee and down payment.

8.34.1 Solution

A User activity will be executed in AA.PR.DES.ACCOUNT>SMB.ACTIVITY.TYPE and ACCOUNT>SMB.ACTIVITY.TYPE will be set as RECALL. Based on this early termination charges would not be triggered at the time payoff activity.

Further an automated Profit rate change activity will be executed by defining rate as "0" with an effective date of activity would be arrangement start date. This will reverse the broken days accrued profit.

8.35 Residual Value WS03-IJR-06-18

Residual value will be set on schemes, LOS will send Transact RV % and RV Amount that will become part of last instalment. For last instalment, SADAD bill will be sent to customer that is last instalment amount + RV. If this RV is not settled by customer, then TA will see how to manage this amount. This also required an internal discussion on TA side. Any changes in process are part of Addendum of BSDD.

8.35.1 Solution

A new field for Residual Value (RV) will need to be added to the schemes and SMB.DEAL.DETAILS in Transact. This can be achieved by extending the scheme configuration with an RV % and RV Amount. The Loan Origination System (LOS) will send the RV % and RV Amount to Transact as part of the scheme details.

RV Amount will then be treated as part of the last instalment amount in Transact.

For the last installment, the SADAD bill will be sent to the customer with the combined total of the last installment amount and RV amount.

- This can be achieved by enhancing the billing system to include the RV in the calculation of the final installment.
- Update the payment schedule logic so that when the final installment is due, it adds the RV to the installment amount, and the bill sent to the customer reflects this total.

Arrangement Activity - Schedule (Current)

Type	Method/Payment	Prog Rate	Property	Due Prog	Start	End	Sum	Amount	Bill Type
Payment Type 1	Payment Method 1	Prog Rate 1	Property 1	Due Prog 1	Start 1	End 1	Sum 1	Amount 1	Bill Type 1
Payment Type 2	Payment Method 2	Prog Rate 2	Property 2	Due Prog 2	Start 2	End 2	Sum 2	Amount 2	Bill Type 2
Payment Type 3	Payment Method 3	Prog Rate 3	Property 3	Due Prog 3	Start 3	End 3	Sum 3	Amount 3	Bill Type 3

8.36.1 Worksheet details:

File name = Ijarah Working Sheet

Sheet name = DayN-File Upload

8.36.2 Solution

For bulk payments upload a new FT version will be created and defined the same in EB.FILE.UPLOAD.TYPE. The proposed FT version will contain the below fields;

ID Name	Type	Length	Description	Mandatory / Optional	Validation (if any)
SMB.FILE.NAME	AN	35	A local field that will accept file name to be upload. File name to be maintained as "Payment_Fileupload_DDMMYY".	Mandatory	No
SMB.ACCOUNT.NO	AN	35	A local field that will accept internal account number of respective bank account.	Mandatory	No
SMB.CIF	N	06	A local field that will accept valid CIF record.	Mandatory	No
SMB.TRAN.DATE	N	10	A local field that will auto populate transaction date as system date.	Mandatory	No
SMB.VALUE.DATE	N	10	A local field that will accept value date.	Mandatory	No
SMB.AMOUNT	N	15	A local field that will accept transaction amount.	Mandatory	No

SMB.PAYMENT.MODE	T	10	A local field that will accept payment mode such as "STINS, DD, BT, BD, SADAD, CH".	Mandatory	No
SMB.DEPOSIT.AC.NO	AN	35	A local field that will accept internal account number of respective bank account.	Mandatory	No
SMB.INSTRUMENT.NO	N	20	A local field that will accept instrument reference number.	Optional	No
SMB.IBAN.NO	AN	20	A local field that will accept IBAN number.	Optional	No
SMB.FUND.SOURCE	T	35	A local field that will accept details about source of funds e.g. Salary, Bonus, Other.	Mandatory	No
SMB.REF.NO	AN	1000	A free text field that will accept bank reference details either in English or Arabic	Mandatory	No
SMB.COMPANY.ID	AN	12	A local field that will accept valid company ID, by default it is set as head office.	Mandatory	No
SMB.CONTRACT.NO	AN	12	A local field that will accept valid arrangement ID.	Mandatory	No
SMB.REPAY.AC	AN	12	A local field that will be auto populated based on SMB.CONTRACT.NO.	Mandatory	Yes
SMB.BANK.ID	N	04	A local field that will accept bank ID.	Mandatory	No
SMB.BRANCH.ID	AN	10	A local field that will accept branch ID.	Mandatory	No

Value date field is required for bulk payment upload.

For outward funds must have value date as processing date.

Separate TRANSACTION CODE will be used for each upload type.

Validation on Contract # at file level is required for duplicate record. For this file must contain file name against each row. This criteria will be define in EB.DUPLICATE.TYPE table for bulk payment upload.

Below is specimen format for bulk payment upload file. ~~Excel format is attached as item 6 in Reference Document section of this FSD.~~

FILE NAME	ACCOUNT NO	CF ID	TRAN DT	VALUE DT	AMOUNT	PAYMENT MODE	DEPOSIT ACC NO	SOURCE OF FUNDS	NARR NO	COMPANY ID	CONTRACT NO	BANK ID	BRANCH ID

8.37 No Colling Period: so Ijarah cases will be tread as normal early maturity

8.37.1 Solution

Product setup sheet has been updated.

8.38 Multiple Simulations for Daily Contract Generation (WS03-TAW-05-09)

- In order generate synch APR on contract and loan account, it was agreed that TA will be generating contract on daily basis till the expiry of offer.

- There is no impact on offer generation, offer will contain maximum APR.
- There is no change in first instalment date calculation, which is based on offer expiry date.

8.38.1 Proposed Solution

Upon the acceptance of offer by customer, a template SMB.OFFER.DETAILS referred in Section 7.1.1 of this document will be created having Simulation Arrangement ID created for offer.

By using this offer simulated arrangement two new simulations will be created (parameterized on IS.PARAMETER>GRACE.PERIOD which is used to calculate offer expiry date). these two new simulations will start from first working day after offer acceptance having expiry of one day each. These simulations will utilize the same finance amount, profit amount, first & last installment date in order to keep the financials intact as stated at the time of offer.

8.39 Bulk Deferment (WS03-TAW-09-02)

Bulk deferment is required through file upload.

8.39.1 Proposed Solution

For bulk deferment upload a new version for LENDING-UPDATE-PAYMENT.HOLIDAY activity will be created and defined the same in EB.FILE.UPLOAD.TYPE. The proposed version will contain the below fields;

Commented [AH35]: We need a option of RULE building in search with the condition of DPD , installment date , Disbursement date. So that the system will generate the list and user can select the records.

Commented [FUK36R35]: An enquiry needs to be developed. Incorporated in FSD

Formatted: Indent: Left: 0", Hanging: 0.25"

ID Name	Type	Length	Description	Mandatory / Optional	Validation (if any)
SMB.FILE.NAME	Alpha Numeric	35	A local field that will accept file name to be upload. File name to be maintained as "Payment Holiday File upload DDMMYY".	Mandatory	No
SMB.ARRANGEMENT	Alpha Numeric	12	A local field that will accept valid arrangement reference number for payment holiday.	Mandatory	Yes
SMB.ACTIVITY	Text	35	A local field with a default activity of "LENDING-UPDATE-PAYMENT.HOLIDAY"	Mandatory	No
SMB.CUSTOMER	N	15	A local field that will auto populate customer number of arrangement reference.	Mandatory	No

Formatted Table

<u>SMB.CUSTOMER.ROLE</u>	Text	15	Associated with <u>CUSTOMER</u> field. Denotes the role of the customer in the Arrangement. Auto fetched from arrangement.	Mandatory	Yes
<u>SMB.PRODUCT</u>	Text	35	Indicates the Product of the Arrangement contract. Auto fetched from arrangement.	Mandatory	Yes
<u>SMB.CURRENCY</u>	Text	03	Indicates the Currency of the Arrangement contract. Auto fetched from arrangement.	Mandatory	Yes
<u>SMB.INITIATION.TYPE</u>	Text	15	This field denotes the type of initiation for the current activity that is whether the activity was triggered by the user or by external transaction or it could be scheduled or secondary activity. By default, it would be set as "User".	Mandatory	No
<u>SMB.ACTIVITY.CLASS</u>	Text	35	This is a no input field and denotes the activity class id for the given activity.	Mandatory	Yes

Further an associated version i.e. SMB.AA.ARR.PAYMENT.HOLIDAY,AA will be attached with this version which will be created by replicating version AA.ARR.PAYMENT.HOLIDAY,AA.

Formatted: Justified

Validation on Contract # at file level is required for duplicate record. For this file must contain file name against each row. This criteria will be define in EB.DUPLICATE.TYPE table for bulk payment upload.

Below is specimen format for bulk payment holiday upload file.

FILE_NAME	ARRANGEMENT_REF	CIF_ID	PAYMENT_DT	BILL_TYPE	NUMBER	RECALCULATION	COMPANYID
Payment_Holiday_Fileupload_1502202	AA240303GMNH	200006	28-02-2024	INSTALLMENT	1	TERM	SA0021001
